

## Public supports jug milk operators

WASHINGTON, D.C. - One hundred thousand consumer signatures on a "Freeman proposal" petition against assessments on consumer milk and against oppression of family farmers, were delivered recently to Pennsylvania Senators Hugh Scott, Senator Richard Schweiker and the Pennsylvania congressional delegation by representatives of the Pennsylvania Milk Juggers Association, Inc., a group that produces and markets milk directly to consumers at prices below super market prices.

The petitions were signed in 20 congressional districts by people from all walks of life including housewives, workers, ministers and businessmen. In some districts the signatures exceeded 14,000.

Frank Bertovich president of the association said, "These petitions represent an outpouring of public fear and anger against Washington bureaucracy. Some people waited in line 15 minutes to sign the petition. The signature rate was over 95 percent. I think my \$11,000.00 fine convinced a lot of people something was wrong."

Maynard Rothenberger a family farm retailer from Montgomery County whose plight was reported in U.S.

News and World Report, earlier this year, said "Everyone sympathized with me because I got a

\$2,400.00 assessment for doing business just the way I always have for years. The audits are something else

too. It is getting hard to tell the difference between communist control and this type of oppression. Soon

there'll be nothing left to fight about."

The battle has already had political repercussions upon the tight race for the Republican presidential nomination.

Charles Dodd, a family farmer from Corry, and a delegate to the National Republican Convention said, "I saw Secretary Butz. He said he would free us, but he didn't because he can't control the bureaucracy. Common sense and fairness are unknown to these bureaucrats. Its strange because they can find ways to help the Co-ops involved in Watergate, and who pay millions in political contributions. I switched to Reagan on account of this and I told the Pennsylvania delegation why I did. I got a lot of support and I believe more will follow."

Language accomplishing some of the objectives of the petition has been drawn by attorney John Benjamin Carroll of Syracuse, New York and was submitted to a Senate Agriculture committee hearing but said Carroll, "No one paid any attention because we were

Pennsylvania's two senators, Minority Leader Hugh Scott, second from right, and Richard Schweiker, right, receive petitions signed by 100,000 consumers from throughout Pennsylvania from Charles Dodd, left, a family farmer from Corry, Erie

County. With them is Frank Bertovich, president of the Pennsylvania Milk Juggers Association, Inc. The petitions, seeking amendments to federal milk regulation orders, were presented to the two senators in Scott's office at the Capitol.

## Soviets boost soybean prices; wheat is good

By DIETER KRIEG

LANCASTER — Soviet grain purchases during the past week have caused soybean prices to skyrocket by more than 50 cents per bushel, and the impact has caused prices for other grain commodities to go up as well. Lancaster's grain prices for Thursday (printed on one of the market pages) illustrate the effect:

Average ear corn prices are up a dollar per ton compared to a week ago, and over \$10 per ton, compared to May 7. Shelled corn, now averaging a selling price of just under \$3.50 per bushel, sold for \$3.34 bushel last week and \$3.02 on May 7. The pattern holds true for oats, barley and other commodities as well. Soybeans, which were quoted at \$7.15 per

bushel on Thursday afternoon, were \$6.57 last week, and just \$4.70 in early May.

Wheat prices are also rising. The paying price this week is up four cents from last Thursday, and nearly 30 cents higher than two months ago. (The wheat harvest in southeastern

## Thorny rose bushes in pasture of concern

Control requires caution

By DIETER KRIEG

LANCASTER - That vigorous thorny rose with clusters of small flowers is being attacked in various parts of the country, with the latest battle shaping up in southern Pennsylvania counties.

The multiflora rose, long used as a plant for wildlife and land management, and

[Continued on Page 18]

Good qualities defended

HARRISBURG — The multiflora rose is still considered to be a very beneficial wildlife plant by the Division of Land Management, Pennsylvania Game Commission. As such, the state agency still makes plants available to those who want the stock, although a spokesman for the Commission notes that they will "make every effort not to contribute to the problem."

## York County farm wife receives top prize

PARK RIDGE, Ill. — A 30-year old York County farm woman — Joyce Bupp — has been named national winner in a year-long Bicentennial essay project involving farm and ranch people. Winners in the contest were announced on July 4 by the American Farm Bureau Federation, which sponsored the essay writing. Co-winner along with Mrs. Bupp was a Tennessee farmer, John K.

Ferrell. Each will receive round-trip air fare to Hawaii and \$250.00 in expense money for authoring what were considered equal top entries. Trips will be taken in conjunction with the 58th annual meeting of the American Farm Bureau Federation, to be held in Honolulu, January 9-13, 1977.

In announcing the decision of a national panel of judges, American Farm Bureau

president, Allan Grant, noted that the 206 entries in the contest — billed as a "thinking - writing cam-

paigned in the spirit of those farmers who fought at Lexington and Concord" — were written by farm and ranch people from 35 states.

Each entrant was to outline in a limited number of words "... positive programs of personal involvement which will spread to include others and are designed to keep our Republic on a sound con-

stitutional course for the next 200 years."

The rules called for the essays to: — stimulate an awareness of individual worth — build national pride and strength — identify incentives which tap the creativity of a free people, and — analyze the constitutional soundness of local, state and national

## Lancaster grain prices

formerly  
LOCAL GRAIN  
Thursday, July 8  
These prices are made up  
of the average prices quoted  
by a number of participating  
area feed and grain concern.  
It should be noted,  
however, that not every  
dealer or broker handles  
each commodity. All prices  
are per bushel except ear  
corn and soybean meal  
which are per ton.  
The average prices quoted  
Thursday, July 8, are as  
follows:

|                                                                                                                                         | Bid+  | Offered+ |
|-----------------------------------------------------------------------------------------------------------------------------------------|-------|----------|
| Ear Corn                                                                                                                                | 81.00 | 90.00    |
| Shelled Corn                                                                                                                            | 3.26½ | 3.49     |
| Barley                                                                                                                                  | 2.20  | 2.47     |
| Oats                                                                                                                                    |       |          |
| Local                                                                                                                                   | 1.74  | 1.94     |
| Western                                                                                                                                 | 2.16  | 2.34     |
| Wheat                                                                                                                                   |       |          |
| Millers                                                                                                                                 | 3.37½ | 3.63     |
| Soybeans                                                                                                                                | 7.15  |          |
| Soybean Meal                                                                                                                            |       | 254.00   |
| +Bid is the price the dealer will buy from the farmer delivered to the mill. Offered is the price the dealer will sell for at his mill. |       |          |

## NEST RUN EGGS

Prices are from Egg Clearinghouse, Inc., (ECI) Durham, N.H. and reflect trading prices for gradeable nest run eggs (GNR) on ECI, a nationwide trading center for producers, packers and marketers. GNR eggs are classified by weight in 30-dozen cases, and traded in lots of either 300 or 750 cases. Prices are FOB buyers dock, and are computed Tuesday and Thursday of each week. This week's prices for each classification were:

| Classification   | New Weight | Per Case | Wednesday | Friday |
|------------------|------------|----------|-----------|--------|
| Extra Large      | 51 lbs.    |          |           |        |
| Class 1 - Large  | 48 lbs.    |          | 51        | 53     |
| Class 2 - Large  |            |          | 48        | 51     |
| Class 3 - Medium | 42 lbs.    |          | 42        | 46     |
| Class 4 - Small  | 39 lbs.    |          | 37        | 35     |
| Breaking Stock   | 48 lbs.    |          | 47        | 47     |
| Checks           | 48 lbs.    |          | 40        | 40     |

## Delmarva Poultry

Thursday, July 8

Ready to cook movement remains good with plants clearing easily. Slaughter schedules remain fairly heavy. Today's LTL asking prices generally unchanged on both Plant and US Grade A. Interest for late week deliveries good.

Live supplies adequate and weights generally desirable but occasionally light at some plants.

US Grade A 45-46, Plant Grade 44-45, Premium US Grade A 46½-50, Premium Plant Grade A 46-48

## Eastern Pa. & N.J. Poultry

Wednesday, July 7

Prices unchanged on light type hens. Offering of light type barely adequate with some plants not operating or at least on a reduced schedule. Offerings of heavy type ample for needs.

Prices paid at farm:

Light Type Hens: 10-14½ mostly 14-14½ in PA, mostly 13-13½ in N.J.

Heavy Type Hens: Too few to report.

## Baltimore Eggs

Thursday, July 8

Market steady. Demand fair. Jumbos are tight and smalls are plentiful, but other sizes are in balance with needs.

Cartoned eggs: Prices to retailers, state graded (min. one case sale) white:

Grade A Large 66-69.  
 Grade A Medium 56-60.

## Philadelphia Eggs

Thursday, July 8

Market value of mediums trended 1 cent higher while large values are holding barely steady. Demand fair to occasionally fairly good. Offerings of large fully adequate. Mediums barely adequate to short.

Prices to retailers: Sales to volume buyers, consumer grades white eggs in cartons, delivered: Store door.

A Extra Large 64½-66½; A Large 63-65½; A Medium 54½-56.

# LIFE on the farm

By Dieter Krieg, Editor

It's a blessing that our neighborhood mechanic always had a good sense of humor. Somehow he had to have one to survive, for he was often asked to do the impossible. In the opinion of many, he was the best. And he never let anyone down.

The sound of a two-cylinder tractor approaching probably gave our mechanic frequent visions of "one more problem" coming up. It wasn't necessarily the tractor itself which would bring on headache number 13, but more likely who or what was on or behind it.

Shortly after one of us from our nearby farm would pull into his driveway, Mr. Owad would invariably crawl out from underneath a car or behind a hood and give us a friendly greeting. Then a brief moment of silence would follow as he circled the work we had brought him. Sometimes the sight would make his head oscillate from side to side and a slight smile would appear as he returned his attention to whoever brought him the contraption.

Mr. Owad (I've always called him Mr. Owad because Dad taught us it was proper — especially for those whom we respected) clamped his cigar between his teeth and immediately inspected the broken pieces with both hands. Like a doctor examining a patient, Mr. Owad methodically continued to study the equipment. His questions might be "How did you do this?" and "How soon will you need it back?"

Generally, it always worked out that we needed our repairs done about the time six others wanted theirs completed. That's why our neighborhood mechanic needed a good sense of humor in addition to his many mechanical skills. A person could always count on him.

The radio was almost always turned on at John Owad's "Woodbine Garage" and more often than not, the

owner joined right in with the music. Whenever a program featured songs from the 1930's and '40's, the amiable mechanic would shift into a world of his own. He'd glide across the parts-strewn floor, making his way to the tool bench, and proclaim the "Big Band Era" to be the best there ever was or ever will be. The rhythm of the music went right through him and showed up in his actions. Some small talk got started, and the work, as well as the beat, went on.

From early in the morning, until late at night, John Owad continued to work on anything from tea kettles to manure spreaders and transmissions to condensers. Nothing was ever too big or too small as the able mechanic accepted everyone else's problems as his.

Talking much of the time whenever someone else was around to listen — Mr. Owad extended a hand of friendship even while both blackened hands were wrestling with an exhaust system. Animals around the neighborhood also shared in the man's warm personality, as most rarely left the premises without a few friendly pats across the back or head.

Finishing the chore, Mr. Owad would inspect things again as carefully as he did when the broken item was brought to him. Then he'd tell us it should hold better than the original because it had some "Woodbine" on it.

Nowadays most farms have their own rather elaborate repair shops, and men like John Owad are harder to find than ever before.

Nevertheless, whether the mechanic is the farmer himself or the man down the road, he's a fellow the farmer can't be without.

The days of our Life on the Farm would sometimes have been a lot longer had it not been for our neighborhood mechanic fixing things for us so well and promptly.

## WHAT DO I LACK?

Lesson for July 11, 1976

**Background Scripture:** Matthew 16:24-26; 19:16-30; 2 Corinthians 6:14 through 7:1; Colossians 2:16-23.

**Devotional Reading:** 1 Corinthians 12:1-13.

The story of the "Rich Young Ruler" (as it is more commonly known), is one of those stories that can easily — though not comfortably — be personalized. Try reading it sometime and substituting the pronoun "I" for the young man who came to Jesus inquiring of eternal life.

"I've done it all!"

It doesn't take too much imagination to hear ourselves saying to Jesus, "Lord, what remains for me to do in order to be assured of eternal life?" We may not verbalize it very often to our friends and neighbors, but many of us, like the young man in the story, are concerned to find assurance of eternal life. No pastor who visits the sick and the dying can be unaware of that deep concern.

I must assume that the young man in Matthew 19 was sincere in his question, yet, at the same time, there was also at work in him a certain smug pride. It was the kind of question which is asked by someone who anticipates that the answer is going to be to his favor. Consciously or unconsciously, he is not so much asking a question as he is seeking a "pat on the head."

One of the reasons I say this is that the young man seems to be so "wrapped up in himself" that he misses what Jesus says to him in the response to his initial question. "Why do you ask me about what is good," says Jesus, "One there is who is good." It is as if Jesus already knows what is in this man's mind: he knows the man is rather proud of his own righteousness. So he reminds the man that no one but God alone is perfectly good.

The young man, however, seems to miss this statement and only hears Jesus say: "If you would enter life, keep the commandments" (19:17). "Which?" replies the young man, still smugly, for when Jesus digests the Ten Commandments, the young man is eager to reply: "All these I have observed; what do I still lack?" (19:20). The question he asks skirts the edge of being an outright boast.

With his amazing insight into this young man, Jesus

## NOW IS THE TIME...

**To Honor Withdrawal Periods**  
Various drugs and medicines may be used in the livestock and poultry production business. All of these have definite uses and times — stated before slaughter or in the case of milking cows, the length of time the milk is not to be used. We urge every producer to comply with these stated instructions in order to protect his market and provide a quality product. To take short-cuts is risky and could mean loss of income and charges of non-compliance.

### To Introduce New Grains Gradually

If new grains are to be used in livestock rations, they should be allowed a curing period of several weeks and then introduced slowly into the grain rations. Too much new grain may cause bloating and scouring. In all cases the new grain should be used only as a part of the grain rations so the animals will get accustomed to it. If new grain is to be ground or cracked, then only small amounts should be used and stored; otherwise, it may heat and mold before being fed.

### To Control Face Flies

Cattle on pasture may be seriously bothered with face flies; these insects work about the eyes of cattle and will cause serious infection and even blindness. Owners are urged to provide some protection to animals that are bothered and not having a chance to get into buildings. The use of Ciodrin or CIOVAP as a spray or on some automatic fly control equipment is suggested; these materials will help control both face flies as well as other flies. If the animals can get into a dark building during daytime hours, this will help relieve the problem. Owners are urged

challenged him in the one area where the man was extremely vulnerable: his love of material possessions. We must realize that Jesus is not laying down this challenge for all Christians, for material possessions are not the stumbling block for some that they are for others. He challenged this young man to give away all he had because he knew this was the man's weakness. He really did want eternal life (just as we do), but he wanted something even more (just as many of us do.)

For all of his faithful keeping of the commandments, the man lacked the one thing that was most important: a generous, loving heart. So it may be with us: we may keep the rules, be good churchmen, live lives that seem beyond reproach. Yet for all that goodness, we may still lack the most important thing of all.

I know what I lack. What about you?

to check their animals frequently for this face fly problem.

**To Harvest Small Grain Straw**  
Prices for straw seem to be headed (already there) for record highs according to recent sales. The demand has been greater than the supply in recent years, and now with a shorter length to both barley and wheat, the crops yield of straw will be less this year. We urge growers to cut their grain as short as possible in order to get greater yields of straw. Also, no doubt little of the straw will be left in the field, as it is done some years. I was always of the opinion that straw should be used as bedding in order to keep animals clean and more comfortable. In comparison to ground corn cobs which have greatly increased in value in recent years, straw is a very important "fringe benefit" of small grain production.

God is our refuge and our strength, a very present help in trouble.

Therefore will not we fear, though the earth be removed, and though the mountains be carried into the midst of the sea;

Though the waters thereof roar and be troubled, though the mountains shake with the swelling thereof. Selah.

Psalms 46: 1-3

## Farm Calendar

**Saturday, July 10**  
Pennsylvania Young Farmers continue their annual Summer convention in Lebanon.

**Wednesday, July 14**  
National Chicken Cooking Contest, Civic Center, Philadelphia, 9 a.m.

**Thursday, July 15**  
Berwick Vegetable Coop. directors meet at the BVC office, 8 p.m.

**Friday, July 16**  
South Schuylkill Young Farmers Tour, today and tomorrow.

"Evolution of Agriculture" Parade, Martinsburg, 6 p.m. sharp; antique equipment on display and in use the following day at Memorial Park.

**Saturday, July 17**  
Berwick Vegetable Coop. annual meeting, 5:30 p.m.

Angus Field Day, Long Meadows Farm, Port Murray, N.J. Hunterdon County, New Jersey, "Rural Ramble"

### Commercial applicators

## Pesticide applicator test given

HARRISBURG - Pennsylvania Department of Agriculture. The examinations for commercial pesticide applicators will be given in July in York, Adams and Franklin Counties, it was announced today by the

Franklin County Extension Office, 191 Franklin Farm Lane, Chambersburg; and July 22 at the Farm Credit Building, 3301 West Market St., York. All sessions begin at 1:00 p.m. and will be strictly for the administration of exams; no instructional or educational program will be presented.

Examinations will be offered in all commercial categories. Individuals may be tested in as many areas as they desire.

Study materials are available and may be purchased from the Penn State University as an aid in preparing persons for these examinations.

These examination sessions are being coordinated by Donald Lott, pesticide inspector for the Department of Agriculture. Anyone requesting additional information or who plans to attend any of the sessions is advised to contact Lott at the Region VI Office, Box 419, Summerdale, Pa. 17093, or their local county agent's office.

Registration in advance is necessary so that proper preparations can be made.

Summer on the farm is represented by hay and grain fields and the pleasant aromas released by those crops. Warm weather, clear blue

skies, and the hypnotic rumble of machinery are part of the season too. It's the height of summer.

## Vegetables up at PSU show

UNIVERSITY PARK — Extensive vegetable variety trials and weed control studies are underway at the Horticultural Research Farm of The Pennsylvania State University, nine miles west of the campus on Route 45. Of interest to home gardeners and commercial vegetable growers, the field experiments will be featured during the annual Ag Progress Days August 25 and 26.

All America selections are included in the trials, one aspect of experiments at the Rock Springs Agricultural Research Center, site of Ag Progress Days. The variety trials will feature sweet corn, tomatoes, snap beans, muskmelons, cucumbers, and watermelons. Other crops in the trials are cabbage, pumpkins, peppers, and winter squash.

Weed control studies are in progress on snap beans, lima beans, kidney beans, tomatoes, cabbage, beets, carrots, onions, sweet corn, cucumbers, and asparagus. Herbicides are applied in several ways — preplant incorporation, delayed preemergence, and postemergence

Ag Progress Days will also feature plots of a Penn State experimental high sugar sweet corn hybrid. Sugar is retained in the kernels of this experimental hybrid for longer periods of time after harvest than for standard sweet corn types. Ears can be harvested over a seven to eight day period as a result of the higher sugar content. Elsewhere August 25 and 26, the effects of fumigants and plastic types on vigor and weed control will be shown for tomatoes, peppers, eggplants, and

watermelons. Plantings will be compared through both clear and black plastic in untreated areas and areas fumigated with either chloropicrin or a mixture of methyl bromide and chloropicrin.

A direct-seeded cabbage variety trial will feature over three dozen varieties and unnamed selections from numerous seed companies. These plots will be seeded late in the season to rate varieties for damage by black speck (pepper spot) in addition to table qualities.

## Gehl dealer named

LITITZ — Binkley & Hurst Bros., 133 Rothsville Station Road, Lititz, has been named the franchised dealer for Gehl farm machinery in this area. The announcement was made jointly by Gehl Company officials at West Bend, Wisconsin, and their representative in this area, Don E. Powell, 253 S. Jackson Street, Strasburg. The Gehl Company specializes in forage harvesting, handling and feedmaking farm machinery

According to Powell, Binkley & Hurst Bros. was chosen as Gehl dealer for this area because "it is best qualified with personnel and facilities to handle the sales and service opportunities of the established and expanding Gehl farm machinery line."

Spokesmen at the dealership express their confidence in the Gehl Company, and invite all to stop by and see the complete machinery line now on display.

Does anyone recognize this photograph? It was sent to Lancaster Farming by Delaware businessman, William G. Ott who found it in an antique frame he purchased at a Lancaster County

auction earlier this year. He believes the picture may be 50 years old or more. It was taken by Schlauch Photography, New Holland.

Work is still underway on the new sales barn at the New Holland Sales Stables. It will be complete in a few weeks but the pens have already been put to use.

## Priceless new computer system ready for supermarkets

One of these days you're going to wheel your cart of groceries to the checkout and find that the cash register is gone. Don't panic, says Coral Morris, extension home management specialist at the University of Delaware. And don't think your groceries are free, either! Most likely your supermarket has just gone to "priceless" pricing.

What will this change mean to you? Well, for starters, it's going to make your trip through the checkout line much faster. And second, even though you won't be able to check each price as the checker goes along, you'll find that you

have a much more detailed record of purchased and prices when you get your computer printed slip. Instead of an abbreviation for a department such as "dairy" or "grocery," leaving you to figure out what each item refers to, you'll get a slip which reads OLD FASH VEG .22. This tells you that you paid 22 cents for old fashioned vegetable soup.

This kind of detail will be very helpful after you get home, but many consumers see other problems which will irk the shopper. For instance, depending on the market, priceless pricing may do away with market

prices on each item. A "scanner" can read the bar code now found on many items and conventional numbered pricing really won't be necessary except as a convenience for the shopper. Some markets may provide grease pencils for shoppers to mark their own items from prices CORRECTLY noted on each shelf. (Supermarkets are notorious for listing prices on shelves of items that were moved weeks ago to another aisle. It gets very confusing, but the new pricing may force this issue, for the good of the consumer.)

You may be wondering how the computer is going to

keep up with daily specials and "two-fers" (two or three for a given price). Actually the scanner and computer will be more accurate than the human checker. You will no longer have to group your "three-for-a-dollar" items together so the checker doesn't charge you 34 cents for each of them as she happens upon them in various places. The computer will be programed to charge 34 cents for the first two and 32 cents for the third.

Checkout time can be cut by as much as one-third, says Ms. Morris, and that should put smiles on the faces of even the most

skeptical. Faster lines will result because the checker needs only to bag each item as he/she runs it over the scanner, which will feature a built-in window on the counter.

Another advantage of computer checking in the supermarket is the ease with which a manager can maintain inventory control. The computer will record sales and automatically tell what is needed. With more precise information, ideally the store can operate with smaller quantities of stock in reserve and will have less of its money tied up this way. The computer can signal for reordering when supplies reach a certain minimum, so there will be less chance of running out of things. Thefts and errors on incoming deliveries can be better pinpointed and controlled.

Many consumers groups feel that the new pricing systems are a tremendous investment in equipment and that these costs will get passed on to the consumer in the form of higher food prices. Supermarket managers say that it should cut costs which will show up in the consumers food bill in a positive way.

## Stream map available

UNIVERSITY PARK — Outdoorsmen wanting to study the terrain of Pennsylvania may find handy the Stream Map of the Commonwealth, published by the Agricultural Experiment Station at The Pennsylvania State University.

Geographical features included are 3000 each of streams, towns, and elevations above sea level. The map gives the names and locations of major mountains, valleys, lakes, dams, swamps, and reservoirs. The detailed Stream Map is about 3 feet wide by 5 feet long and the scale is 6 miles to the inch.

The map is available for \$1.06, tax included, from Stream Map, Box 6000, University Park, Pa. 16802. It is mailed in two styles, flat or folded. In ordering, please indicate which type you want. Checks or money orders should be made payable to The Pennsylvania State University. Allow at least two weeks for delivery.

When visiting the Penn State campus at University Park, the Stream Map can be obtained in room 232 of the Agricultural Administration Building. The office is open from 8:00 a.m. to 5:00 p.m., Monday through Friday. The map was produced by Howard W. Higbee, professor emeritus of soil technology.

## The ins and outs of buying farmland

**Editor's Note:** The following article is based on a speech given by William Crowley, Natural Resource Economics Division of USDA. He made the presentation earlier this year at Michigan State University.

EAST LANSING, Mich. - To buy or not buy farmland - that is the question. And if to buy, is now the time? More than rhetoric, this problem is often a difficult one as farmers (and would be farmers) weight the merits of buying or leasing farmland.

The optimists on the one hand say that land just has to be a good buy since there's only so much to go around for so many people - an increasing population at that. And to back up their position, they point to the nearly continuous rise in farm real estate values since 1933.

The more cautious investors contend that farmland is overpriced in relation to its earnings potential. They argue that land should not be bought until either its price drops or its money-making potential improves. Moreover, they rightly point out that there's no guarantee that land values will keep rising.

Although both viewpoints have merit, they overlook the fact that trends in land prices and price-earning ratios are based on national averages. Therefore, regional or local deviances are hidden. Also, the individual farmer's situation is not taken into account.

As can be imagined, the prospective buyer's circumstances - such as his financial resources - figure heavily in any buying decision. In addition to money on hand or capital assets, other big factors are: producer and managerial abilities, debt repayment capabilities, levels of aversion to risk, short- and long-term land ownership goals, and alternative uses for available funds.

Assuming however, that the buyer is adequately financed and is or will be a reasonably efficient farmer or landlord, the present time appears to be reasonably favorable for buying farmland. Still, though, a little cautious figuring before the deal is closed is definitely wise.

The first maxim to keep in mind is that farmland has value primarily because it is capable of generating income. Of course, land offers other benefits such as a sense of independence and security in owning a chunk of the earth, but the prime consideration should be financial.

And financial consideration goes far beyond the price tag. It involves projecting into the future expected annual net income from the land - a not so easy chore, particularly in light of environmental controls on agriculture.

Also, a discount rate must be figured into the projected income over the years, as the longer you have to wait to get that income the less it is worth to you today. For example, compare the worth - purchasing power - of today's dollar against one in 1950.

There's a mathematical equation - the income capitalization formula - that is based on this shrinking phenomenon of a constant dollar. The formula is simply  $v = a/r$  where "a" is annual net land income, "r" is the discount or interest rate, and "v" is the resulting implied value of the land.

Use of the formula can help you determine a tract of land's breakeven price. Assume you have your eye on a tract with a projected constant annual net earning power of \$100 per acre. Figuring to keep the land indefinitely and that the discount

rate should be eight percent a year, the breakeven price would be \$1,250 per acre.

If this is more than the going market price, don't despair. Most land - regardless of the location - appears to be selling at a premium these days. That is, the asking price exceeds the present value of the anticipated income stream.

One angle the formula doesn't take into account is the price appreciation potential - a big factor in recent years with zooming farm real estate values. Particularly if the land is in an area where there is a strong demand for add-on tracts or where there are urban or other nonagricultural pressures, land holding can be a good investment in itself.

The lure of land appreciation can turn into a pitfall, though, if the situation is not realistically appraised. For example, if the land's earning power is too low - even if anticipated appreciation is high - the inbetween years can be financially lean ones.

Another factor to consider is that land appreciation is not certain, even though the near future looks optimistic. A possible cloud on the horizon could be land use controls such as measures to keep prime land in agricultural production.

These controls would preclude or at least complicate the sale of farmland to urban, industrial, or recreational buyers - those usually most willing and financially able to pay premium prices.

If all these "ifs," "ands," and "buts" about buying farmland are just too much for you or if you're short on initial capital, don't give up - you might want to consider leasing. Leasing has its drawbacks in that you don't share in land appreciation and you might run into a nonrenewable contract, but it also has its good points.

The main advantage is that the cash flow from a leased tract may be more than that from an owned tract. Reason is that a tenant doesn't have to make mortgage or property tax payments.

## Soviets boost

(Continued from Page 1)

Pennsylvania is described in greater detail in latter parts of this article.

Making the top of the news this week are the grain sales to Russia which were just rumors at last week's writing. But, as is usually the case, they were confirmed — in this case even before that particular issue of this paper was delivered into readers' mailboxes.

The Soviets purchased a million tons of soybeans from the United States last week, and 300,000 tons this week, adding further strain onto an already low supply, and with lowered soybean acreages this year, the picture is not expected to be very bright for anyone not in the soybean raising business. More than three-quarters of the Soviet's soybean purchases came from the United States, while 200,000 tons were ordered from Brazil, where soybean supplies are also tightening up.

In addition, corn and wheat sales were also announced. Late this week more rumors for additional sales were confirmed and the United States committed itself to delivering an additional 1.5 million tons of soybeans to the Soviets. That order, along with others for corn and wheat won't be filled until after October 1. The sales will apply to the conditions of the new long-range trade agreement worked out last Autumn.

With soybean carryovers from 1975 and this year's plantings being down as they are, the soybean market is expected to remain strong for the rest of this year — and probably well into 1977. The situation is likely to carry other grain prices to new heights as well, and could spell trouble for those who must buy grain in order to produce finished products such as milk, meat and eggs.

In all, the Soviet Union has contracted to buy 3.8 million tons of grains from the United States. The sales do not include the 1.3 million tons of soybeans purchased during the past week and apply to the long-range grain agreement which takes effect on Oct. 1. Categorized, the 3.8 million ton sale includes 1.75 million tons of soybeans, 2.25 million tons of corn, and 1.55 million tons of wheat. All have to be shipped after Oct. 1.

A spokesman for Pennfield Feeds noted that he expects soybean and corn prices to remain strong since supplies of both are turning out to be tight. He added, however, that there is an abundant supply of wheat. Also, the quality of the crop is being described as good or better. But yields in Pennsylvania are nothing to brag about. Just a bit over a third of the crop has been harvested so far, with combines rushing out to the fields between showers. Considering the frequent rains, the wheat is coming in satisfactorily, although some fears are being expressed over the possibility of repeating last year's nightmarish harvest when some wheat was actually sprouting on the stalk.

Wheat quality, for the most part, was being described as being good or better in all parts of Lancaster County. A Quarryville grain dealer described the crop's quality as "beautiful," while another dealer in the Bird-in-Hand area called it "nice."

Yields, however, are down. With the crop only about a third in, yields in southern Lancaster County are averaging about 37 bushels per acre. Some report harvests as high as 50 bushels per acre, while others combined only half that much or less. "Some of the nicest wheat we've ever seen came in here up until about the 6th," a spokesman at Quarryville's Red Rose Feed Store said. The frequent rains during the past week are definitely expected to hurt test weights, although no one is panicking yet. Test weights, are, in fact, still very satisfactory and have been exceptionally high for most of the harvesting season so far.

The per cent moisture reading has also been satisfactory for the most part. At least up until the rains arrived last weekend. The ratings had been well below 13.5 per cent for nearly all parts of the area last week, but are coming up now due to the wetness in the fields. A headline to this part of the story might have read: "Wheat harvest slowed, mud plentiful," but the Russian grain deals overshadowed that one.

One grain dealer described the present situation adequately enough by saying: "Fortunately the combines have had a few hours here and there." They're out combining every chance they get — possibly (most likely) because they're remembering how wet and miserable the harvest was last year. A big headline a year ago next week proclaimed: "How wet can you take wheat?" echoing a most frequently asked question of the time. Farmers and grain handlers alike are hoping and praying that the situation won't repeat itself.

Moisture readings this week were predominantly over the 14 per cent mark, grain handlers reported. Some went as high as 16 per cent. There have been scattered reports of some of the earlier varieties of Abe and Arthur 71 beginning to sprout. Overall, however, it should be emphasized that the quality of harvest is still being described with kind and appreciative words. Only the yields are being criticized.

Wheat on the Eastern Shore of Maryland was described as "excellent." If the weather improves a bit in this part of the country, the wheat harvest may still have a chance to be excellent here. Right now a lot of farmers and grain dealers are watching the situation with fingers crossed, while corn is thriving in the hot, humid weather and has reached a height of around six feet in quite a few fields.

# FEED INGREDIENT EVALUATION

Purina Dairy Research has developed three milking programs designed to fit varying economic conditions found on today's dairy farms. Obviously, the program best suited for a particular dairy operation depends on many factors but the most important factor by far is the type, quality and amount of roughage available to feed. The following programs were designed to fit these roughage considerations.

— Challenge or Lead Feeding Program. For areas where milk prices make heavier grain feeding more profitable even though roughages are the most economical source of nutrients.

— Feeding According to Production Program. For areas of low milk prices where roughages are the most economical source of nutrients.

— Limited Roughage Feeding Program. Follow this program when the milking ration is a more economical source of nutrients than available roughages. Milk price is not an important factor in considering this program.

Webster defines quality as grade, rank, degree of excellence, capacity, property, nature and a feature among other things, if we add control to this, quality control is then being able to control the grade, rank or nature or defining these to the extent of being able to utilize them for their exact worth.

You ask what is the difference between ingredient and Chow quality control. This ingredient quality control has to do with the nature of each individual component of a Chow. When these are all blended together into a Chow, then we may talk about items relative to Chow quality control. These may be particle size, uniformity in mixing, fat addition, or laboratory proximate analyses (protein, fat, fiber, etc.).

## York County

[Continued from Page 1]

government, schools and courts.

Mrs. Bupp's essay took the form of a personal letter to her children, 7-year-old Patty, and 4-year-old Richard. In it, she listed a number of special wishes for their future, and for the future of the country. She outlined how personal involvement could fulfill these wishes. On Mrs. Bupp's list: — a deep faith in God — a sense of responsibility — pride in self and country, and — the mental balance provided by a sense of humor.

Concerning involvement, she wrote: "On this nation's 200th birthday, American parents should pull TV plugs, take their children, and together spend a day improving their neighborhood. Just a lesson in picking up litter would make our country a better birthday present than a 200-candle cake."

Leroy and Joyce Bupp, with the aid of full-time hired help, handle a 400-acre dairy operation involving 130 milking cows in two herds, one owned and one leased. They also operate a beef feedlot for custom meat retailing.

In his essay, John Ferrell reminded Americans that the struggle to preserve liberty often requires more effort than the battle to gain it. "No generation can pass to the next, the personal convictions and sacrifices necessary to maintain freedom..." Ferrell warned: "The very gifts which made America great may cause her disintegration, if we subvert our laws into loopholes and our freedom into foolhardiness..."

He added: "If America is to survive, it must be nurtured by the same spiritual resources that brought it to maturity. The home has been the ultimate foundation of every civilization known to history. The silent influence of the home under the sacred relationship of marriage is where character

Joyce Bupp

is formed and judgment is molded. Love, the purest reflection of God, is the one indestructible force that war cannot defeat or peace corrupt — love for God, for home and for country..." Ferrell wrote.

The Ferrells have two grown children, and live on a 200-acre former dairy farm now converted to the production of Angus cattle.

John Ferrell calls himself "self-educated." His father died when he was a small child, and formal education was replaced by the struggle to make a living. He at one time had dreams of a career in journalism.

In congratulating the winners and commending all participants, Grant said the contest proved that the power of American farmers to analyze complex problems and offer sound solutions has not withered with the years. "We were confident that, as often before, farm people would have positive, workable answers to complex national problems. This essay exercise renewed this confidence," Grant said.

LANCASTER — The Lancaster County 4-H Horse Show is set for Saturday, July 17, at 9 a.m. at the Lancaster County Riding Club, 2615 Columbia Ave., Lancaster. The Show Grounds are located just west of Lancaster along the Columbia Pike. This will be the 4-H county-side show including members from the eight clubs.

In order to participate in this event, members are required to compete in their local grooming and showmanship contest which should be conducted prior to July 17.

The show will start promptly at 9 a.m. with the Junior and Senior grooming and showmanship classes.

### Fulton Grange 66

Fulton Grange 66 met in regular session on June 28 with Master Thomas Galbreath presiding.

The following legislature was acted upon: opposed House Bill 3541; opposed Senate Bill 1520; and opposed Senate Bill 46.

It was voted to support Sunset legislation to compel Congress to review each government spending program every four years. All programs in any one subject area would go out of existence the same year unless reviewed and re-enacted.

The Grange program, under the direction of the agriculture committee, featured Raymond Weber of Dairy Council, Inc., who

spoke on the nutritional aspects of dairy foods.

A film, "Read the Label and Set a Better Table," was also shown.

Winners of the hay and haylage contest were announced.

The next meeting, July 12, will feature Robert Bruce of the Farmer's National Bank, who will speak on the correct and incorrect way to set up trusts. He will also discuss inheritance tax.

## County Horse Show slated

There will be two judges, and each club is eligible to enter three members in each of these classes. In other classes there is no limit as to the number of entries.

Three additional classes will be held at County Roundup: Classes 30, 31, and 32. Class 30 is English Walk-Trot Equitation for members not 14 years old by January 1 of the current year and not eligible for any other class except Class 1, Class 3, and Class 4. The rider only will be judged.

Class 31 is Western Walk-Jog Equitation for members not 14 years old by January 1 of the current year and not eligible for any other class except Class 1, Class 3, and Class 4. The rider only will be judged.

Class 32 is Three-Gaited Equitation. The horse is to be shown at a walk, trot, and a canter both ways in the ring. It will be judged on performance and manners,

also. A roached mane and tail is not required.

These classes are not eligible for District or State competition.

The top three entries in each class, except for two in the Pair and one County Team, will be eligible to enter the District Show to be held at Rygate on September 11.

Judges for the show will be Mrs. Ann Smullen, Oxford, Pa., for the English Classes and Jim Catagnus, Parkiemenville, Pa., for the Western Classes. Mrs. Carol Henkel will serve as steward.

Animals exhibited in classes 3, 4, 10, 11, 14, 16, 24, 26, and 28 must be measured during or within 10 days prior to the County Roundup and a certificate of measurement must be filled out.

For more information, contact a club leader or the 4-H Extension Office.

# Crop insurance hits new high

WASHINGTON, D.C. — With the 1976 crop year well under way, about \$2 billion that farmers have invested in farm crop production are protected by federal crop insurance, Secretary of Agriculture Earl L. Butz announced recently.

"Although we are still selling 1976 crop insurance for such crops as citrus," Secretary Butz reported, "this \$2 billion of federal crop insurance protection is already the highest in history."

The acreage and number of crops protected by federal crop insurance have risen sharply this year. An estimated 22 million acres have now been insured against production cost losses from natural hazards, Butz said.

The \$2 billion of protection is a 25 percent increase over last year.

Federal crop insurance now protects farmers in 1,467 counties in 39 states. Federal crop insurance is a voluntary, self-help service permitting farmers to protect their crop investment against loss from

all natural hazards to most of the 24 varieties of crops on which the insurance is available. Some specialty crops, such as citrus, raisins, and peaches, are insured only against loss from particular causes such as freeze and wind damage. The service operates like any other insurance plan, with farmers paying yearly premiums based on local crop production and loss history and with payments for loss being paid from this premium fund.

"This is a cooperative program," Butz said, "which helps growers take a business-like approach to the problem of protecting their capital investments, their credit and their community economic strength. When crop damage hits an area, it hurts everyone for miles around — merchants, equipment dealers, bankers — every business and profession feels the loss. Federal crop insurance is meant to put money back into a community when weather, insects or disease have wiped out the area's major source of income.

Thus, the higher the percentage of insured farmers in each county, the greater the protection of the economic stability of the area, the state and the nation.

"With credit becoming increasingly important to farmers, the use of federal crop insurance policies as

loan collateral is becoming an important management tool for farm operations.

"The combination of credit value and investment protection offered by federal crop insurance is a major factor in the continuing growth and public acceptance of this service to agriculture."

## Meat imports limited to 1223-million pounds

WASHINGTON, D.C. — Secretary of Agriculture Earl L. Butz announced recently that 1976 imports subject to the Meat Import Law are estimated below the trigger level for quota imposition under the law.

Secretary Butz said agreements in principle have been reached with major exporting countries which will limit imports to 1,223 million pounds. Formal agreements with participating countries are being concluded.

Public Law 88-482 enacted in August 1964 provides that if yearly imports of certain

meats — primarily frozen beef — are estimated to equal or exceed 110 per cent of an adjusted base quantity, quotas are to be imposed on the imports of these meats. The adjusted base quantity for 1976 is 1,120.9 million pounds, and the trigger level is 1,233 million pounds. The secretary said 1976 imports probably would exceed the trigger level were it not for the expected arrangements with supplying countries.

The secretary said that import prospects will be reviewed quarterly. The next estimate of 1976 imports of meat subject to the Meat

# Pa. crop outlook issued

HARRISBURG — Harvested acres of corn for grain, hay and tobacco in 1976 are expected to be more than last year in Pennsylvania, but there are fewer acres of oats, winter wheat, barley, rye and soybeans, according to the Crop Reporting Service. These expectations are based on conditions as of June 1.

At the U.S. level, acreage for harvest is expected to exceed last year for corn and rye but be lower for other crops.

Expected acres to be harvested in Pennsylvania and changes from 1975 are, corn for grain, 1,600,000 acres, up three per cent; all hay, 1,980,000 acres, up one per cent; tobacco, 12,500 acres, up four per cent; oats, 365,000 acres, down three per cent; winter wheat, 315,000 acres, down nine per cent; barley, 147,000 acres, down

five per cent; rye, 14,000 acres, down 12 per cent; and soybeans for beans, 36,000 acres, down 16 per cent.

Expected acres to be harvested in the U.S. and changes from 1975 are, corn for grain, 72.4 million acres, up eight per cent; all hay, 61.1 million acres, down one per cent; all tobacco, 1.0 million acres, down six percent; oats, 13.1 million acres, down four per cent; winter wheat, 49.2 million acres, down five per cent; barley, 8.4 million acres, down four per cent; rye, 869,000 acres, up seven per cent; and soybeans for beans, 48.2 million acres, down 10 per cent.

### Wood Fuel

About half the trees cut down throughout the world are burned as fuel with much of the wood first converted into charcoal

# Public

(Continued from Page 1)

too small to have any influence and had no money for political contributions. Thanks to 100,000 fellow Americans, we are not small any more. I hope Congress can help the consumer and these farmers."

The sentiments of 100,000 Pennsylvanians was summed up by Gilbert Thompson of Valley Forge, who has put a large sign on his farm comparing the 1776 war to the 1976 problems the Federal government had brought to him.

Thompson said: "Tyranny was stopped at Valley Forge 200 years ago. We will stop it again if all Americans across this country join with us. We need people in public life who will serve the public and not try to force us to our knees. We are asking people all over America to join with us to help lift the control of bureaucracy over every facet of our lives. We were given a free country. Whether we keep it is up to us."

The petitions ask their elected representatives what they are going to do to help. 100,000 people have asked for a reply.

## Control requires caution

[Continued from Page 1]

partially funded through government programs, is now receiving a less enthusiastic welcome from various state agencies, farmers, and related organizations.

At a meeting held in the Red Rose City's Farm and Home Center this week, the Lancaster County Cooperative Extension Service co-hosted an educational meeting along with Dow Chemical Company, manufacturers of a herbicide specifically designed for the control of certain plants, including the multiflora rose.

The thorny bush has been creeping up in some pastures along southern tier counties and is considered to be a nuisance. The battle against the controversial bush began in West Virginia when livestock producers applied pressure to political groups to bring about a program to control the plant. Successful in their bid, the movement has now spread to neighboring states. Southwestern Pennsylvania counties, where the topography and farming industry is similar to that of West Virginia, are reportedly showing the most interest in adopting a program which would control the thorny vegetation.

Spokesmen for Dow, who were on hand at Wednesday's meeting at the Farm and Home Center, provided specific information on the chemical - Tordon 10-K - which is regarded to be very effective in controlling multiflora rose, yet poses potential threats against other plants.

Senior Lancaster County Agent Max Smith, while recognizing the problem posed by the multiflora rose, expresses concern that the chemical to control it be used properly. Don Baldwin, marketing specialist for Dow, agrees with the caution, noting that "our major concern is on product stewardship . . . use it safely, use it right, or please don't buy it," he advised. "We want to start with the highest level of competence in distributing and applying Tordon," he said, which is why his company is setting up training schools in areas where the product has been cleared for use. It was recently cleared for limited use in Pennsylvania; Tordon 10-K carries a restricted label, and is likely to be available within the very near future. The Extension Service wishes to take the responsibility of training potential users and urges those interested in using Tordon 10-K to contact their office.

Both Smith and spokesmen from Dow stressed that Tordon 10-K could pose potential dangers for crops such as potatoes, soybeans, tomatoes, tobacco, clover and alfalfa. It is practically harmless to animals unless absorbed in large amounts, but a real killer of plant life if used incorrectly. To illustrate just how deadly the chemical can be to certain plants, Baldwin pointed out that just a half gram of the material spread over an acre of a tobacco field would be enough to have the crop show signs of effect.

The Dow people developed the chemical for control of certain noxious weeds in certain rangelands, fence rows, and pastures. Procedures have been developed which should make safe use possible, but the safety factor cannot be overemphasized. The manure from animals which grazed on the treated fields, for example, will spread the chemical. It passes through their bodies virtually unchanged. Therefore it is extremely important that manure from these animals be returned to the area where they grazed. This could develop to be a real problem for farmers who collect their manure in huge storage areas and can't possibly spread the all of the excreta on fields where the Tordon 10-K originated. This is one reason why Smith urges potential users to do all they can to avoid contamination of any areas which aren't to be treated. Tordon 10-K could also be spread through ponds and streams, especially if they are sources of irrigation water.

Fields and other land areas treated with Tordon 10-K should not be planted to field crops, even though some crops aren't actually harmed by the residue. Some crops

such as tobacco and potatoes are highly sensitive to Tordon 10-K and would not grow, but others such as corn, would. However, a user who plants corn in a field which has been treated with Tordon 10-K would be stepping outside of the bounds of Tordon's legal limits of use. The government has set a legal limit of "zero" for Tordon residue in corn. Cattle may graze on treated areas, and there is a small tolerance of Tordon in milk, but manure from those animals should be returned to originally treated fields.

While the multiflora rose is now considered to be a thorn in land-use management, it is still being distributed to those individuals who wish to plant the bush. The plant was, in fact, once recommended for planting by both the ASC and ASCS offices. Distribution has now been limited or even discontinued, although the Pennsylvania Game Commission still makes the multiflora rose available to those who request it. Please see their side of the story under a separate heading beginning on page 1.

The multiflora rose bush is not new to Pennsylvania, but the product to control it is. It was recently approved for limited use in the Keystone State and criteria are printed on a special Pennsylvania label. Like all labels, Dow regards the printed matter on the side of the container as a legal document. The company stresses proper use of all chemicals. Pointing out repeatedly that toxicology to plants is what users really have to worry about when applying Tordon, Dow spokesmen note with some satisfaction that the product causes no adverse effects on animals. The label, they point out, carries only a "caution" - the lowest level of warning.

Tordon 10-K is recommended to be applied at a rate of 40 pounds per acre. Dow spokesmen quickly add, however, that such a rate would apply only in a few cases since growths of multiflora rose and other bushes are not likely to cover entire acres. A more practical rule of thumb for amount to be applied might be: one ounce per 10-foot diameter multiflora rose bush. The Extension Service and ASC offices offer their guidance in making calculations and whether certain areas are safe for treatment.

The control of the multiflora rose bush has received positive endorsements from the Pennsylvania Farmers Association, the Pennsylvania Farmers Union, and the Pennsylvania Grange. The ASCS has agreed to go on a cost-sharing program with those who wish to control multiflora rose bushes, but it's noted that funds are limited and in some cases even non-existent. The multiflora rose control project is not statewide, however. Also, it is for pasture management only. ASCS will accept a cost sharing program not to exceed the 50 per cent mark, and not including the cost of application.

Specific details on the application of Tordon are available from the Extension Office and inscribed on the label. It should be noted that the reading of the label will not constitute "training" for use of the product.

Smith informed LANCASTER FARMING that his office, in cooperation with the ASC people, is lining up several educational meetings late this summer to acquaint potential users with Tordon's merits as well as possible hazards. He also points out that there is no cost-share program available in Lancaster County. The program is voluntary.

"I hope that distributors (of Tordon 10-K) would be very careful to whom they sell," Smith warned. He's hopeful that a program can be worked out whereby a potential user will have to show proof of training before he may purchase the herbicide. Smith's reason for concern is due to the fact that Lancaster County and neighboring areas are markedly different from western Pennsylvania and West Virginia where the battle against multiflora rose first took root. This is not primarily grazing land for sheep and cattle. With much cropland in this area, some dangers of contamination exist through either water run-off, irrigation, and manure transfer.

Tordon 10-K is soluble in water which is both good and bad. It's beneficial if a gentle rain follows to wash the chemical into treated soil. It's harmful if a downpour comes along and carries the pellets into nearby streams and ponds. It was therefore repeatedly stated that applicators should be extremely cautious and that the chemical should be kept a half-mile away from ponds and streams. Tordon is

## Downpour dampens rodeo audience

COWTOWN, N.J. — The audience streamed from the open stands until only a few stalwart fans remained, at the Cowtown Rodeo last Saturday night. What appeared to be just a summer shower, turned into a downpour. The undaunted cowboys were left to compete before virtually empty bleachers and in a sea of mud!

Rodeo Clown Jimmie Lee Walker of Cowtown, won the Bare Back riding with a mark of 62 for \$166.60.

The cornerstone of all rodeo events, the Saddle Bronc riding was won by Grant Harris also of Cowtown. Grant, a weekly competitor in the Saddle Bronc event, won \$88.20 with a mark of 75.

Eastern Seaboard Section champion calf roper, Bud Bramwell of Stamford, Conn. roped and tied his calf in 12.8 seconds for \$248.92.

Harry Gerhardt of Blackwood, N.J. was top money winner of the evening. In spite of the wet horns of the 600 pound steer, and the slippery arena floor, Harry threw his steer in 5.3 seconds for \$307.72.

None of the girls were able

to finish the clover leaf barrel race in less than 18 seconds. Dale Bibbo of Spring Valley, N.Y. came in first in 18.33 seconds for \$714.44. Weekly winner Lorraine Alexander came in with fourth place.

T. J. Hawkins rode into first place on a wild Brahma Bull No. 403. T. J. comes from Reedsville, W. Va. and made \$260.68 for a mark of 67.

Kaye Kirby who has been a consistent winner in all the riding events, did not compete last week because of injured ribs.

The total purse for the evening was \$3,116.40 with 103 cowboys and cowgirls competing.

### Iron Gate Dam

The Iron Gate Dam, built jointly by Romania and Yugoslavia, produces more power than any other hydroelectric installation in Europe outside the Soviet Union

Each rat costs you  
**\$20**  
or more every year.

Stop 'em dead with  
**BLUE DEATH™**

Each rat on your farm can cost \$20 or more by eating grain, destroying property and spreading disease. Multiply that cost by the number of rats on your place and you have a pretty good reason for buying new BLUE DEATH — the super-deadly rat bait from Master Mix®. Rats love BLUE DEATH's tasty pellets and blue color. But it's the last thing they ever eat. Lab tests show that just 2 ounces each can kill 95% of your rats within a week. At twenty bucks a rat, you can't afford to be without the best rat protection you can buy — BLUE DEATH from Master Mix.

## Control requires caution

[Continued from Page 18]

reportedly very difficult to get out of water. In the soil it degrades and disappears - with the soil being ready again for field crops after three years. The product is not harmful to grasses, although brome species have shown some sensitivity if high rates of application are used. It's recommended that treated areas not be re-seeded for two years.

Tordon 10-K should not be used around any vegetable plants, and grass from treated pastures should not be used for hay. "It won't hurt anything," said Baldwin, "but the Tordon will go through the cow and then the manure becomes a problem." It's also recommended that treated soils not be moved to other areas.

Tordon's mode of action is not completely understood, but it has something to do with the product's interference in the cell division process. It's use in Pennsylvania and accompanying restrictions were approved by the Pennsylvania Department of Agriculture.

## Good qualities defended

[Continued from Page 1]

Acknowledging that the multiflora rose bush has developed to be a problem in some areas, the Commission spokesman defended their side of the issue by explaining that the problem is primarily arising only on those farms which had previously been relatively idle. Land is now being brought into production which was previously in the land bank, the Harrisburg official commented.

Addressing himself specifically to the problem encountered in grazing areas, the spokesman pointed out that grazing was curtailed in some of those areas for a number of years and wild forms of vegetation naturally sprung up in that time. Now farmers are wanting to put sheep and cattle back on the fields and they aren't quite like they used to be.

"We are not opposed to the control of multiflora rose in any way shape or form," the official declared, adding however, that his division would oppose an eradication program.

The Game Commission is reportedly curtailing production of the multiflora rose, and may even stop distribution to certain areas entirely, but it stands firm on its belief that it is a beneficial wildlife plant. Birds make use of the plant for both food and shelter, for example, and the bush also helps to hold soil in place. It was also pointed out that the plant for many years was distributed by both the SCS and ASCS offices for land management purposes and farmers were even paid to do so. Its beneficial qualities have been widely recognized. The Commission claims that it is the re-introduction of idle land into some form of managed agriculture that is causing the problem now.

The Game Commission is not the only source of the hardy rose bush. Flower shops regularly use the plant for grafting, and nearly all ornamental roses can be linked to them. It is therefore considered to be both unwise and impractical to bring about an eradication program.

The Game Commission is continuing to make the plant available to those who want it because of their belief in its desirable merits. Even so, delivery to southern tier counties may be stopped within the next few months. Continued planting of the shrub in northern areas is not expected to be a real problem even though birds will carry the seeds.

While defensive of their actions and convictions, the Game Commission people also let it be known that they will cooperate in meeting the wishes in certain areas.

## Fruit fair begins July 28

**NORTH EAST** - The 1976 Great Lakes Fruit Progress Days, one of the largest outdoor fruit industry shows in the East, is just around the corner with activities scheduled for July 28-29 here in Erie County, according to William Klantz, general chairman of the event.

The biennial show is sponsored by the Erie County Horticultural Society

in cooperation with the Pennsylvania State University. It takes place at the corner of Route 5 and Cemetery Road on the property of Penn State's Agricultural Experiment Station.

The two-day show, open from 9 a.m. to 9 p.m. each day, will be bigger and better than ever in 1976. It will attract fruit growers

from Pennsylvania, New York, Ohio, Michigan and Ontario, Canada.

Many events have been scheduled for the show. Some 100 exhibitors from all over the East will be on hand displaying products vital to fruit production. Everything from "A" to "Z" will be displayed ranging in size from small hand tools to giant mechanical har-

vesters. Equipment demonstrations will be held both days of the shows. A night spraying demonstration using fluorescent dyes will be held on the 28th.

Other events include tours of wineries, Welch, Keystone, grape vineyards and orchards. In addition, wagon tours of research plots at the Agricultural Experimental Station will be available. The tours will be conducted at various times both days.

America's Bicentennial will not be ignored at Fruit Progress Days. A special feature of the show will be an exhibit of antique machinery and equipment used in fruit farming. Other exhibits will feature a variety of topics in home economics and suburban farm operation.

A good old fashioned chicken barbeque will be held in the evening of the 28th. Serving begins at 5 p.m. and ends at 6:30 p.m. Also, the food tent is being operated from 10 a.m. to 5 p.m. each day during the show.

Persons in the market for a used piece of farm equipment should remember and attend the used equip-

ment auction to be held in the afternoon of the 29th beginning at 2 p.m.

For the daring persons in attendance, watch for the Massey-Ferguson hot air balloon, which will be on hand offering rides to the top of a tether and back. Offering an even more spec-

tacular view of the show and adding to the excitement will be a crop spraying helicopter.

All displays and tours are free. Admission is free.

For further information contact the Erie County Horticultural Society, P.O. Box 204, North East, Pa.

## Food prices dip slightly

**HARRISBURG** - Retail food prices in Pennsylvania dipped slightly in June, following two months of sharply rising prices, according to the monthly supermarket survey report released Tuesday by the Pennsylvania Department of Agriculture.

The average retail cost of 15 "shopping bag" items sampled throughout the Commonwealth in June was \$9.54, a drop of four cents from the \$9.58 average recorded for May. Prices had risen an average of 44 cents from March to May.

The study, prepared by the Department's Bureau of Rural Affairs, showed that the average retail price for June was highest in the northeastern part of the state at \$10.06. The lowest recorded average of \$9.13 was in the southeast central region that includes the

Harrisburg, York, Lancaster area.

Items decreasing in price were, potatoes, from 27 to 17 cents a pound; canned corn, from 35 to 34 cents a pound; shortening, from 58 to 51 cents a pound; bread, from 39 to 38 cents a pound loaf; and a dozen large eggs, 82 to 78 cents.

Items increasing in price were, canned peaches, 33 to 34 cents a pound; fresh pears, 47 to 49 cents a pound; coffee, \$1.61 to \$1.67 a pound; cornflakes, 56 to 57 cents a pound; ground beef, 98 cents to \$1 a pound; American cheese, \$1.53 to \$1.55 a pound; and a four roll package of toilet paper, 78 to 79 cents.

Cabbage, sugar and chicken remained about the same in price.

Shoppers in urban stores enjoyed a five percent savings over the cost of the same shopping bag in rural

stores. This price spread percentage has prevailed in previous months. The average price statewide in urban stores in June was \$9.34 compared with \$9.87 in rural stores.

A comparison in prices between storebrand and namebrand items was made with nine of the 15 shopping bag items. Storebrand items averaged a nine percent savings in June with an average cost of \$6.06 compared with \$6.65 for namebrand items. The same percentage spread existed the previous two months.

### BRAVO for potatoes

Controls all three fungus diseases!

**Bravo 6F fungicide** can help you grow bigger yields. It's the only fungicide that controls the three major potato diseases—early blight, late blight of foliar and tuber and Botrytis vine rot. Spray Bravo fungicide right from the start. And spray it regularly. You'll like the convenient flowable form. Ask us for Bravo. We're your local Diamond Shamrock supplier.

## Feeder pigs accepted at Vintage Sales Stables

VINTAGE — Just 24 hours after the Pennsylvania Department of Agriculture granted the Vintage Sales Stables permission to sell feeder pigs, the management had such a sale lined up which is giving them reason to look forward to a new venture with optimism. Permission was granted on July 1. The first sale on the following day brought in 213 head of feeder pigs.

Primary stockholder of the

sale barn, Robert Frame, is enthused about results so far and is expecting as many as 1000 feeder pigs for his second sale next Friday. Frame and his wife, both Chester Countians, became part-owners and major stockholders of the Vintage Sales Stables this past Spring. The idea of holding feeder pig sales is one of several new programs which came about as a result of new management. The sales

will be held the first and third Friday of each month.

The new head of Vintage Sales Stables claimed that volume at the facilities, located east of Lancaster along Route 30, has increased dramatically ever since his family took over. He described his first feeder pig sale as "excellent," and quoted prices as high as \$105 per hundredweight. While citing the increase in sales in all categories, Frame pointed with special pride to the results of the feeder pig sale and also the fact that a new milestone was set just this week in fat steer numbers.

More than 1050 head of fat steers were sold at the July 6 sale, Frame commented. "We have never sold that many (1053) in any one day before." In all, a total of 1850 head of cattle reportedly went through the sales facilities, which were remodeled and added on to in 1971.

Permission to sell feeder pigs here was granted after the sales stables complied with rules and regulations set forth by the Agriculture Department in Harrisburg. That included a complete cleaning and disinfecting of the old sale barn. The building had been — and continues to be — used for the grading of calves as well as feeder pigs, although no market hogs are allowed

Erecting this eye catcher along Route 30 to help let people know where to turn in to get to the Vintage Sales Barn, was the idea of Elaine Frame, wife of Robert Frame, above. The couple took control of the sales stables on March 10 of this year and

the statue is one of several improvements the pair has brought about. Frame, who is shown admiring the eye catcher, says that a sign and lighting will be added in the near future.

## Agriculture on parade

MARTINSBURG — A parade featuring all kinds of farm equipment and tools from 100 years ago to the present will take place this coming Friday, July 16, to help commemorate the nation's Bicentennial. Officially proclaimed to illustrate "The Evolution of Agriculture," the parade will take place in this Blair County town, beginning promptly at 6 p.m.

More than 100 units of antique farm implements will be on hand and displays will feature, consecutively, the earliest forms of tools on up to present technologies. "Each segment of the parade will be concluded with implements representing modern methods," says Russell Steele, Blair County farmer and chairman of the parade.

After winding its way through town along a route which is approximately 1 1/4 miles long, the procession of farm machinery and tools will be on display at the

Martinsburg Memorial Park. There, on the following day, the machines will be put to use and are expected to attract a sizable audience. The entire event will be recorded on 16 mm color movie film, complete with a sound track.

The "Evolution of Agriculture" was a year in the making and is being sponsored by the Morrisons Cove Chapter of Pennsylvania Young Farmers. Steele serves as president of the chapter. Working with him on the parade as co-chairman is Harry Brubaker of Roaring Spring.

Steele notes that the film being made of the procession and later use of the equipment will be made available to other groups upon completion. The Young Farmers decided to "go the full route" in their recording of the event since "it is unlikely that such a gathering of equipment could be staged again. The group believes it is the biggest such event ever to take place in the area."

## Lancaster Co. 4-H'ers in Regional 4-H Day

LANCASTER — Twenty-seven Lancaster County 4-H'ers took part in Regional 4-H Day at Dillsburg, York County, on July 8. The eight-county event is held in preparation for August State 4-H Days. The categories the 4-H'ers participated in were demonstrations, public speaking, horse bowl, milk bowl, physical fitness, and clothing judging.

The 4-H'ers who will be attending State 4-H Days as a result of this competition are senior demonstrators Susan Martin, Ephrata, and Martha Gregory, Lititz.

The blue ribbon winner in the junior demonstration competition was Rosemary Nissley, Mt. Joy.

Lancaster County horse bowl and junior milk bowl teams placed first in their categories.

Senior demonstrators were Wanda Yoder, Gordonville; Susan Martin, Ephrata; Carole Ebersole, Lititz; Martha Gregory, Lititz; Jane Gregory, Lititz; and Karen Miller, Peach Bottom.

Junior demonstrators were Cindy Risser, Leola, and Rosemary Nissley, Mt. Joy.

Phil Risser, Leola, took part in the public speaking contest.

Those in the Horse Bowl were Lashon Bussell, Manheim; Heidi Bailey, Quarryville; Jenny Weber, Millersville; and Judi Anderson, Lancaster.

Senior Milk Bowl participants were Linda Kauffman, Elizabethtown; Jane McSparren, Peach Bottom; Rick Mellinger; Strasburg; and Warren Schmuck, Peach Bottom.

Junior Milk Bowl participants were Connie Balmer, Lititz; Mary Witmer, Willow Street; Jane Stoltzfus, Gap; and Karen Schmuck, Peach Bottom.

Lancaster Countians in the physical fitness competition were Henry Gibson, Lois Jones, and Rosezella Thomas, all of Lancaster.

Those in clothing judging were Gayle Kline, Mountville; June Grube, Manheim; and Nancy Mays, Lancaster.

## Young Grangers atcamp

HARRISBURG — The June 15, 1976 Index of Prices Received by Pennsylvania farmers remained unchanged from the previous month, but 10 percent above a year earlier, according to the Crop Reporting Service.

Higher prices for milk cows, small grains, apples and hogs were offset by lower prices for hay, meat animals and milk. The purchasing power of prices received was one percentage point below May but three

percentage points above a year ago.

Nationally, the Index of Prices Received increased two percent from May and was five percent above a year ago. Contributing most to the increase since mid-May were higher prices for soybeans, corn and hogs. Lower prices for cattle, apples and hay were partially offsetting. The purchasing power at the U.S. level was one percentage point above mid-May but two percentage points below a year ago.

## U.S. has 111 million more tillable acres

WASHINGTON — The United States has 111 million acres of land not now in crops that could be converted to cropland if needed, according to a new study by the Soil Conservation Service, U. S. Department of Agriculture.

The acreage, which has either a "high" or "medium" potential for conversion to crops, is

roughly equivalent to the total U.S. acreage planted in corn, oats, and sorghum last year. Total acres planted in all crops last year totaled 400 million.

The "potential cropland study" was conducted by SCS field people at 41,000 sites in 506 counties selected on a random basis. Sites were located in all 50 states,

Puerto Rico, and the Virgin Islands, and were limited to non-federal land. The study was begun in May 1975 by the agency in response to a mounting volume of requests for current estimates of available cropland.

The study identifies three different acreages of potential cropland that could be switched to crops with varying degrees of difficulty and expense.

First, 24 million acres of "prime farmland" could be converted simply by beginning tillage. These soils would require little or no protection from erosion and, with normal rainfall, should produce high yields.

Second, the study identifies an additional 54 million acres of "high potential" land that would require some soil and water management to prevent erosion and sedimentation or to dispose of unwanted water.

Finally, there is another 33

million acres with "medium potential" for conversion to crops. These acres pose more serious erosion hazards and water disposal problems and would cost more to convert. Nevertheless, soil conservationists see no reason why, with application of current technology, these acres could not be used for crops if the need arises.

SCS questions whether acreages beyond this 111-million-acre total could be brought into cropland safely. The conservation agency's estimate of convertible land is considerably lower than previous estimates, which have run as high as 266 million acres.

The agency also found that about two million acres of farmland are being "irreversibly" lost each year to urban buildup, with an additional one million acres going under water in ponds, lakes, and reservoir

# Follow safe method to can and freeze

**Editor's Note:** This article and several others like it to be printed in the upcoming summer months stem out of concern by the Cooperative Extension Service of Penn State University and the U.S. Department of Agriculture that people use researched methods to insure preserved foods which will be safe for the family.

These organizations point out that many homemakers are still using methods no longer recognized as safe, and these methods are passed on to novice canners who don't know where to find reliable information.

If you will be canning vegetables for your family you want to be sure to use the most up-to-date methods and time tables. Botulism can result from improperly canned low acid vegetables.

75 Low acid vegetables include all vegetables except tomatoes, pickles and pickled beets. A pressure canner is the only safe method of canning these low acid vegetables.

This article contains general canning and freezing instructions for most vegetables. As each vegetable comes in season we will give specific instructions as to preparation and processing times, but keep these general instructions on using a pressure canner and getting vegetables ready to freeze.

## Canning Vegetables in the Pressure Canner

1. Prepare canning jars by washing in hot, sudsy water and rinsing well. This may be done by hand or in a dishwasher.
2. Prepare lids, following the manufacturers instructions. The two-piece metal lid is recommended.
3. Get pressure canner ready by putting rack and about two inches of water in the bottom. Put canner on heat.
4. Set the filled jars on the rack in the canner. They should not touch the sides of the canner or each other.
5. Put cover on canner as directed.
6. Leave the air vent or petcock open. Heat until steam comes out of petcock. Allow steam to escape for 10 minutes. Steam will be nearly invisible one or two inches from the petcock when all the air is out. On a pressure canner with a weighted gauge, allow steam to escape 10 minutes before putting the gauge in place.
7. Close the petcock or put in the weighted gauge and allow pressure to go up to the desired point. Start counting processing time when desired pressure is reached. The weighted gauge should jiggle two or three times a minute to make sure enough heat is used to keep the desired pressure. If the pressure varies significantly liquid may be drawn from the jars.
8. When processing time is up, remove the canner from the heat, but do not open. Let the pressure return to zero. It will take about half an hour depending on the size of the canner. Then wait two or more minutes and then slowly open the air vent or petcock to let any remaining steam escape. Unfasten the lid and remove carefully, lifting it away from you so steam doesn't hit your face.

9. Remove jars from canner. Place right side up on towel or rack with space between the jars. Do not sit in a draft.

10. After 24 hours test for seals. It is sealed if the center of the lid is depressed; or when pushed down, the center of the lid stays down. Remove the screw band and store in a cool, clean, dark, dry place.

## Freezing Vegetables

Freezing retains a more fresh-like taste than canning. Quality frozen vegetables will keep their quality about 8-10 months if the freezer is at 0 F.

Blanching is necessary for vegetables. It destroys the enzymes that make a vegetable ripen and eventually over-ripen. If this maturing process is not stopped by blanching, the enzymes continue to make that vegetable more mature and over-ripen and the

product is tasteless or starchy.

The temperature of the freezer does not stop the action of the enzyme. If you are tempted to freeze a vegetable without blanching it, do a test package first to determine if you like the product.

Remember the test package must be stored frozen as long as you would normally store the food frozen before using it. This is important because if a vegetable is frozen without blanching and kept frozen only a short period of time (one month) the changes produced by the enzymes are not great. However, with longer storage, changes become more and more apparent as the enzymes are still working.

Follow these steps when freezing vegetables.

1. Select a good quality vegetable recommended for

freezing. Vegetables are best if picked while the morning dew is still on them.

2. Wash in cold water until water is free of grit. Prepare vegetables for freezing.

3. Blanch the vegetables to slow or stop the action of enzymes. Use a recommended time table for blanching:

**TO BLANCH.** You will need a large kettle with a cover or blancher and a cheese cloth bag, wire basket or blanching basket. For each pound of prepared vegetable use at least one gallon of boiling water in the kettle. Put vegetables in blanching basket and lower into the boiling water. Lift the basket up and down to agitate the product so it is evenly heated. Put lid on kettle or blancher and start counting time immediately. If it takes more than one minute for the water to return to boiling you are

blanching too many vegetables at one time.

4. Chill vegetables in ice water. Drain.

5. Package dry in suitable freezing containers. The most practical packaging materials for vegetables are plastic bags or special bags made of different wrapping materials. Single thickness bags require an outside cover, usually a cardboard box, to give them a uniform shape and to prevent tearing. Leave ½ to one inch headspace for solid packs.

6. Label and freeze at once.

## Green Beans

Green beans are one vegetable almost every one grows if they have a garden. They are usually in abundant supply, so if you don't grow your own you can usually get some to preserve for winter use.

If you can green beans, a pressure canner is a must. They are a low acid

vegetable and there is a danger of botulism poisoning if they are processed by any methods other than in the pressure canner.

Select a variety of green beans that is recommended for canning or freezing. About the best bean for canning is the Bush Blue Lake (a white seeded variety). Tenderette (white seeded) and Tendercrop (dark seeded) variety bush green beans also are good for canning and are the best choices for freezing. Other varieties good for freezing are Blue Lake 274, Romano 14, Provider, Sinclair, Butterwax, Eastern Butterwax, Kinghorn wax. Harvest the beans in the morning and preserve the same day. For best quality the pods should be tender and snap readily.

## Canning Beans

Green beans may be raw packed or hot packed, but generally the hot pack method is preferred. Wash beans, trim ends and cut into one-inch pieces.

**Hot Pack:** Cover with boiling water and boil for 5 minutes. Pack in jars loosely to ½" of top. Add 1 teaspoon of canning salt per quart. Add boiling hot cooking liquid to ½" of top. Remove air with spatula and add more liquid if necessary. Clean tops of jars and adjust lids according to manufacturers instructions.

Process in pressure canner at 10 pounds pressure: Pints 20 minutes, quarts 25 minutes.

**Raw Pack:** Pack raw beans in jars, tightly to ½" of top. Add 1 teaspoon of canning salt per quart. Add boiling water to ½" of top. Remove air. Add more liquid if necessary. Adjust lids and process in pressure canner at 10 pounds of pressure. Process pints 20 minutes and quarts 25 minutes.

Sometimes when vegetables are raw packed or packed too tightly, liquid will cook out of the jars during processing. If this happens to you, but the jars still seal, just label and store. They are safe to use.

## Freezing Green Beans

Select tender beans. Do not freeze mature ones. Wash and snap ends. Cut in one-inch lengths or French style. Heat in boiling water for 3 minutes. Cool quickly and drain. Pack in freezer containers, leaving ½ to 1 inch headspace. Seal and label.

If you have lots of green beans try these Dilly Beans to add a zesty touch to future meals:

## Dilly Beans

- 2 pounds green beans, trimmed  
1 teaspoon cayenne pepper  
4 cloves garlic  
4 heads dill  
2 ½ cups water  
2 ½ cups vinegar  
¼ c. canning salt

Pack beans lengthwise in hot jars leaving ¼ inch headspace. To each pint add ¼ teaspoon cayenne pepper, 1 clove garlic and 1 head dill. Combine remaining ingredients and bring to boiling. Pour boiling hot over beans, leaving ¼ inch headspace. Adjust lids. Process for 10 minutes in boiling water bath.

NOTE: Let stand at least two weeks before tasting to allow flavors to develop.

# Farmers gambling \$105,768,120

ANNAPOLIS, Md. - Maryland farmers this year are gambling a \$105,768,120 on corn and soybeans. In many of the prime corn and bean counties the hot dry weather has them worrying already.

That's the hidden factor in the latest harvest and planting intentions report issued by the Crop Reporting Service, a cooperating agency of the Maryland Department of Agriculture, which said farmers hope to harvest a record high 650,000 acres of corn for grain this year and their 4th largest acreage of soybeans, some 266,000 acres.

The corn acreage figure is astounding in that it is up by an even 100,000 acres harvested for grain last year. The 1975 crop, just over 50,000,000 bushels, was a record. Soybean plantings

are down 16 percent from the 1975 figure of 318,000.

The \$105 million gamble figure, a very real concern due to dry weather over most of the Eastern Shore and Southern Maryland, was cited by Maryland Secretary of Agriculture, Young D. Hance, who made the calculations using the latest average production cost per acre estimates made by USDA last month.

Hance said, "The national average production cost for corn is set for 1976 at \$134.25 per acre and the figure for soybeans is \$69.57. Thus, Maryland farmers plan to invest \$87,262,500 in their corn crop and \$18,505,620 in their soybean crops. As a farmer myself I can appreciate the risk at stake and I hope that non-farmers in the State would take a moment to reflect on it also.

We should all join together in a prayer for favorable weather.

"The cost per acre production figures do not, and I repeat do not, include land and management costs. Like anyone else, farmers have to pay off mortgages or rental fees, so in reality, the gamble is many millions of dollars more this year," Hance said.

Other highlights of the June harvest intentions report show that the state's winter wheat acreage at 132,000 down 15 percent from 1975; barley acreage for 1976 at 94,000 down 6 percent; oats acreage up 4 percent to 25,000; rye acreage steady at 11,000 and tobacco steady at 23,000 acres. Success is spelled w-e-a-t-h-e-r.

Hance noted that Maryland farmers with an 18 percent increase in corn for

grain acreage are running ahead of the national increase for corn acreage of 8 percent, while their soybean intentions of a 16 percent cutback are more than the national soybean decline of 10 percent.

"The corn increase reflects the economic fact that even with a bumper crop last year, corn prices for farmers have held reasonably firm, thanks to heavier demands. Beans have fluctuated widely, hurt by palm oil imports and export restrictions in 1975. However, now that beans over the past several months have recovered some price strength, Maryland farmers responded by planting at least 6,000 more acres of them than they had planned to do in April when the last survey was made," Hance concluded.

# Norlebo Young Farmers meet

The Northern Lebanon Young Farmers meeting for June was held on the Galen Bollinger dairy farm, Fredericksburg, R1, with 120 members and guests attending. Bollinger showed his milking and feeding systems while representatives from the Surge Equipment Company presented slides and discussed proper use of milking equipment,

mastitis prevention and control and proper clean-up techniques. Above left are hosts for the meeting G. Lamar Bollinger, vo-ag teacher; Mr. and Mrs. Galen Bollinger and daughter Brenda. Karl Miller, eastern regional fieldman and Penrose Hostetter from Surge Equipment Company and LeRoy Geesaman, Young Farmer president.

## Hue cured tobacco rates announced

WASHINGTON, D.C. - The U.S. Department of Agriculture recently announced (USDA) rates by grades which producers will receive for 1976 crop flue-cured tobacco delivered for support. These rates range from 71 cents to \$1.35 a pound and are the same for tied and untied tobacco.

The rates reflect an average support of \$1.06 a pound, about 13.7 per cent above 1975, as announced May 21. Increases over 1975 grade rates range from 5-19 cents per pound.

As in past years, growers will offer their tobacco at auction warehouses. Advances will be made available through the Flue-Cured Tobacco Cooperative Stabilization Corporation to farmers who designate the warehouses at which their tobacco will be offered, and certify that they have not used pesticides containing DDT, TDE, toxaphene or

endrin on their tobacco; advances are available on marketings not in excess of 110 per cent of farmers' poundage quotas. Marketings over the farm poundage quota will be subtracted from next year's quota.

As in the past, no advances will be offered on any tobacco graded N2 (second quality nondescript), No-G (no grade), U (unsound), W (doubtful keeping order), or scrap. Marketings of these grades, however, will be charged against the quotas for the farms upon which they were produced.

Additional copies of the rate schedule may be obtained from the Tobacco and Peanut Division, Room 5750-S, Agricultural Stabilization and Conservation Service, USDA, Washington, D.C. 20250.

Flue-cured tobacco is grown in Alabama, Florida, Georgia, North Carolina, South Carolina and Virginia.

## Price index up 10 pct.

HARRISBURG — A workshop dealing with problems of deaf persons will be featured at the annual youth camp of the Pennsylvania State Grange to be held July 16, 17 and 18 at Camp Kanesatake near Spruce Creek, Huntingdon County.

Approximately 150 young people are expected to attend, according to Douglas Bonsall, State Grange youth director.

The workshop on deaf problems will be conducted by Wade Cadle, Jr., of Knoxville, Tenn., a youth representative of the National Grange. The program also will feature educational and entertaining workshops including Grange activities and ritual, public speaking, and whittling.

Highlight of the three-day camp will be the selection and coronation of a State Grange prince and princess for the 1976-77 year. They will succeed Fred Rudy, of

Sewickley R4, and Barbara Harrison, of West Chester. The coronation festivities will be held at 8 p.m. Saturday, July 17, and are open to the public, Bonsall said.

The annual junior camp of the State Grange also will be held at Camp Kanesatake from July 18 through July 24. Approximately 225 campers and staff members are expected to attend, according to Mrs. Alan Merkel, chairman of the State Grange's junior committee.

Among the visitors will be Paul Rabe, junior director of the New Jersey State Grange, and several members of his committee.

A junior Grange prince and princess will be selected to succeed James L. Snyder, of Camp Hill, and Stephanie Merkel, of Kutztown R3.

Workshops at the junior camp will deal with dramatics, square dancing, religion, Grange ritual, crafts, music and nature.

## Grange adds parade

DOYLESTOWN - Parade plans have been added to the annual Keystone Grange Fair, to be held Saturday, July 31. Several community groups are participating with the Grange in promoting this bicentennial parade.

The theme will be carried through on floats entered by community organizations, equestrian units, and others. Many antique and classic automobiles will highlight the parade and will be on exhibit with the floats, at the fair. The Perkiomen Valley High School Band will perform and there will be a special children's section of decorated bikes or wagons. William R. Staler of Skip-

Perk Jaycees is coordinating parade entries. Parade starts at 10:00 a.m., travels through parts of Collegeville and Trappe, ending at the fair grounds, Municipal Waterworks Park, West First Avenue, Trappe. The fair grounds open at 11:00 a.m. and remain open until dusk.

This fourth annual country fair, under the direction of chairman Albert Zvarick, Trappe, will again feature antique farm machinery exhibits and demonstrations, steam engines, antique and classic autos, old-time farm and home crafts, animal exhibits, garden show (open to the public), and a country-western music program.

## Benefit auction

Locust Grove Mennonite School will sponsor a benefit Country Auction and Chicken Bar-B-Q on July 17 at the Locust Grove Mennonite School located on Route 340, four miles east of Lancaster.

# 'Spirited speaking session' set

SPRINGFIELD, Mass. — In what may be its most spirited speaking session in recent years, the seminar program for the Northeastern Poultry Exposition was announced recently.

Some of the poultry industry's liveliest personalities will be on the rostrum when producers and others from 14 states and Canada converge for the first time in a New England setting for the all-new exposition and convention sponsored by the Northeastern Poultry Producers Council (NEPPCO) and the Northeast Egg Marketing Association (NEMA).

The get-together is scheduled for Aug. 24 through 26 at the new \$10 million Civic Center complex here.

Herbert B. Gabriel, for decades one of the most powerful and respected retail egg department heads in the nation - at the A & P Stores - will exhort industry men on the techniques of upgarding the sales performance and visibility of eggs at the retail level. Gabriel believes eggmen have been taking a back seat to milk and other product merchandising for too many years and wants to explore the reason at the session.

Half a dozen other well-known poultry industry leaders will lay the cards on the table during two full mornings of seminars, following the lead of keynote speaker Allan Grant, newly-elected president of the American Farm Bureau Federation, himself an outspoken critic of bureaucratic red-tape and advocate of free use of technology by farmers.

Among the more thought-provoking topics will be that of Joe Claybaugh, DeKalb AgResearch management consultant, who will tell producers how to "Make the most with what you have," a

challenge he has issued to groups all over the world. Claybaugh will outline ways in which the tools at hand can solve some pretty complex problems in the area of energy and feed conservation, waste recovery and personnel development.

Built around a "Thrust Beyond the Threshold" theme, the speaking program concentrates on management improvements and innovations, promotional ideals, feedgrain outlook, hedging as a tool, marketing techniques and brand name merchandising.

Emphasis will be strong on career opportunities for the upcoming generation and on the important role of the poultry farm family in the years ahead in a show location which invites an enjoyable vacationweek here in the heart of old Colonial New England with its concentration of Bicentennial activities.

The convenience of a once-in-a-lifetime chance to take advantage of the multitude of Bicentennial activities in the historic New England area is expected to build attendance.

The educational sessions, the exhibit-visiting and the downtown historic tours will be supplemented by a number of special activities at the exposition, including a NEPPCO - NEMA "Spirit of '76" breakfast on Wednesday morning and a big, concluding "Picnic on the Patio," an authentic New England clambake and entertainment on the Marriott rooftop overlooking downtown Springfield. The latter takes place on the evening of Thursday, Aug. 26.

Early registration of those attending the event has been recommended by Richard I. Ammon, general chairman, because of the heightened interest in the program and the vacation aspects of the area. Show registration and full details are available at the NEPPCO office, 322 Oxford Valley Road, Fairless Hills, Pa. 19030, or by calling 215-547-0190.

## Tobacco boundaries proposed

WASHINGTON - New tobacco warehouse facilities would have to be located within three miles of the town or population center that is designated as a tobacco auction market under a proposal announced recently by the U.S. Department of Agriculture.

With improved road conditions and less costly land located beyond city or town limits, many warehouse operators have been moving their warehouses further from designated market centers. Officials of USDA's Agricultural Marketing Service (AMS) said that if this trend of unrestricted expansion continues, it will become increasingly difficult to determine which facilities are a part of a designated market.

The three-mile limit would be based on boundaries of a city or town as of Jan. 1, 1976. Warehouses in existence during the 1976 season would be allowed to continue to operate at their present location. However, a warehouse operator who wished to establish a new warehouse beyond the geographic limits would have to petition the Secretary of Agriculture for a waiver of this restriction.

The proposed amendment appeared in the June 29

Federal Register. Copies of the proposal are available from Tobacco Division, AMS, Room 502-Annex Building, U.S.D.A., Washington, D.C. 20250.

Written comments on the

proposal will be accepted until July 29. Comments should be sent in duplicate to the Hearing Clerk, Room 112-A, USDA, Washington, D.C. 20250, where they will be available for public inspection.

## New arena, events at county fair

FAIR HILL, Md. — A jousting exhibition will inaugurate the use of the new dirt arena at Cecil County Fair. The event is scheduled for August 4 at 3:00 p.m.

Jousting is the Maryland state sport and has been a combat sport for about a thousand years. Today's jousting is much less dangerous than before, but still as exciting. In Maryland, jousts spear rings to win points.

Following the jousting will be another new event - horse pulling. Pullers have been invited from Pennsylvania, Virginia, and Maryland. Horse pulling was once a popular sport in the area, but hasn't been practiced here for many years. The horse pull begins at 6:00 p.m. on Wednesday, August 4.

On Friday, August 6 at 7:00 p.m. a Western Show will be

coordinated by the local Quarter Horse Association. The contest is open to all competitors and will consist of speed events; keyhole race, pole bending, pickup race, and barrel race. There will be three divisions for each class - pony, junior and senior over 16.

With the inclusion of these new events, there should be something to satisfy every horse fancier's taste.

### All Three

When Conrad's mother-in-law passed away, he called his undertaker friend to find out whether she should be embalmed, cremated or buried.

Being the close friend that he is, John replied "Don't take any chances, we'll do all three."

A cow-milking contest kicked off the Annual Convention of the Holstein-Friesian Association of America, at the Philadelphia Sheraton Hotel, 1725 John F. Kennedy Boulevard, Philadelphia. Lehigh Valley Cooperative Farmers trucked in free milk for distribution to the farmers and Philadelphians who watched the contest. Some 2000 dairy farmers attended the convention which culminated in the National Convention Sale held at the Guernsey Sales Pavilion last week.

## 1000 NEW JERSEY, WISCONSIN and CANADIAN DAIRY COWS

LARGEST SELECTION OF TOP NEW JERSEY, WISCONSIN AND CANADIAN COWS AND HEIFERS IN THE COUNTRY BOTH REGISTERED AND GRADES

Both close springers and fresh cows are available as you want them. I will help you improve your herd to higher production and butterfat DHIA Records. I am interested in building up a good reputation with the dairy farmers of your community

I follow the breeding of the good herds in New Jersey, Wisconsin, and Canada and know the cows and heifers that do well. To get the top notch cattle in New Jersey, Wisconsin and Canada, I have learned to buy the cattle they do not want to sell. I do not buy any cattle that are for sale. As I am in business alone, I can afford to sell at a more reasonable price. Price — \$25.00 less per head than the going price of top Cows. I try to price cows at what the dairyman can afford.

### YOU ARE CALLING THE RIGHT MAN WHEN YOU CALL ME

If it is your desire, you can come and look at the cows in New Jersey, or if you cannot come, I will send them direct to you. If you prefer, I will also come to your farm and work out the deal. Several dairymen have called me by phone and asked for good cows. They said they did not have time to drive to my place. We arranged by phone that I would select the cows and send them direct to them. We have never met personally, other than our conversation by phone and I have made satisfied customers in this manner. We are a firm that does honest business.

Call me by Phone and Reverse Charges or Write Me and Give your Phone Number

CASH OR CREDIT CAN BE ARRANGED WITH A DOWN PAYMENT.

The cows that I have brought into your state have made me many friends among the dairymen. Call me and I will do the same for you.

FREE DELIVERY WITH SMALL TRUCK OR TRAILER

# Buy Your Im-Pruv-All Silage Compound NOW

## GET YOUR **IM-PRUV-ALL** SILAGE COMPOUNDS AT WHOLESALE PRICES

Become A Farmer Dealer For  
Information On Qualifications

**CALL 717-285-5422**

Between 8 A.M. and 5 P.M.

WHY  
**IM-PRUV-ALL**  
SILAGE ?  
...TDN  
per acre

Every acre of corn yields more  
Total Digestible Nutrients  
when fed as silage than when  
fed as yellow corn. Fewer  
acres feed more animals.

HEAD BEEF CATTLE PER 100  
ACRES WITH NO FERMENTA-  
TION CONTROL

HEAD BEEF CATTLE PER 100  
ACRES WITH **IM-PRUV-ALL**  
FERMENTATION PRODUCTS

Since controlling time and heat in the ensiling process can result  
in more TDN, it is no surprise that more cattle can be fed from the  
same crop acreage. Studies have shown that the same 100 acres  
which can feed 153 beef cattle with regular silage can feed 184  
beef cattle with silage to which our fermentation products have  
been added (based on in weight 450 lbs out weight 750 lbs)

WITH NO FERMENTATION CONTROL

WITH FERMENTATION CONTROL

Studies have shown that more dairy cows can be fed from the  
same acreage when our fermentation products are added to  
the silage. When regular silage from 100 acres feeds 62 dairy  
cows, fermentation controlled silage has been found to feed  
77.

CAN  
**IM-PRUV-ALL**  
SILAGE  
MAKE YOU  
MONEY ?

Since silage is superior to  
dry feeds in TDN per acre  
the farmer can expect higher  
dollar yields from his silage.  
The increased TDN in silage  
means the farmer can feed  
more cattle with the same  
crop. He can produce more  
beef, more milk and of  
course more dollars. But  
there are some dangers. Not  
all silage is the same. The  
farmer who wants to make  
sure that he makes more  
money with silage must  
make excellent silage. To  
insure consistent silage he  
NEEDS our fermentation  
formulas.

IT'S GOOD BUSINESS  
TO INSURE YOUR HOME,  
EQUIPMENT, LIFE, CROP,  
STOCK, ETC.

WHY NOT INSURE  
YOUR SATISFACTION ?

**IM-PRUV-ALL**

WHY **IM-PRUV-ALL** SILAGE ?  
...They've got six  
specific formulas !  
(wet or dry)

Fermentation is best achieved when specific  
formulas are used to ensile specific crops.  
Our silage products come in six specific  
formulas so that the farmer can select the  
fermentation product he needs for his par-  
ticular crop. We produce each of these  
formulas in dry or liquid form for added  
convenience.

WHY  
**IM-PRUV-ALL**  
SILAGE ?

- A. simple
- B. safe
- C. convenient

Some silage products are  
difficult and even  
dangerous to use. Our  
products are simple, safe  
and convenient. They are  
manufactured under multi-  
national patents. One  
pound of product is used  
with each ton of silage  
material. They may be  
added in a variety of ways  
from hand sprinkling to  
controlled metering.

WHY **IM-PRUV-ALL**  
SILAGE ?

Because of the large amount of Im-Pruv-All  
101 sold in this area, we can reduce the price to  
those of you who place your order and accept  
delivery before Aug. 15, 1976 on this large  
shipment.

# Doris Bushong shares talents

By SALLY BAIR  
Feature Writer

Doris Bushong thinks teaching high school students the intricacies of floriculture is a joy, and the perfect way to share the creative talents with which she was born.

For the past year, Mrs. Bushong, an East Petersburg resident, has held a unique position — she is the only teacher's aide in the vocational - technical schools. She works with Jim Kerr, the full-time teacher in the floriculture - horticulture class at Willow Street Vo-Tech School, and she is unable to hide her enthusiasm for the program.

She was hired because there were too many students for Kerr to have as one class, but not enough to justify a full-time teacher. But she took on almost all the responsibilities of the floriculture side of the department.

Her background is in the practical work experience of floriculture and not in teaching, but she has already begun taking the steps necessary to get certification for vo-tech teaching.

When Mrs. Bushong heard about the opening she applied because "I like kids. If I can be of any help to them I'm happy. Also I love to teach people the things I can do." She also liked the idea of having her summers free for her eleven-year-old son Andrew and her husband J. Donald.

Mrs. Bushong went on to say, "Many people are selfish with their skills, but I feel my skills are God-given and I am happy to share them."

She spent a lot of time sharing these skills even before she began teaching at Willow Street. For five years she worked in a florists' shop and for two years she worked for Stauffer's of Kissel Hill in their design room. She taught courses for them in sandpouring, Williamsburg bouquets, and pressed flowers.

In floriculture she teaches the "basics of design and color harmony."

"We prepare them for working in greenhouses or having a small business at home," she says.

She is also involved in greenhouse work, since this is the first year for a greenhouse at Willow Street. She said, "We

Doris Bushong shows the proper way of putting together a corsage.

## Homestead Notes

grew bedding plants and house plants, and are basically setting up the greenhouse from scratch."

She added, "You have to remember, floriculture is not all glory, and not all fun things. Many people forget there is dirty work."

She said the majority of her students are city kids "who elect to come to the vo-tech school." She said they are helped at their home school by their guidance counselor.

"Floriculture has always been popular," she said, "but students must have a desire to learn."

She also cautioned that it is sometimes difficult to get placed in the floriculture industry because in this area many florists are family owned, with little need for outside labor. The scene is changing, however, and students who have learned their skills well will be in a good position to get a job.

"Even if they don't get placed," Mrs. Bushong said, "it's not a loss. Creative things can always be used."

Mrs. Bushong's enthusiasm extends to the whole vocational - technical curriculum, because "it gives students who want to work with their hands something to do. It helps keep them interested. It is definitely valuable." She recalls her own unhappy days at school and said she wishes she had had something like vo-tech schools to help her along.

The vo-tech program is a half-day program for students who attend their home school for the other half of the day. The variety of work experience in the floriculture department includes all the things related to growing plants, including lectures, exams, and dirty work along with the more glamorous flower arranging and corsage-making.

Mrs. Bushong also explained that there is a co-op program for students in the last half of their senior year. It offers work experience "for anyone who can get jobs." She said people who need employees are "happy to get someone with experience - I don't sense any reluctance to hiring these young people." Many of the part-time co-op jobs turn into fulltime jobs, she said, for the student involved.

[Continued on Page 42]

Randy McCauley, Penn Manor senior and Doris Bushong look over a wandering jew in the greenhouse.

Dale Herr, Lampeter-Strasburg senior and Lauren Martin (center) Lancaster Mennonite junior, talk with

Mrs. Bushong about some greenhouse plants.

## My Thoughts and Welcome to Them

(With apologies to James Thurber)

## Hate to hoe tobacco? You're not alone.

By JOANNE SPAHR

I saw Dad come around the barn with the tobacco hoer on the back of the tractor. In a flash I was in the house screaming, "No, have mercy on me, please. I don't want to die. I'll do anything, but don't take me on the hoer, please!"

When that plea didn't work, I begged out of work by saying I had to write my column. So, here I am, giving my nondescript two-cents while the family sweats and gruels out in the field. I feel terrible (but not that terrible).

I hate hoeing. It feels like I'm being tortured to death. When I was young, Grandpa said that I was just a weakling, and that all I needed to do was keep practicing and my muscles would develop. Then, it wouldn't hurt anymore. But, what young girl wants to look like Mr. America at the tender age of

13, let me ask you that? I know I didn't. So, I spent more time making up excuses than practicing the hoeing.

From what little I have done, it seems to me that the ground hates being hoed as much as you hate doing it. It seems to fight back as you push your handles out and pull them in to go around each plant.

And, I'm notorious for taking out half the row of plants as I go. When my hoers should be out, they're in, and when they should be in, they're out. The family rarely puts itself through the agony of looking back over a row I've just finished because it hurts them to their cores to see those little uprooted tobacco plants littered all along the row.

When I drive while my brother and father hoe, it's the same story. For hours they take turns

yelling, "Darn you, Jo, you're taking out my row! Get over to the other side a little further."

Well, of course, you know what happens when I start heading the tractor in the opposite direction - I run over the other guy's plants, and the whole process starts again.

When I was young, I was mortified when they would holler at me: it seemed that they yelled loud enough so all the neighbors could hear what a lousy job I was doing. But, now, I just figure yelling at me is their way of keeping themselves entertained.

Anyway, until the money starts rolling in somewhere in mid-winter, my heart goes out to all the dedicated, hard working tobacco farmers out there who still have hand hoeing, topping, spraying, and harvesting to go through.

# Bushong

[Continued from Page 42]

Mrs. Bushong explained that if a need arises for some equipment or other tool, the students ask another shop within the school to supply their needs. So when her class gathered and dried flowers, one of the shops made presses for them. She and her students designed planters for apartments or patios and the woodworking shop crafted them for them. The woodwork shop also made frames and stained them for a project.

She said, "There is a great interdependence here and it keeps the other shops busy."

The floriculture department cooperates by supplying flowers for banquets at the school and for "La Concha" the food trades restaurant. They are also able to supply floral needs for teachers and visitors to the school.

Her job is not one that can be completed in the eight to three working hours for which she was hired. She is an advisor to the Future Farmers of America, and spent many hours helping them in their first year with their banquet, picnic and money-making projects. She went caroling with them at Christmas and assisted with their candy sales. The appreciation of the students was clearly

shown when they presented her with a surprise bouquet at the FFA spring banquet.

The Willow Street FFA Chapter received the honor of having their representative selected as state FFA Princess - Marcia Hess.

One of the group's most successful activities Mrs. Bushong said, was a hanging plant exhibit at the Elizabethtown Craft Fair, sponsored by the Atlantic Northeast district of the Church of the Brethren. She said the students sold hanging baskets and macrame holders they had crafted themselves. "The kids got a chance to see all the crafts. It was really a good experience for all."

Mrs. Bushong is a member of the Ephrata Church of the Brethren and is an associate member of the Men's Garden Club of Lancaster.

How did she get started? She said, "I have always been creative. I make my own clothes. We redid our old house and landscaped it. Being creative is a gift, and you have to share it. I believe there is enough to spread around."

When asked if her home was filled with plants she said, "I have a lot of hanging plants and a flower bed."

This was the first year there was a full-time program in horticulture - floriculture at Willow Street and Mrs. Bushong said, "It was hectic. There was a lot of breaking in."

In many cases she had to work out the curriculum the students were to follow because what was provided was

Lancaster Farming, Saturday, July 10, 1976-43

outdated. She said, "I just asked about things and tried out things." She gives Jim Kerr a lot of credit for the confidence he placed in her to forge ahead and work out her own program.

There is a committee within each department in the v-tech school whose purpose it is to keep good relations with the industry and give guidance to the department. Through this and other talks and programs, Mrs. Bushong has been telling the story of her floriculture curriculum and the work performed by the students.

Throughout it all, she reminds people and potential students that the floriculture department does many fun things, but that there is messiness, and a lot of clean-up. "We need kids who are going to work," she says emphatically.

As she works with each student it is quickly evident that attractive, petite Doris Bushong makes even the messy work go easier - after all, she's right there getting messy too.

Her enthusiasm for her craft and for life has touched and helped the many students who worked with her this year.

## Dairy Princess Ponderings

Contributed by  
Area Dairy Princesses

## Past princess reminisces

Marjie Hoffer  
1975-76 Dauphin County  
Dairy Princess

Being the Dauphin County Dairy Princess was one of the most rewarding experiences I have ever had. Having lived on a farm all my life, I was thrilled to think that now I would have the chance to really help by promoting milk and dairy products for all dairy farmers.

From the time I was crowned on June 20, 1975, I spoke at 56 different functions throughout Dauphin County. I spent three days in a local supermarket cutting

cheese for consumers to sample and handing them a dairy recipe booklet.

One of the important duties of a dairy princess, as she reigns in her dairy kingdom, is visiting the schools. My puppet, Daisey, and I spoke to approximately 1,000 boys and girls in the Harrisburg City Schools. The children were a very responsive audience; and from the moment I walked in the room until I left, they couldn't believe they had seen a real live princess.

Another very important group, but one which is often neglected, is the senior

citizens. It was an honor to visit eight of the county centers where the senior citizens come to receive their noon meal. This was the most rewarding and fulfilling experience I had this past year.

The Carol Pettis TV Show was also a very exciting undertaking.

It has been a year that I'll never forget. Throughout the year I've been asked by many people, "What do you get for being dairy princess?" I have responded with, "I have received something that neither money, nor a new wardrobe, nor a trip around the world could give me. I have the experience that resulted from promoting milk and dairy products, the memories, the feelings, and a greater knowledge of how to relate to people."

## Question of the week

**CAN YOU FREEZE  
OR CAN SUGAR PEAS?**

10 pounds pressure for 40 minutes for both pints and quarts.

The answer is "yes" on both counts. To freeze, select peas at the best stage for eating fresh. Wash and blanch in boiling water for 1-½ minutes. Cool in ice water, drain and pack in moisture-vapor proof container.

To can, the Hot Pack Method is preferred. Cover washed peas with boiling water, bring to a full boil. Drain, saving liquid to process. Fill hot jars loosely with hot peas, leaving 1 inch head room. Add one teaspoon canning salt per quart. Add boiling liquid or water, leaving one inch head room. Adjust lids. Process at

**Sad Reply**  
A housewife left home for the day. She locked up the house tightly, leaving a note on the door for the grocer: "Nobody home. Don't leave anything. I'll call tomorrow." When she returned home, the house had been burglarized and all her valuables stolen. On the note to the grocer were the words: "Thanks, we haven't left much."

# The Range

Summer is a great time of the year, there is no disputing that fact. And, picnics are one of the things that make summer so great. So, to make your picnics fun, but also nourishing and hassle-free, remember a few basic picnic tips which I've picked up from various sources.

First of all, play it safe by using fresh foods (no leftovers) and handle them as little as possible. Keep them covered, and, if necessary, refrigerated or iced.

When you are choosing foods, choose the right foods.

These are plain, well-cooked, or canned meats, salads without dressing, fruit pies, simple frosted cakes, etc. These all travel well with little mess or fear of spoilage. You should avoid mayonnaise mixtures, custards, puddings, filled cakes, and cream pies, unless these foods can be kept thoroughly cold at all times. If you like, you can carry an unopened tiny jar of mayonnaise to the picnic site and add it where desired just before eating.

The above information is just a small sampling of tips

I have found for picnic preparation. I will feature the rest in the upcoming July weeks.

Some of you have been asking "where are my potholders? Or don't you give them anymore?" The answer is "yes" we are still giving them and you all should be receiving them within two to three weeks. Due to a change-over in the staff of the paper, namely myself, some of the basics were ignored. Most things are now falling into place, so I should be able to get your potholders out to you very soon. I'm sorry you had to wait, but I hope to alleviate the problem this weekend.

We still need many, many recipes for this month's picnic feature. If you have any beverages, finger foods, or desserts made especially for a picnic, send them in. And, as I mentioned before, to facilitate speedy publication, put the words "picnic recipes" on the envelope and on the top of the paper with the recipes. Thank you. Hope you had a nice fourth of July.

**Barbeque**  
1 pound hamburger  
Small onion  
1 teaspoon vinegar  
2 tablespoons brown sugar  
1 tablespoon mustard  
¼ cup catsup  
1 cup water  
2 cups corn flakes  
salt and pepper

Brown hamburger and add rest of ingredients. Bring to a boil and simmer for 40 minutes. Serve.

## Home On The Range

(Continued from Page 45)

2-½ ounces (¾ cup) shredded dried beef  
¾ cup chili sauce  
1-3 cup sweet pickle relish  
6 buttered round buns  
6 slices American Cheese  
Fry bacon to crisp. Drain on paper. Crush into small pieces. Add dried beef, chili sauce, and pickle relish. Spread on half of split bun. Top each with a cheese slice. Place top on buns. Wrap sandwiches in foil. Heat on grill until hot through and through. Serve.

Mrs. Charles Biehl  
Route 1  
Park Ave.  
Mertztown, Pa. 19539

**Crunchy Sandwich Spread**  
1 cup minced or ground cooked chicken, turkey or ham  
1-3 cup mayonnaise  
¼ cup minced celery or green pepper  
¼ cup finely chopped walnuts  
½ teaspoon prepared mustard  
½ teaspoon salt, or to taste  
Fresh ground pepper to taste  
In small bowl combine all ingredients. Serve on bread, crackers, celery sticks or other raw vegetables. Makes 1-1-3 cups.

**Women's Day Chili Dogs**  
6 frankfurters  
6 frankfurter buns, split  
1 can (15 ounces) chili with beans  
¼ cup chopped onion  
½ cup grated Cheddar cheese

Open buns and place, cut side up, in a baking pan. Place a frankfurter in each bun. Combine chili and onion and spoon over frankfurters. Sprinkle with cheese. Bake in a very hot oven (450 degrees F.) ten to 12 minutes. Makes six sandwiches.

**Square Dance Reuben**  
2 pounds ground pork  
¾ cup chopped sauerkraut  
½ teaspoon caraway seed  
Salt  
6 slices Swiss cheese (3" x 2")  
6 sesame seed hamburger buns, split and toasted  
Heat sauerkraut and caraway seed; keep warm. Divide ground pork into six equal portions and shape into patties ½ inch thick. Place patties on rack in broiler pan so top of meat is 3 inches from the heat. Broil six minutes, sprinkle with salt, turn and broil second side four minutes. Place piece of cheese on each patty and broil until cheese melts and patties are done. Drain warm sauerkraut thoroughly and place two tablespoons on bottom half of each bun. Place patties on sauerkraut. Partially close each sandwich with top half of bun. Yield: six sandwiches.

**South Seas Delight**  
Add this hot South Seas Sandwich to your picnic fare. It's a quick-to-make meat mixture that goes into a hot dog bun. Simply combine 1 12-ounce can of

luncheon meat, chopped or ground, with ¼ cup each chopped green pepper and pared cucumber. Moisten with a mixture of ¼ cup mayonnaise, 2 tablespoons catsup, 1 teaspoon lemon juice and ½ teaspoon Worcestershire sauce; spread between halves of 6 buns. Tightly wrap each bun in foil and heat in a hot oven (400 degrees F.) or on a grill over ash-covered coals for about ten minutes.

**SUMMER PICNIC BEVERAGES Orange Milk**  
2 cups of nonfat dry milk  
6 cups of water  
one 6-oz. can of frozen orange juice (partly thawed)  
Mix dry milk and water in pitcher or jar. Stir partly thawed orange juice into milk and mix well. Serve cold. Makes six servings.

**Spiced Milk**  
1½ c. nonfat dry milk  
½ teaspoon cinnamon  
½ teaspoon nutmeg  
1 tablespoon sugar  
¼ teaspoon salt  
6 c. water  
Add dry ingredients to water and beat, stir or shake until smooth. Makes six servings.

**Tasty Punch**  
2 large cans Hawaiian-type fruit punch  
1 large can orange drink or frozen orange juice  
1 quart gingerale  
Mix, chill, and serve.  
Mary Hoover Stevens, Pa.

**Tea Syrup**  
2 cups tea leaves  
3 lemons quartered  
3 cups sugar  
1 quart water  
Boil for five minutes. Let stand for six hours, then strain. Use 1 cup syrup to one

## Canning, freezing demonstrations held

NORRISTOWN — It's fun to experiment with new recipes, but if you are freezing or canning fruits and vegetables, use only methods which have been tested and approved.

Using questionable produce, equipment or methods may result in spoilage, inferior products or at worst food poisoning.

For specific practices that are known to produce safe products, ask your County Extension Office, for free circulars on canning fruits and vegetables and preparing foods for your freezer.

Free demonstrations are now being given at the following locations in Montgomery County:  
Lansdale Area - July 15 (Thursday) 9:30 to 11:30

## Crafts

# Broken branches make pretty jewelry

By JOANNE SPAHR  
Editor's note: LANCASTER FARMING is now featuring one craft a week that will be an interesting and enjoyable hobby for farm women. The column will be run on an exchange basis such as the recipe exchange,

which is a regular feature of the newspaper.

If you have a hobby or craft that you enjoy, or if you know of another person who spends her leisure time doing interesting crafts, let us know.

Send your name and

address, a little background information on your interest in the craft (how long you've been involved, how you became interested, etc.) and the directions to the hobby or craft. Any printable pictures will also be appreciated.

If you are telling about someone else, send the same information and we will contact the individual for further reference.

Each week we will

choose one craft and craftperson to feature.

For several years, a very popular craft has been "decoupage." Nearly everything imaginable has been decoupaged — plaques, pocketbooks, keychains, wall hangings, etc. However, if you go to a craft shop for your materials, you will usually end up spending a little extra for already sanded and shaped wood, decals, and varnishing material.

Some people, of course, have learned to cut expense

This adorable necklace was constructed from a branch of a tree and leftover pieces of wrapping paper and thread.

when they decoupage, yet still come up with very beautiful items. One such woman is Mrs. Betty Jo Heisey, who was the featured craftperson in last week's (July 3) issue.

Mrs. Heisey, who could be termed "the woman who utilizes everything" cuts nearly all expenses by using broken limbs of trees and leftover wrapping paper or cards to create her hand-

made decoupaged necklaces and pins.

And, according to this artist, "It's so easy."

**WOODEN NECKLACES AND PINS**

To make these "easy" decoupaged items take a branch which has fallen in your yard and cut it either diagonally or straight up and down. The branch, itself, should be about 1½ inches in

[Continued on Page 48]

# TAM AGRI CORPORATION

## INVENTORY REDUCTION

# SALE

Tam-Agri buys in quantity to give you better prices. Now, when manufacturer's pricing is on the rise again; is Tam-Agri going to hold on to its inventory - then sell it at the new increased price for higher profit?

**NO!**

Tam Agri wants to pass double savings along to you. First, bulk buying gives us a chance to offer items for less. Second - Tam Agri can sell from stock - no need to pay manufacturer's new higher price - no need to charge you more. Tam-Agri is known in agri-business for quality and fair dealings - It pays to know Tam-Agri.

## Broken branches

[Continued from Page 47]  
diameter and the slices cut should only be 1/8 to three-sixteenth in width. Mrs. Heisey suggests that cherry wood works the best, but others will also turn out nicely.

Depending on how rough the slice of wood is, you may wish to sandpaper it to make it smooth. Sand paper can be bought at any variety or hardware store.

If the slice of wood is relatively smooth, however, there is no need to sandpaper it.

When the wood is the desired texture to your touch, put it aside and cut out any attractive figure — which is the correct size to fit onto the slice of wood — from leftover wrapping paper or cards. Glue this paper cutout to the smoothed wood.

To add a creative touch, and to give you design a 3D effect, add bits of thread to connect or finish a design.

When you have glued the design and the thread (if desired) to the wood, cover the whole thing with Modge Podge or Envirotext, which can be purchased at any craft store.

To give the reverse side a less "homemade", more

"handmade" look, finish it by gluing a felt backing to it.

Now, to make your creation into a pin, you simply attach a pin to the back. For a necklace, a tiny loop of nylon fishing line does the trick.

So, by utilizing sticks and limbs of trees which are usually only a bother when mowing the yard, you can make lovely necklaces for yourself or as gifts.

Read  
the  
Farm Women  
Calendar.

## Cooperative Extension Service Datebook

**CHESTER COUNTY**  
The Chester County branch of the Extension Service will offer food preservation workshops through the month of July. All workshops will be actual demonstrations and will be held at various locations from 9:30 to 11:30 a.m. No registration is required. All are invited to attend.

**Canning and Freezing Fruits and Vegetables**  
Tuesday, July 13 - Held at the Chester County Federal Savings & Loan Community Room at High and Market Sts., West Chester.

Thursday, July 15 - Phoenixville Civic Center Gymnasium at 123 Main St., Phoenixville.

Thursday, July 29 - Oxford

Neighborhood Center, 35 North 3rd Street, Oxford. Pickles and Relishes

Monday, July 19 - Chester County Federal Savings & Loan Community Room, High and Market Sts., West Chester.

Jams and Jellies  
Tuesday, July 27 - Chester County Federal Savings & Loan Community Room.

**BERKS COUNTY**  
The Berks County Extension Service has a calendar of events lined up for the summer:

July 21 - 4-H Fashion Revue  
July 26 - 30 - 4-H Camp  
August 5 - 4-H Fair - Kutztown

August 22 - 24 - Homemakers Camp.

Know Where the Activities Will Be?  
Read the Farm Women Calendar.

## A UNIQUE STOVE and FIREPLACE combination

The Efficient Way To Wood Heat  
Is With The  
NORWEGIAN or DANISH STOVES

Franklin stoves and fireplaces allow most of the heat to escape up the flue including volumes of warm air from your home. However, with the Norwegian & Danish light design and unique baffle system, stoves burn highly efficiently. Keeps 75 percent of heat generated right in your home. Burns 8 to 18 hours on one load (depending on size). Mornings are warm. One fire lasts all winter.

Heats 10,000 Cu Ft Home (28 ft x 45 ft area)  
Burns 16 to 18 Hours Each Loading

LANCASTER, PA

# 4-H exchange students surprised by Pa.

By SALLY BAIR  
Feature Writer

**LANCASTER** — Every summer thousands of tourists stream to Lancaster County, but few see the county the way forty-four Colorado visitors saw it this week. The young people were part of a 4-H exchange trip which began last summer when a busload of Lancaster County 4-H'ers visited with them in southwestern Colorado.

Five Colorado counties are involved - Montezuma, La Plata, Dolores, San Miguel and Archuleta - and for all the 4-H'ers it was their first trip this far east.

According to Bob Seaton, County Extension Director in Montezuma County, there were several surprises for the group.

"We were all surprised at all the agriculture you have here - all the corn and grains. And everywhere you look it is green," he said.

He explained this remark by saying that the average yearly rainfall in their area of Colorado is 13 inches, which does not make for much greenery.

Seaton also said, "There are trees everywhere. In Colorado you can see for miles." Also, since no one

had ever been here, "we didn't figure on hills."

Kim Acott, 16, also from Montezuma County, is staying with Roberta Stein, Mountville. She concurred with Seaton. "I didn't know what to expect, but I didn't believe Roberta when she said it was green here. I expected it to be all dark and gloomy, with no big trees. The hills here are covered with trees - you can't see the ground!" Kim lives in Cortez.

"A big difference is that we have mountains," Joette Reinhardt, 17, of LaPlata County said. She and her sister Gwynna 15, are staying with Cathy Brubaker, 345 Running Pump Road, Lancaster. Joette added, "I like it here - it is really pretty." Their home is Ignacio.

Kevin Short, 16, also of LaPlata County, is staying with Bob Hess, Lancaster R 2. According to him, the biggest difference here is the lack of irrigation, the terrain of the land being farmed, and the size of the crops. He says the crops are much further along here.

The Reinhardt sisters said they are currently making their first cutting of hay, and

Gwynna (left) and Joette Reinhardt get a close look at tobacco at the home of their host, Cathy Brubaker.

Kevin said corn at home was 6 inches tall.

Irrigation is common and necessary in the area from which these 4-H'ers hail. Kevin said, "We irrigate from the beginning of the growing season until the last cutting of hay or until it snows for moisture in the pasture."

He also mentioned it is unusual to get three cuttings of hay. Although it varies each year, it sometimes frosts in June and in September.

The water for the 300 acres that Kevin's family farms comes from a river, although much irrigation water comes from reservoirs in the mountains. Kevin explained that irrigating must be done according to the slope of the hills, and not according to the fence line.

To get water, Kevin explained, farmers purchase shares in a company and pay "ditch dues" once a year. Each person is allotted a set amount of water from the

main ditch annually. If the supply gets low, then some farmers may have to sacrifice part of their amount so that others along the ditch can get at least some water for crops.

Upkeep on the ditches is minimal he said. The main ditch, which carries about 21 inches of water is watched over by a committee which checks it once a week. It is de-mossed about two or three times a year, according to Kevin. Farmers maintain their own ditches which carry the water to their fields. The weeds are burnt off once a year and a "ditcher" cuts the sod off for a better flow, after the water drains through the fields, any excess is carried back to the river.

Kevin expressed a sentiment which is well understood locally, "There are getting to be more people than anything. The farmers are being pushed out of the country. A person couldn't start farming in Durango

(his home town) because he couldn't make a living."

Where would a farmer go if he wanted to farm? According to Kevin "You'd have to go north, to the Greeley area. It is the only farming area left, and the only place left to get water."

Kevin, who said his home is "more of a ranch than a farm," noted that another obstacle to farming is the very short growing season in the Rocky foothills.

His family has mainly beef, keeping from 70-80 cows. He said they raise young cows, grazing them, and then shipping them to a feedlot in Greeley where they are fed out and sold.

Formerly they raised Herefords and Angus, but now Kevin's father is breeding the cattle artificially and they have some Simmentals and Beefalos as well. The beefalos, he said, are "growing like weeds," but they are just a "fad." He said, "They grow good, but there is not much outstanding about them. They get big, but they are not finished." Alfalfa and grass

hay are the main crops on Kevin's farm.

Kim Alcott's parents live on seven acres and lease another 150 acres on which they grow barley and alfalfa and raise 40 head of cattle. Kim said she drives the tractor but doesn't have to help "buck the hay." To Roberta this was an interesting way of saying stack the bales.

On the Reinhardt farm of 120 acres, cattle is also raised, and alfalfa, grass hay, and oats raised. Gwynna noted that if they had been home they would be helping make hay. She also said, "It only rains when we're haying."

Few of the visitors minded being away from home on the Fourth of July in this most exciting year. In fact Kevin said he thought it was probably more fun here - "there is more to do." He and his family visited Gettysburg on Sunday. Kim went to Cape May with the Steins and said, "It was neat - there was a big parade." Joette & Gwynna entered in the celebration at Long Park.

Colorado is celebrating their Centennial and Bob Seaton said they have had celebrations all year, along with the observance of our country's birthday.

There are other differences which the visitors noted. Kim said she thinks there are more heavy people here, but she added, "It must be because there are so many good things to eat. We had shoo fly pie - I love it." She finds the name "sticky bun" amusing, but it doesn't stop her from eating one. Her only negative reaction was to pickled red beet eggs - they were new, but she isn't anxious to try them again.

Kevin said the roads are quite interesting here. "There are 12 different ways to get somewhere a mile away. In Colorado there are not so many roads." Also the county roads are all gravel,

## cheap mowing

**Figure it out.**

You can expect the average mower to last 3 to 4 years. That's the official industry figure. But the life expectancy of a Yazoo Big Wheel Mower is over 10 years. That includes the commercial users who work their Yazoo mowers 8 hours a day.

Many homeowners are still using Yazoos they bought fifteen and twenty years ago.

Try one on your home turf. 3 1/2 to 7 HP, 20" to 26" cut. It's the cheapest way to cut grass. Come in today. Or you call, we'll haul—to your place.

Bob Hess (left) and Kevin Short of LaPlata County, Colorado, discuss Bob's steers and the 4-H programs in their respective states.

## Exchange students

(Continued from Page 49)

and almost no driveways are paved as he has seen many in this county.

The density of people here is hard to adjust to, and the fact that things are so close together. Seaton said, "It is confusing to go a short way and be in town."

Tourism, however, is something that is not new. The counties represented among the visitors boast such things as a narrow gauge railroad which takes tourists to Silverton, an old mining town; Mesa Verde; and the home of the Ute and Navaho Indians. It is also an area well-traveled on the way to Arizona and New Mexico, and even in winter it is of great attraction to hunters.

The 4-H program is basically the same in both areas of the country, but in Colorado the clubs meet year round, and all projects are together in one community club with project leaders teaching the subjects.

Beef cattle seemed to be a universal project among those interviewed, but there is a difference. After the animals are judged on the hoof there is a carcass class in some counties, and there is a rate of gain contest.

Kevin has been in 4-H for eight years and has beef and sheep fattening projects. He raises about 13 ewes and keeps some good lambs each year. A big problem, he said, is finding a market for his wool.

This is Kim's seventh year in 4-H and she has sheep and beef fattening projects, horse enterprise and

clothing. She has also taken gardening and knitting. She said beef is a good money-maker for 4-H'ers in her area. She got \$.80 a pound last year, with the grand champion bringing \$1.25.

Joette and Gwynna have been 4-H'ers for eight and seven years, respectively, and have cattle and sheep projects - and clothing. Gwynna also has taken leather craft.

In Montezuma county there are 360 4-H'ers in 15 community clubs with 80 leaders. According to Seaton the population is 14,000 people (and 23,000 horses). He said cattle and sheep are the major agricultural enterprises with a few dairy animals, and a few hogs. Surprisingly his county grows a lot of apples,

cherries, apricots, watermelons and cantelopes as well as grains and hay crops. They are approximately 6,200 feet above sea level, but there is a canyon 5,000 feet below! The highest peak is Mt. Wilson at 14,000 feet.

Seaton said he sees the 4-H exchange as being a "fantastic learning experience. They are learning a lot about agriculture and meeting a lot of people."

Kevin expressed the feelings of many. "On the exchange you get to see the land. You learn to relate to yourself and others better. You learn to notice things about others that you might not have noticed before, and you learn how others live. You really get experiences you can't get any other way." The people, Kevin said, "are just like us - there's no difference."

Bob, Kevin's host said the trip west last summer allowed him "to see a lot of

things we wouldn't see as tourists. And it was all more or less related to agriculture."

Kim said, "The trip really educates you - you can never imagine in your minds how things are. I really got a lot out of our trip." She said she has also made many more friends among her bus companions from the neighboring Colorado counties.

Her host, Roberta said, "I really think the exchange is fantastic - I love it." Her father said, "We think it was a wonderful opportunity for Roberta to travel to Colorado last year, and we thoroughly enjoyed meeting her host."

"The trip helps you get to know other people and other parts of the country," Gwynna said.

From Lancaster, the 4-H'ers will visit New York City, Niagara Falls, Dearborn, Mi. and then head home. The trip will last a total of 16 days, five of which were in Lancaster. While here they visited Hersheypark and the chocolate factory and many visited the New Jersey shore, Philadelphia, and other local sights of interest.

When they return home, it will be with a much broader knowledge of their country and of the small corner known as the "Garden Spot."

The longest-lived animals on earth are the giant tortoise which can live 150 years or more.

## Award winning recipes

Editor's Note: Due to the many requests for the prize winning recipes from the Berks Dairy Products Cooking Contest held in June at the Berkshire Mall,

LANCASTER FARMING has obtained a copy of the recipes. This is the second in a two-part printing of the original ten recipes. The first five can be found in the July 3 issue of LANCASTER FARMING.

### Buttery Shortbread

1 lb. butter  
1 cup sugar  
4 1/4 cups flour  
1 tsp. vanilla  
Dash of salt

100 pieces

Mix with beater, adding last cup of flour with wooden spoon. Spread in 12 x 17 pan; prick with fork. Bake one hour 300 degrees. Cut while warm.

Jayne Malsbury  
Rehersburg

### Exotic Pie

19 Oreo cookies, crushed (reserve some crumbs for top)

1/4 cup melted butter  
Mix and form in 9" pie shell.  
1 pkg. Knox gelatin in 1/4 cup cold water; set aside.

Place in double boiler:  
3 egg yolks  
1/2 cup sugar, minus 3 Tbsp.  
1/4 tsp. salt

Add 1 cup hot milk to mixture in double boiler and cook, stirring, until it coats spoon.

Add to above:  
1 tsp. vanilla  
Gelatin mixture  
Stir until dissolved; cool mixture in refrigerator 1/2 hour.

Beat until stiff:

3 egg whites  
3 Tbsp. sugar  
Fold into cooled egg yolk mixture.

Fold in:  
1 cup whipped cream

Spoon into prepared pie shell. Add crumbs on top. Chill. Pour creme de menthe or any coffee liqueur over pie when serving. About 8 servings.

Kathy Tyson  
Sinking Spring

xxx

### Sour Cream Spice Cupcakes with Brown Beauty Icing

one-third cup butter  
1 cup brown sugar  
2 beaten eggs  
1 tsp. vanilla  
1 cup dairy sour cream  
1 3/4 cup cake flour  
1/4 tsp. baking soda  
1 3/4 tsp. baking powder  
1/2 tsp. salt  
1/2 tsp. cinnamon  
1/4 tsp. cloves

In large mixer bowl, cream butter and sugar; beat in eggs and vanilla. Stir in sour cream alternately with dry ingredients. Bake at 375 degrees for 20 minutes. Make 2 dozen cupcakes.

Icing: Cook until smooth:  
1/4 cup butter, 1/2 cup brown sugar; one-third cup canned milk. Cool. Add: 1/2 tsp. vanilla, 2 1/2 cup 10X sugar, 1/2 cup nuts. Spread on Cupcakes.

Mrs. Robert Frantz  
Temple

xxx

### Banana Split Cake

1st layer: 2 cups graham cracker crumbs, two-thirds c. melted butter.

Mix and press in bottom of 9 x 13 pan.

2nd layer: 1 c. softened butter, 2 eggs, 2 c. 10X sugar, 1 tsp. vanilla.

Beat till firm. Spread over graham cracker crumb mixture.

3rd layer: 3 large bananas, sliced and dipped in pineapple juice.

4th layer: 1 can (16 oz) crushed pineapple. Well drained.

5th layer: 2 cups heavy cream, whipped

6th layer: sprinkle with chopped nuts and marashino cherries.

Chill 8 hours before serving. Serves 8 to 10.

Phoebe Ruth,  
Fleetwood

xxx

### Delicious Bundt Cake

1/2 cup butter  
1/2 cup shortening  
2 cups sugar  
4 eggs, room temperature  
1 tsp. pure vanilla extract  
1 tsp. lemon extract  
1/2 tsp. almond extract  
3 cups sifted all-purpose flour  
1 Tbsp baking powder

xxx

## Ida's Notebook

Ida Risser

Our third son was sixteen last month. Naturally he wants to drive a car so he has had the eye examination, the physical exam and the papers notarized and taken to Harrisburg.

This month I'll be taking him to the High School for behind the wheel training. It will take a lot of time but learning during regular school days would delay his drivers license for several months as there is a long waiting list and he doesn't have study hall.

Two days before his birthday he received two rather big gifts in small packages - so to speak. One was a letter from his sister with an airplane ticket to Indianapolis in it, which will give him his first airplane ride. He's a bit apprehensive about going alone but I know he can manage as his older

sister, at the age of eight, flew alone to Michigan. That time I was the one who was apprehensive.

The other package wiggled and squirmed as it was a registered 8-week-old Beagle puppy - something which he has begged for over these many years. The problem was that we already have two dogs. One is a registered Irish Setter and the other a 17-year-old Cocker Spaniel-Border Collie cross who is in good health except for being a little deaf.

Long ago it was said that only a poor family would have three dogs; so, I guess that's us! If we survive all his whimpering and puppy antics, he will probably be a good hunting dog. He surely gets enough love and attention just now from the children and their Daddy.

## WHITE WASHING with DAIRY WHITE

- DRIES WHITE
- DOES NOT RUB OFF EASILY
- NO WET FLOORS
- IS COMPATIBLE WITH DISINFECTANT AND FLY SPRAYS
- WASHES OFF WINDOWS & PIPELINES EASILY

### Also Barn Cleaning Service Available With Compressed Air

To have your barn cleaned with air it will clean off dust, cob webs & lot of the old lime. This will keep your barn looking cleaner & whiter longer. We white washed 600 barns last year, so if your barn needs white washing for better service have it done early.

## Ladies Have You Heard?

By Doris Thomas

Lancaster Home Economist

### Do It Yourself And Save Money

Spending time and energy instead of money is still a decision we as consumers can make if we choose. There are many areas where technology, production, and distribution have made life easier and more pleasant. But all of those improvements come with a price tag that you don't have to pay unless you want to.

In these days when it's hard to make a paycheck stretch over all the expenses, are there services and products you and your family could really do for yourselves? This could really be the beginning of a family do-it-yourself movement.

Every family wanting to save money will have to look at its own combination of talent, time, and equipment to see what family chores can be shifted from "paid to

others" to "work by family members."

The list of jobs that can be done by the family are long and varied. For example, how about washing and drying cloth diapers rather than using disposable ones. The savings could add up to over \$100 in a year.

In feeding the family, consider homemade snacks rather than prepared snack food. Or carry bag lunches to work instead of eating out. Could some member of the family do the maintenance work on the family car, other repair jobs around the house, yardwork?

Families who want to stretch their dollars should take another look at what they can do for themselves with their time, energy and talent. A few dollars saved in this way every month soon add up.

### Summer Grapefruit Comes From California

If you have always thought that fresh grapefruit was only available during the winter and spring, take notice! Grapefruit is available from California and Arizona every month of the year. The diverse growing areas of the two states provide the ideal conditions for producing grapefruit during the winter as well as the summer.

This summer's grapefruit crop from California tastes as good on the inside as it looks on the outside. Western grapefruit are characterized by their nearly flawless exteriors and bright, natural color. The insides are juicy and tart with the ideal wake-up flavor that goes so well as breakfast-time — or anytime.

There are two varieties of grapefruit from California: Honey White and Ruby Red.

The honey white has a bright yellow skin and honey-colored meat. The ruby red has a pink blush to the skin and pinkish meat. There will be slightly more honey white grapefruit available this summer than ruby reds, but both have equally delicious flavor.

Small-sized grapefruit look to be your best value during the summer. Peak shipments of California summer grapefruit will be in July and August.

California's abundant summer grapefruit are among the most versatile of fruits for warm weather menus. Think of grapefruit as more than a breakfast fruit. Hors d'oeuvres, salads, entrees and desserts all can benefit from the tangy flavor of fresh western-grown grapefruit. And freshly squeezed they're a cool, refreshing, zestful drink. Why not put grapefruit on your next grocery list.

## National Holstein-Friesian Convention Sale

# \$29,500 for a cow - just an average sale

By JOANNE SPAHR  
LANCASTER - The National Holstein Convention Sale, which was the culminating event of this year's National Holstein-Friesian Association Convention was held at the Guernsey Pavilion last week. Outside the auction tent, lovely tanned, elegantly dressed, ultra-fashionable women with broad-brimmed hats and wrap-around dresses stood amid the crowd with drinks (milk) in their hands and graced the place with their presence. Loose circles of people stood chatting with one another as the auction was taking place about five feet away. On occasion a distinct murmur would ripple

Keystone Joy of Christmas, consigned to the National Convention Sale by Donald Seipt and purchased by Oak Ridges Farms Ltd., of Oak

Ridges, Ontario, brought the highest price at the sale with \$29,500.

through the crowd. Early in the sale, one rumor spread that the highest price was \$29,500 for a two-year-old heifer who had just freshened. It was a nice price, they all agreed, but there were hopes for a bid of \$50,000 before the sale was over. As the day waned and delegates left to catch flights home to their native states, it became more and more evident that the top price had been reached. In the end, it

was this first-calf heifer, Keystone Joy of Christmas, owned and bred by Donald Seipt of Easton, Pa., that

was the top female animal sold.

COSTS LESS THAN BUILDING YOUR OWN  
Call Us First

### ... the new, economical, plug-up-and-go total farrowing environment

The new SOW CASTLE by AGSTAR provides animals with comfortable conditions they thrive on — a completely protected environment — just what any good pork producer needs to save more pigs and boost income. And, while your new SOW CASTLE is cutting stress on animals it's also giving you a comfortable place to work.

The SOW CASTLE comes complete with farrowing stalls, feeders, waterers, slotted flooring, heaters, ventilators — everything except the sows. All you'll need to do when it's delivered to you by flat-bed truck is hook up water and electricity — then start saving more pigs. Models are available in 12 and 24 foot widths (24-foot model shown above), and lengths to 50 feet. Combination nursery/farrowing buildings are also available. Call today for complete information, prices, and delivery date to your farm.

Bank Financing & Leasing Available.

Wilbar Peachum Content was the next highest priced cow at the sale. Consigned to the National Convention Sale, by John G. Gilliland, Warriors

Mark, Pa., she brought \$29,000. She was purchased by Hugh Sutherland of Delhi, N.Y.

Hilltopper Ivanhoe Classic, the top priced bull at the National Convention Sale brought \$13,000 and was purchased by a Pennsylvania syndicate. The

former owner was Charles Stroh of Hilltop Farm, Suffield, Connecticut.

## Average sale

[Continued from Page 53]

bought by a Pennsylvania syndicate out of Port Matilda, Pa., was the top-priced male Holstein. His price was \$13,000.

The top-priced heifer, Keystone Joy of Christmas, purchased by Oak Ridges Farms, Ltd., of Ontario, Canada, was the daughter of "Round Oak Rag Apple Elevation," and a former

All-Pennsylvania cow with a record which reads 24,400 pounds of milk, 4.0 per cent of fat, and 968 pounds of butterfat. She also has Gold Medal Dam recognition.

Donald Seipt, who consigned the heifer, Keystone Joy of Christmas, to the sale, was pleased and most likely a bit proud that his animal had done so well. But, this was not the first time one of

his animals has taken the top price at the national sale. Last year, a bull, which was a full-blood brother to this heifer, was the top priced male. The convention had then been located in Chicago.

Seipt really didn't have time to sit and think about his successes, however, since he was director of the national sale and was busy making sure all things were running smoothly.

Besides being director of the sale, Seipt is also the president of the Penn-

sylvanias Holstein Association.

According to Seipt, preparations for the sale had been going on for several years. This entailed many things including picking the site for the sale. When it was last held in Pennsylvania, during the fifties, the sale took place in Harrisburg. But, this year the sales staff chose Lancaster.

"After being in Philadelphia during the Bicentennial celebration, we

**"I could buy a  
4400 Combine and  
a self-propelled chopper  
for about \$54,000...  
but that doesn't  
make much sense."**

**"Instead,  
for \$54,000 I can buy  
a Uni-Superchopper,  
a big Uni-Combine,  
a manure spreader,  
a Cut/ditioner — and  
send my boy to college  
for a year!"**

New math? No. It's Uni-System economics, using suggested dealer list prices for the equipment mentioned. Compared with other top quality machinery, Uni saves up to \$8,000 on the deal. And the way everything else today is taking a bigger bite out of your net farm profit, one thing you don't need is to overpay for your equipment needs.

But, your real Uni bonus is high performance. Our Superchopper is America's Number 1 selling self-propelled forage harvester. And for a good reason. It's built all the way through to give you all the brawn and high-speed capacity you need to keep your wagons really rolling to the silo!

The big Uni-Combine is a larger, heavier, more rugged workhorse than ever. You handle as many as 4 wide or narrow corn rows—or a 15-foot grain platform.

The point of all this means you'll save money with Uni and get the job well done! We feel that you'll agree Uni is the right combination of performance, reliability, long life and a sensible price tag. Maybe you don't have a college-age son, but we have a hunch that you'll find someplace worthwhile to put your Uni savings. Right? Stop by and see!

Drop by your New Idea dealer and see the entire Uni-line—tool carrier, chopper, combine, sheller or picker.

Coldwater, Ohio 45828

**Uni-System  
just plain makes more sense**

These samples of pressed flower art were on exhibit in the Arts and Crafts building. The artist who made them was Dorothy Longstreet.

Ladies from various county club groups demonstrated the art of quilting in the quilt barn. In the building, close to 1700 quilts were displayed

for sale. The quilt shown is nearly finished and features flags of all-nations.

## Kutztown Folk Festival

By JOANNE SPAHR  
and  
By JUDY MITCHELL

KUTZTOWN — Always a popular tourist attraction, this year's 27th Annual Kutztown Folk Festival is expected to have a whopping crowd of 100,000 visitors from the United States, Canada, and Europe roam past and through its 300 exhibits.

Barbara Loust is pictured teaching Tracy Ahern how to spin with a drop spindle the way the Indians used to do.

Started nearly 30 years ago by three professors from Franklin and Marshall College, Lancaster, Pa. to perpetuate Pennsylvania Dutch Folk Lore, the event has grown from a country fair into a nationally known event.

This year the Bicentennial events centered on the East Coast helped bring in an international tourist trade. By mid-point in the week, two foreign delegations had enjoyed the festival.

One of the foreign groups was a 25-member delegation from Reading, England, who were touring their United States' namesake. After seeing that Pennsylvania city, they took a jaunt up to Kutztown and took in the sights.

The other foreign group came with the U.S. Travel Association from Europe and did not speak English. Interpreters were engaged to serve them. There were also Japanese visitors to the folk festival.

What does the Kutztown Folk Festival have that draws a crowd of 100,000 including foreign visitors? It has oodles and oodles of Pennsylvania Dutch folk lore, crafts, and foods to captivate even a Pennsylvania Dutchman who has grown up in the tradition presented.

The exhibits include a "commons" where traditional crafts are presented by artists in full dress. There is rug weaving, broom making, candle dipping, lamp making, vegetable dyeing, and many, many more traditional crafts which were once necessities for daily living.

Then, for the "just for fancy" crafts, there is a large building which houses Pa. Dutch crafts such as scheren-schnitte, or paper cutting, reverse glass tinsel painting, and frakteur art, an ancient type of printing used on old official documents.

For quilt lovers there is a quilting building where the prize winners of a quilting contest are housed. This year, 1700 quilts were entered in the contest, which was divided into patchwork, applique, embroidery, antique, and all-quilted

J. Claypool's hex signs are hand painted.

categories. First to fourth place winners were named for each category and honorable mentions were given. This made a total of 50 quilts which were mandatorily housed in the barn.

Besides the many exhibits spread over the 35 acres, the folk festival hosts special events. Since many visitors come to see the "plain people", and since many "plain people" are either prohibited to entertain in the festival or choose not to, there is an impersonation of an Amish wedding held twice daily and an Amish pageant also done two times each day. The pageant outlines the struggle the Amish had to remain separate and the history of their development in this country.

Mrs. I. Price of Reading R1 puts the finishing touches on one of her apple head dolls.

Donna Adam pitches straw to George Kline who feeds the antique thresher owned by Donna's grandfather, George Adam.

## Average sale

(Continued from Page 54)

wanted the delegates to leave with a memory of the beautiful Pennsylvania countryside. So, we chose the Guernsey Barn," he explained.

They made a good choice. The majority of the crowd, which was estimated at 4,000, was able to sit under the 140 x 80 foot tent where a cool breeze kept the area from becoming uncomfortable. The rest of the overflow crowd was able to find shade under trees or tour the barns previewing cattle.

Other preparations that Seipt and the members of the sale staff made was to elect the animals for the sale. That process began in February. In total, there were 77 animals chosen, consigned by breeders from all over the United States. Of these 77 animals, only 74

head were sold, with the

average for the day coming to \$7366.

Compared to the 1974 convention sale held in New Jersey, which averaged \$9000 with the top animal going for \$70,000, this year's auction was "an average convention sale," as Mr. and Mrs. Robert Kauffman of Elizabethtown put it.

George Yeoman, cattle breeder and exporter from Oklahoma speculated on why the prices ran the way they did.

"Well, it could be for several reasons," he drawled. "Personally, I figure it's 95 per cent psychology. If the first animal had gone higher, we could have got more."

The first female sold, Wilbar Peachum Content, rumored by some to go the highest in the sale, drew a maximum of \$29,000 from the bidders.

She was an eight-year-old dry cow, "due any day,"

with a 95 point, twice excellent classification. Her records showed 31,225 pounds of milk with a 3.6 per cent butterfat record, and 1139 pounds of butterfat. Her sire was Wilbar Pride Admiral Peachum and was a Gold Medal winner. She was bred to Round Oak Rag Apple Elevation.

John G. Gilliland, from Warriors Mark, Pa., consigned her to the sale, and she was purchased by Chapel Bank Farms of N.Y. She was the second highest priced Holstein cow in the sale.

Besides the low starting price, there were other speculations as to why the prices stayed where they did. One delegate from Colorado thought it could have been due to the dry year and the slowness of the crops.

"Most of the Midwest and West have been very dry this year, and there's just not that much money to spend," he explained.

One member of the Junior Holstein Association from Ohio, Susan Tullenkamp,

thought the prices were high enough as they were.

"I can't believe that someone would pay \$15,000 for a two-week-old calf," she said incredulously.

Sue went on to explain that she is dairy science major at Ohio State, and that she felt some of the prices were what she had expected but others were unbelievable.

"When you consider the survival rate of a two-week-old calf, you are really taking a chance when you spend \$15,000 for it," she said.

That is probably true, but this auction was no different from any other - some animals went high, and others went low.

In total this year's average was higher than last year's by \$1,700. Last year was the time the sale took place in the ballroom of a large Chicago Hotel.

Nothing unique happened this year to top last's performance, however. I guess, as many of the spectator's felt - it was just an average sale.

★★★★★★★★★★★★★★★★★★★★

Donald Seipt, president of the Pennsylvania Holstein Association and director of the National Convention Sale, chats with an interested delegate. Seipt also had the top priced cow in the sale.

## Folk Festival

(Continued from Page 56)

The Seminar tent houses a demonstration of the various "plain" religious sects in the area such as the Mennonites and the Dunkard Brethren.

Live models display the various types of garb and explain the differences of each one.

Of all the things to see and do, two of the most popular are the snake and funeral lore exhibits. Pharis Hertzog, the oldest craftsman at the festival and a retired professor from Elizabethtown College, ties a rattlesnake into a knot and milks it for the snake demonstration.

The funeral lore tent, which shows the old method of preservation by ice, is probably the most unusual, yet extremely enjoyed exhibit.

"People just flock to that exhibit," a public relations person says.

Most of the time, the exhibitors have standard speeches and dialogues that they carry on with the crowd. But, on occasion, there is time for a brief, but friendly chat between the demonstrators and spectators. It was during one of those moments that George Kline, a thresher told of some of his past.

Kline is from Mertztown R2 and has been with the festival since it began 27 years old. The functioning antique thresher and post hole digger he runs are his. His son John, who demonstrates with the digger, recalls that it was in the fourth generation when his father bought it and must now be close to 100 years old. John's daughter, Donna, pitches straw for the antique engine powered thresher that dates back to the late 1800's when it was operated by horses.

Exhibitors also give instructions in their crafts to visiting youngsters and children of local people or other demonstrators working the festival.

Harry M. Haupt, a blacksmith from Worcester, delights the crowds as he demonstrates his trade to the accompaniment of a running dialogue. His tone is light and humorous but the message comes through loud and clear.

"Listen to what young people are saying," he advises adults, "and help them learn to do what they want to do," and following his own advice, Harry invites youthful volunteers to try their hand at his trade.

Barbara K. Foust describes her spinning as "a hobby that has gone bad and taken over my life," but the pleasure it gives her is obvious by her readiness to teach her craft to children.

Last year Barbara taught Valerie Keller to operate the spinning wheel, and this year Valerie, who says that, for her, "spinning just seemed to come naturally," is demonstrating for the spectators. This year Barbara is teaching Tracy Ahern to spin with a drop spindle, which Barbara claims "is a good way to learn while you are saving up to buy a spinning wheel. Of course, Tracy's father makes spinning wheels," she pointed out, identifying Mr. Ahern as the decoy maker exhibiting at the festival. (Tom Ahern later verified that he is in the process of making a spinning wheel, a project he's been working on off and on for about two years that now is near completion.)

Besides the lessons which can be learned from the exhibits and the exhibitors, there is one more added attraction — the food. It is probably the biggest thing some visitors look forward to. In the first four days, 4300 pounds of chicken, 2655 pounds of ham, 450 pounds of potatoes, and 94 twenty-five pound bags of flour had been used. As one public relations person put it, "They are stuffing themselves until they ouch."

Whether it is folk lore, crafts, people, or food you enjoy, it's all there at the Kutztown Folk Festival.

Toleware is hand crafted and hand painted tinware, exhibited here by Mabel Wells of Lancaster.

## Berks Co. couple to attend conference

LEESPORT - Mr. and Mrs. Wayne Wanner, of R2, Fleetwood, have been selected to attend the Co-op Couples Conference July 20-21 at Chambersburg, sponsored by the Pennsylvania Association of Farmer Cooperatives.

The two will join with 35 other young couples from throughout the Commonwealth to take part in the two-day event. Sessions will be held at the Holiday Inn, Chambersburg Community Park, and on two Franklin County modern dairy farms.

The two are sponsored by Dutch Country Council which serves farmer members and communities in Berks, Dauphin, Lebanon and Schuylkill Counties.

At the conference, they will share facts, opinions, and insights about cooperatives and their role in the strength of the business enterprise system. In addition, they will have an

opportunity to meet others and discuss ways in which they play a vital leadership role in cooperative and community affairs.

Conference participants will join with cooperative leaders of this area to discuss current issues vital for farm leaders, cooperatives, and the community. They also will hear about the education P.A.F.C. and Penn State programs that are benefiting rural leaders.

Keynote speaker for the event will be the Honorable Kent D. Shelhamer, Pennsylvania legislator and chairman of the House Committee on Agriculture.

### This giant-capacity forage harvester is built for self-propelled power

John Deere Self-Propelled 5200 and 5400 Forage Harvesters are not just pull-type units with engines added. They're SP-built with 9-knife, 24-inch-diameter cutterheads. Exclusive J-knives can be held more rigidly. Recutter screens have a larger surface area. Feed rolls are slip-clutch protected. The power units are loaded with features, too. We have one of these giant SP forage harvesters ready for you right now. Come by soon and check it out in person.

### Put a dependable John Deere Wagon into your harvesting lineup

### Here's the way to high-volume forage handling

Over the years, John Deere self-unloading wagons have earned a reputation for dependable high-volume forage handling. Inspect one on our lot and you'll see why. They've got the capacity to keep up with modern forage harvesters. And you'll find wood construction that stands up in the field. You have the choice of front unloading only or front-and-rear unloading. You'll also like the handy safety bar that instantly stops the beaters and conveyor.

# Demonstration and public speaking day held

By JUDY MITCHELL  
Berks Co. Feature Writer  
LEESPORT - Berks County 4-H Club members, parents and leaders attended the 1976 4-H Day held at the Ag Center on June 29, featuring junior and senior demonstration and public speaking events preliminary to the upcoming regional and state contests.

Employing a variety of visual aids, many of them self-crafted, demonstrators competed in a number of categories including Foods and Nutrition, Home and Family Management, Plant Science, and Animal Science.

Winners in the junior division who will go on to the regional competitions in

Montgomery County on July 13 were: Sharon Hartline from the Oley Miscellaneous Club with "Canning the Fun Way;" Tina Neufeld, Tilden Community Club, "Egg Carton Critters and Other Carton Jitters;" Larry Stratton, Kutztown Community Club, "Forestry;" and Danielle Yoder, Tilden Community Club, "Look What's in My Yard."

Susan Fink from the Fleetwood 4-H Club, also bound for the regionals, took the blue ribbon in the junior division public speaking event with her speech, "How Much Education Do I Need." Susan also received a red ribbon for her demonstration entitled "Fun with Jellies and Jams."

Lynda Reppert, Bern Booster Sew-Ciable Club, captured the senior division blue ribbon with her demonstration "Quilting: An Old Art." Red ribbon winners in the senior competition were: Gwen Wentzel, Bern Boosters, "You Are What You Eat;" Cathy

Cottrell, Bern Boosters, "How to Care for Wild Rabbits (Baby);" and Ronald Sutliff, Berks Baby Beef Club, "Frontier Equipment."

Senior division winners will go on to the state contests to be held at the Penn State

University August 9 through 11.

Kim Oswald from the Kutztown Community Club, blue ribbon winner in the senior division of the public speaking event, will go to the state competition with her speech "4-H Is Not Just Cooking and Sewing." Ruth

Schuler, Fleetwood 4-H Club, took a red ribbon in the senior speaking contest.

4-H Day was sponsored by the county 4-H Club together with the Berks County Cooperative Extension Service and chaired by Janis Malsbury of the Rehersburg 4-H Adventurer's Club.

## LVTP holds pull

The Lebanon Valley Tractor Pullers held a Class B pull on Friday evening, July 2.

Winners were:

**5000 Super Stock**

1. Dale Smoker, Cochranville, 289 feet, 1 inch; 2. Tim Stauffer, Ephrata 267.9½; 3. Jim Brubaker, Quarryville 263.7½.

**7000 Super Stock**

1. Marlin Brubaker, Quarryville Full Pull; 2. E. M. Tony Stauffer, New Holland, 294.4½; 3. Tim Stauffer 251.4.

**9000 Super Stock**

1. E. M. Tony Stauffer 282.6; 2. Harry Griest, Coatesville 260.10; 3. Marlin Brubaker 257.7.

**12,000 Super Stock**

1. Harry Griest 286.4; 2. Robert Myer, Womelsdorf 193.9; 3. Joe Schott, Lebanon 187.9½.

**5000 Modified**

1. Galen Spickler, Milton Grove 289.4; 2. David Becker, Mount Joy, 286.10; 3. Stanley Graver, Pequea 279.8½.

**7000 Modified**

1. Lester Landis, Lititz 293.10½; 2. Les Houck, Kinzer 260.10; 3. David Becker 252.3½.

**9000 Open**

1. Les Houck 254; 2. David Becker 249.3; 3. Galen Spickler 247½.

**12,000 Open**

1. Harry Griest Full Pull; 2. Robert Myer 219.1; 3. Joe Schott 212.9½.

Next Pull will be Monday, August 9 at 7 p.m. On Tuesday August 10 at 7 p.m. Lebanon County Garden Tractor Pull (stock pull) and the state sanctioned tractor pull Class A will be held Friday, August 13th at 7 p.m.

## the core-type auger beats feed separation

## only Northco has it!

Northco Automatic Cage Feeder

Northco "Master Pan" Floor Feeder

Northco's core-type auger delivers feed to your birds with less separation than any competitive brand feeder.

That's because the core-type auger keeps feed mixing and re-mixing around the entire cage row. This constant mixing in the trough keeps heavier particles, as well as fines, completely blended. Birds at the beginning of the cage row receive the same ration as birds at the end of the cage row.

The core-type auger principle works the same in floor feeders too . . . ask any producer who owns one!

## Junior Cooking Edition

As I expected, the junior cooks are really busy sending in those picnic recipes. Keep it up, you are doing a great job! I believe you really will be the cooks to send in the most recipes. I will keep a score and tell you by the end of July when the picnic recipes will be over.

Let me offer a few suggestions. Do you know a good picnic drink that you especially like? How about a sandwich? Or "what" about those good things to eat that you can just come and take off the table during an afternoon when you are at a picnic or a family reunion? Those kinds of foods - that you can eat as snacks whenever you want on a picnic - are called "finger foods." If you know a good finger food recipe like "Deviled Eggs," send it in.

We have lots of great picnic desserts, though. You are doing a good job, Junior Cooks. Keep it up. I will be getting your potholders off to you this weekend and next week. So you should be getting them within three weeks.

### SUMMER PICNIC BEVERAGES

#### Summer Drink

12 oz. frozen orange concentrate  
12 oz. frozen lemonade concentrate  
1 qt. gingerale  
Mix together. Chill. Serve.  
Betty Ann Burkholder  
Cochranville, Pa.  
Age 12 19330

#### XXX

#### Cheap Punch

1 pk. cherry instant drink  
1 pk. raspberry instant drink  
2 cups sugar  
2 qt. water

1 large can pineapple juice  
1 qt. gingerale

Mix together and serve.

Linda Weaver

Mohler's Church Road  
R3, Ephrata, Pa. 17522

#### XXX

#### Quick Homemade Root Beer

1 bottle of root beer extract  
8 cups of sugar  
13 quarts of cold water

6 quarts of cold gingerale  
Mix root beer extract and sugar together. Add water and stir until dissolved. Then, add the gingerale. The drink is now ready to serve without setting any length of time.

Bruce Weaver

Mohler's Church Road  
R3 Ephrata, Pa. 17522

#### XXX

#### Homemade Root Beer

2 cups white sugar  
1 gallon lukewarm water  
4 teaspoons root beer extract  
1 teaspoon dry yeast

Put in jars. Cover and set in the sun for four hours. Chill before serving. Ready to serve the next day and no need to bottle.

Priscilla Stoltzfus  
Gordonville, Pa.  
Age 5

#### XXX

#### CONDIMENTS

#### Small Whole Sour Pickles

Put pickles in water over night

Make enough of pickle juice to cover Pickles

Pickle juice:  
1 cup vinegar  
½ cup sugar  
½ teaspoon salt

Boil until soft and put in jars.

Jane Zimmerman  
Leola R1, Pa.  
Age 8

#### XXX

#### Catsup

1 gallon tomato juice  
1 teaspoon cinnamon  
½ teaspoon red pepper  
4 tablespoons salt  
1-½ cup sugar  
1 pint vinegar

Ellen Z. Zimmerman

R1

Leola, Pa.  
Age 10

#### XXX

#### FINGER FOODS Cold Pack Spiced Cataloupes

For 1 quart cantaloupes, select those that are ripe and firm, and slice and sprinkle with a pinch of salt. Let stand over night or for a half day. Next, put in cans and add the following juice:

½ cup water  
1 cup sugar  
4 tablespoons vinegar

Add a few drops of oil of cloves or cinnamon. Boil for 30 minutes in jars. (Be sure to peel off all green or white to can, so that the fruit preserves better.) For picnics, stick with toothpicks and serve as a finger food.

Emma Hoover  
Leola, Pa.  
Age 11

#### XXX

#### Egg Cheese

1 qt. thick milk  
6 eggs  
1 gallon sweet milk

To the one quart thick milk, beat in six eggs. Next add this mixture to the one gallon sweet milk, boiling. Stir. The stove temperature should not be too hot or the mixture will scorch. Scald until whey is clear and pour into cloth and hang to drip.

When the mixture is cooled, it is ready to spread.

Ella Hoover  
Leola, Pa.  
Age 10

#### XXXX

#### Popped Corn Squares

8 cups popped corn  
1 cup sugar  
½ cup white corn syrup  
¼ cup water  
1 tablespoon butter  
1 teaspoon salt

Put popped corn into plastic bag and roll with rolling pin until about ¼ the usual size. Boil sugar, syrup, salt, and water until mixture is hard. Add butter. Boil to hard crack. Add popped corn. Stir until well blended. Return to heat for a minute to loosen mixture. Pour into well-greased baking sheet. Roll with a rolling pin as thin as possible. Cut into squares.

## May slaughter drops

DENVER, Colo. - The number of cows slaughtered in May was down from a year ago, but the total still was about the same as previously projected for the month. Also, slaughter totals for the first five months of 1976 remained ahead of a

year earlier and ahead of projections.

In its regular monthly report on U. S. cow numbers, the American National Cattlemen's Association pointed out that cow slaughter in May totaled 739,000 head - down seven percent from the same month in 1975 but up one percent from the previously projected May total.

The projections referred to by ANCA are monthly and annual cow slaughter rates previously estimated as being needed in 1976 to balance cow herd size with beef demand and today's production cost levels. The estimates were made by economists with Cattle-Fax, the market analysis service sponsored by ANCA.

Finney said cow slaughter rates during the remainder of 1976 will depend on weather and grass conditions as well as industry economic and seasonal trends.

### THE GOOD WORD from the Bible

By mercy and truth iniquity is purged: and by the fear of the Lord men depart from evil.

When a man's ways please the Lord, he maketh even his enemies at peace.

Proverbs 16: 6, 7

## Pitfalls of regulation for explained

LANCASTER — "While many may complain bitterly about the restrictions imposed upon our businesses by government agencies, there's one thing we tend to forget. We forget that in our society the government is representative of our people."

That's the opinion of Arthur Fogerty, who has spent 16 years as a public relations director for both government and private concerns. He's currently PR director for Agway, Inc. He made his comments at Penn State's annual feed conference, held here at the Sheraton-Conestoga Motor Lodge last week.

"Government regulations have come about in many areas because Americans distrust bigness and power. They don't want business to get too big, or labor unions to get too powerful, so the

Arthur Fogerty

people tell their government representatives to regulate these groups.

"But what do people fear today? They fear big government. Big government is under attack by both the liberals and conservatives. The usefulness of many government agencies is being questioned. Regulatory agencies too often exist outside the control of representative government, and there are moves afoot to change that."

Fogerty said one problem he sees with regulations is that too many of the regulators have never been exposed to the realities of production. Most of the people in this country have never worked at mining, manufacturing or agriculture," he said. "And

when they get into government, when they start regulating, they have no conception of how their regulations can stall an industry."

Regulations are never going to go away, Fogerty said, adding that many are necessary if the free market system is to work in an orderly manner. "But I think we should develop economic

incentives for compliance rather than penalties for non-compliance," he said.

"Pollution controls are an excellent example. Why not have tax benefits for the installation of controls? I think we should encourage business to help clean up the environment. And I don't think you encourage people by holding a club over their heads."

## \*1.21 more for milk

ALEXANDRIA, Va. — Market Administrator Joseph D. Shine recently announced a Class I milk price of \$11.10 per hundredweight for August 1976, and a June Class II price of \$8.23 for the Middle Atlantic Marketing Area. The Class I price is two cents higher than July 1976, and \$1.21 above last August, while the June Class II price increased three cents from the previous month and is also \$1.21 above last year. Order No. 4 prices are announced for milk testing 3.5 percent butterfat, f.o.b. plants located within 55 miles of Philadelphia, and also within 75 miles from the nearer of Washington, D.C. or Baltimore. There is a six-cent direct-delivery differential applicable to producer milk received at plants located within 55 miles of Philadelphia.

Shine stated that the August Class I price and the June Class II price are based on the June Minnesota -

Wisconsin manufacturing milk price of \$8.32 per hundredweight for milk testing 3.5 percent.

The USDA reported the June 1976 wholesale Grade A butter price at Chicago was 95.02 cents per pound while the nonfat dry milk price was 62.69 cents per pound, f.o.b. Chicago.

## Nutrena Controlled Release CLS — so different, it's patented

Your cattle will like Nutrena Controlled Release CLS and you'll like the benefits behind this new development in liquid supplements. The patented process controls the release of protein-building ammonia nitrogen in the rumen compared with a conventional urea-based liquid supplement. This improves the feeding efficiency of the urea. And, the slow-down

means an extra margin of safety from urea toxicity—that's important when self-feeding liquid supplement.

Nutrena Controlled Release CLS liquid supplement—a product of Cargill research. It's great for dairy herds as well as beef cattle on range, pasture, stalks, stubble or in the feedlot.

feeding programs you can believe in

# Clean and sanitize your dairy operation ... with five new products from

With the introduction of our five new products, you now have a total of nine to choose from. Wayne Foamchek 100 is a heavy duty acid cleaner and milkstone remover for CIP

installations. It leaves equipment clean and sparkling.

For manual cleaning, try Wayne Kleen-Ezey. An excellent stone remover, it also removes rust.

Another new fast-action product is Wayne Dairy Manual Cleaner. Free rinsing, it works in varying water conditions and is biodegradable.

If your operation's equipment calls for the use of a liquid alkaline cleaner, low-sudsing Wayne Liquid Dynemate may be your answer.

And, dairy sanitizing problems are quickly and conveniently solved with Wayne Dairy Sanitizer.

## ALL MILK PRODUCTS

Many millions of calves have been raised successfully and economically on Wayne Calfnip. Today's Calfnip is better than ever before as the result of continuing Research developments. Calfnip is high in milk products with all milk protein. Antibiotic fortification as well as high vitamin levels give optimum growth and performance under stress conditions. High energy comes from 10 percent quality animal fat in dispersible form. Smooth, glossy hair coats, growthy calves, less digestive upset, and ease of feeding are a few more reasons for the wide acceptance and popularity of this outstanding milk replacer. Calfnip saves two ways. It costs less and produces a good calf with

substantial savings over whole milk feeding.

Wayne Calfnip is an excellent food for other baby animals. It can be mixed with water, as for calves, and fed to orphans or fed dry to supplement other food. Orphaned calves and baby pigs really go for Calfnip. It gives them better condition and appearance.

## From Local Ag Teachers:

Thoughts  
in PassingFARMLAND  
PRESERVATION  
& RURAL  
DEVELOPMENT:  
KEYS TO THE LAND  
USE PUZZLE

By D.M. Robinson  
Garden Spot High School  
The Pennsylvania State Office of Planning and Development has recently developed an interim report with recommendations for a Land Policy Program for Pennsylvania to help preserve farm land and assist rural development. These are just recommendations at this stage and need to be aired at public meetings. The purpose of this interim report is to familiarize you with the recommendations so you can give thought to them and make comments to your legislators if you feel they are unfair.

Pennsylvania's rural regions face many different

problems. For some, development pressures are the major concern. Other areas suffer from inadequate rural service, poor transportation facilities, or a lagging agricultural economy. Farm areas near metropolitan regions usually face the most serious challenge to the protection of productive farmland, and the preservation of rural lifestyles.

There is no single solution to the problems of farmland disappearance and rural decline, but two needs are clear:

1. Farming, as an economic venture, must be sufficiently profitable and attractive to keep farmers in business;
2. Rural regions must offer reasonable opportunities for employment and advancement, and provide satisfactory public services. (or so the state feels).

To help bring these about, the following recommendations are proposed by the interim report:

I. Establish a state-wide system of Agri-Zones as a basis for identifying and assisting viable agricultural areas. The Zones would be organized upon petition of a group of farmers and landowners, working with the Pennsylvania Department of Agriculture. They would be eligible to receive a range of assistance and benefits depending upon their needs and the location of the Agri-Zone.

II. Improve farm efficiency and quality of rural life by:

- a. Strengthening technical and financial assistance presently available to farmers and farm operators;
- b. Improving rural transportation services as suggested by results of the pilot program operated by

the Pennsylvania Department of Agriculture:

- c. Targeting state investments to help improve the quality and level of community services;
- d. Seeking to increase and diversify rural employment activities.

Three basic actions are needed to install the program recommended:

1. Establish Agri-Zones by appropriate legislation;
2. Develop county land use plans as a basis for identifying productive agricultural lands and determining compatible development;
3. Intensify programs to aid farmers and rural communities.

Now these are the program recommendations as I have heard them explained. I got the impression that they feel something should be done even though they are not sure just what the best thing to do is. So your input into the public hearings of these recommendations are important. You may not feel that improving rural transportation and employment opportunities will do anything but bring more urbanites to the country and further decay the rural atmosphere rather than improve the quality of rural life. It will be

## Business terminated

TOWSON, Md. - A Baltimore man charged with acting as a pest control consultant and performing pest control application without a license or permit was put out of the termite treating business recently on orders of District Court Judge Edward D. Hardesty in Towson.

The defendant, Thomas Lennert, was charged on information supplied by the Baltimore County State's Attorney office by David Shriver, Supervisor of Pesticide Regulations,

Maryland Department of Agriculture.

According to evidence presented by prosecutor George E. Barrett, Lennert performed termite control work for a Lutherville couple in 1975. Soon afterwards, the customer noticed swarming termites and despite calls to Lennert, he refused to come back to the couple's house to do further work.

## Young farmers

The Elizabethtown Young Farmers will hold their summer picnic July 11 at 12:30 p.m. at the home of Ruth and Clair Hoover, Bainbridge. Those attending should bring a favorite covered dish. Barbecue, ice cream, and drinks will be served. Hay rides, games and swimming are planned, weather permitting.

## Meat board executive urges positive action

CHICAGO, Ill. - The President of the National Live Stock and Meat Board has urged the nation's meat scientists to be ready to answer "tough questions being asked about the necessity of meat and the meat industry."

David H. Stroud, said the questions were being asked in terms of the world food situation, domestic food prices and the nutritional health of people. Speaking at Brigham Young University in the 29th Annual Reciprocal Meats Conference of the American Meat Science Assn. on June 21, he recommended three affirmative objectives for scientists in responding to the challenges:

(1) A concentration of

efforts of scientists in the animal industry toward greater - than - ever development of funding for research in human nutrition related to meat - to establish a strong offensive and adequate defensive program.

(2) An alert posture on the part of meat scientists - increasing awareness of and sensitivity to the growth of competition. He said this competition includes "the absurd and irrational, or at least uninformed, utterances from detractors of our industry."

(3) Both academic and civic activity by scientists to help develop a public awareness of the economic and social importance of our

industry and its contribution to the public welfare.

He said, "Sympathetic understanding of the needs of consumers is essential in presenting an intelligent, truthful case for the concerns of the industry."

He expressed concern that the confidence and pride of the industry in its own products could result in failure to heed the danger signals. Stroud said negative factors, if left unattended, will lead to "serious erosion" in the market position.

"In the past several years the meat industry has been the focus of sustained criticism on moral, economic and health grounds - criticism that has emanated from colonies of flower children to empty-

headed actors to the Rome Food Conference," the meat executive said. "This criticism has begun to have an adverse impact on the image of the industry in the halls of Congress, in medical-health circles and in the public sector in general." He said all food producers

are being obliged to demonstrate how their products fit into a well-balanced nutritious economic diet "but meat foods are being hit the hardest and most frequently of the traditional foods."

He said research work and the funds to support it must

be increased to demonstrate convincingly that meat is a convenient economical source of obtaining necessary nutrients; that meat consumption is an asset to good nutrition and is not a danger to human health nor a cause of world starvation.

## Rise in egg prices seen

WASHINGTON — If total egg production in the first half of 1977 is at the same level as this year, wholesale egg prices would probably average about four cents per dozen higher than this year's 60 cents, according to a U.S. Department of Agriculture

publication released in late June. Prices are based on those paid for large eggs at New York City, as reported by USDA.

The report, "Egg Marketing Facts — First Half 1977," points to a possible stronger demand for all eggs in the first half of 1977 because of a strengthening general economy and an increase in the number of eggs used for breaking and hatching. Partially offsetting this could be a continuation of the long-run decline in consumer demand for shell eggs, and a large supply of competing meats.

Costs of producing eggs in the first half of 1977 depend largely on the 1976 feed grain and soybean crops both here and abroad. If an expected record U.S. corn crop materializes, and if domestic and foreign demand continues relatively strong, feed costs in the first half of 1977 would probably average no higher than this year. But should unfavorable growing

conditions reduce world feed grain crops, feed costs would reflect considerable upward pressure from tighter supplies. Other costs, including processing and marketing, will be higher as labor costs and prices paid for most items continue to rise.

Copies of "Egg Marketing Facts — First Half 1977," developed by the Poultry Division of USDA's Agricultural Marketing Service and approved by the Outlook and Situation Board of USDA's Economic Research Service, are available from the Information Division, AMS, USDA, Washington, D.C. 20250.

## Lehigh 4-H'ers rack up awards

READING - Lehigh Valley 4-H members took 31 beef and sheep competition prizes at the Reading Fair recently. Sarah Fretz took top honors with 17 out of the 31. In the beef events, Miss Fretz's entries took third in heavy-medium weight and second in intermediate showmanship.

In sheep judging, her entries won first and fourth in aged Hampshire lamb; first in yearling lamb; first, third, and fourth in ewe lambs and pair of lambs; first and second in Hampshire market lamb; fifth in intermediate sheep showmanship; and reserve champion in sheep blocking.

Entries by Melissa Fretz, Zionsville R1, won second place in heavy-medium beef competition; first in junior beef showmanship; third in Hampshire market lamb; and second in intermediate sheep showmanship.

Other beef judging winners were entries by Carol Krause of Slatington R1, who took first in heavy-heavy steer and Grand Champion of show. Her sister, Diane Krause, took second in heavy-heavy steer and first in intermediate showmanship. Grant Grim of Breinigsville R1, took third in heavy-heavy weight, first in medium-heavyweight, reserve and grand champion, and second in senior showmanship.

Entries by Ralph Danner of East Texas took fifth in light-medium and third in junior showmanship for beef.

In sheep judging, Joshua Grim's entries placed first in Dorset market lamb and fifth in junior showmanship.

The following Lehigh Co. 4-H members attended Pennsylvania 4-H Leadership Congress, June 21-24 on the

Penn State University main campus.

Delegates were:

4-H Club Congress

Carol Krause, Slatington R1, Cheryl Sulzer, Schnecksville R1, Susan Young, Schnecksville R1, Marsha Lalo, Schnecksville R1, Nicholas Chylik, Jr., Treichlers.

Street Campus

Leadership School

Timothy Geiger and Timothy Grim, Schnecksville R1.

Campus Counselor

Michael Makosky, Allentown R1, for training at Camp Kanesatake, Spruce Creek, Pa.

ELVERSON - The awards assembly for Twin Valley High Seniors was held last month. During the assembly the 1976 DeKalb Agricultural Award was given to Harvey Bitler. This award is presented to the senior vocational agriculture student who has demonstrated the most outstanding development in the areas of citizenship, leadership, and occupational experience program.

During his first year in Vo-Ag he participated in the Berks County land judging contest, Berks County public speaking contest and placed second in the County Greenhand quiz contest. In 10th grade Harvey was accepted for Vo-Tech. As a junior he again participated in the county public speaking contest and received the Chapter degree, and was elected vice-president of

VICA at Vo-Tech where he participated on the parliamentary procedure team for three years.

As a Senior he was awarded the Keystone Farmer Degree, earned first place in the county speaking contest participated in small engines contest and entered his project book in the County and State Contests and received 1st in County and Gold in State. He has received the County Production Credit Award for his project book.

Projects are an important consideration in selection the winner of this award and the recipient has had several successful ones. In ninth grade he had field corn, oats, hay, steers and veal calves. In eleventh and twelfth grade Harvey had field corn, sweet corn and tomatoes.

He plans to continue farming in the future expanding his operations to include swine breeding and fattening, and expanding his acreage of crops. As DeKalb Award winner, Harvey's

Harvey Bitler

name will be engraved on a special plaque in the vocational agriculture classroom along with those of past DeKalb winners.

## READ LANCASTER FARMING FOR FULL MARKET REPORTS

ANALYST OF THE MARKET  
Lancaster Farming, Saturday, July 10, 1976-67

## Egg handlers called to register

NEW YORK, N.Y. - Handlers of eggs who will collect assessments from producers under the Egg Research and Promotion Order are requested to register with the Egg Board as soon as possible.

A poultry official with the U.S. Department of Agriculture's Agricultural Marketing Service said the Egg Board, which administers the order, has notified some 5,000 egg handlers that they must register before the checkoff begins Aug. 1. Any handler who has not received a notification by June 30 should contact the Egg Board immediately at 205 Touhy Ave., Park Ridge, Ill. 60068.

Under rules and regulations - published in the June 8 Federal Register - for implementing the egg order, shell egg packers and egg

breakers are breakers are considered collecting handlers. Additionally, any producer who grades or breaks eggs he produces must remit the assessment on those eggs must also remit assessments to the Egg Board. All of the above collecting handlers must register with the Egg Board before Aug. 1.

The Egg Research and Promotion Order enables the egg industry to conduct a coordinated nationwide program of research, producer and consumer education, and promotion. In a nationwide referendum conducted in November 1975, 73 per cent of the egg producers voting approved the order. Funds for the program will come from assessments of five cents per 30 dozen eggs marketed, collected from egg

producers by handlers and remitted to the Egg Board.

Egg producers with 3,000 or fewer layers and any flock

of breeding hens whose production of eggs is primarily used for the hatching of baby chicks are exempt from assessments.

## Pa. cherries drop sharply

HARRISBURG - Pennsylvania's 1976 tart cherry production is forecast at 4,100 tons, 29 per cent below last year's total crop of 5,770 tons, according to the Pennsylvania Crop Reporting Service.

Although the crop escaped significant weather injury, damage occurred when trees bloomed early due to unseasonably warm Spring temperatures and freezes followed. Development of the reduced crop is about a week ahead of last year with harvest beginning about June 28, while harvest in the Erie County are should begin around July 11.

Nationally, prospective production of tart cherries is forecast at a 30-year low. The 1976 crop is forecast at 71,000 tons, down 42 per cent from last year's utilized tonnage, 46 per cent below the 1974 crop, and is the smallest crop since 1945.

Sweet cherry production in Pennsylvania is forecast at 500 tons, down 26 per cent from 1975 production of 860 tons. Bloom was approximately 18 days ahead of 1975. Harvest of early varieties began around June 19 and is expected to be completed about July 4.

This year's U.S. sweet cherry crop is projected at 147,950 tons, four per cent

below 1975's utilized tonnage, but three percent higher than the 1974 production.

## Udder jet travelers

In ever increasing numbers, cattle from the United States are becoming full-fledged members of the jet age. Latest figures reveal that a record 24,000 cattle were cleared by inspectors for export to nearly 50 countries, and an estimated 70 to 90 per cent traveled by air. These figures exclude Canada and Mexico, Uncle Sam's biggest customers.

Many of the cattle are transported in a stretched version of the DC-8, refurbished with built-in stalls or portable wire-sided crates. Special ramps are needed for easy and quick loading and unloading. Only 29 U.S. airports are cleared for embarkation of cattle. These facilities require a trained staff plus adequate quarters to assemble and quarantine animals.

# Air your views on government regulations

WASHINGTON - Government regulation - how much is too much?

You can help answer this question by citing specific examples of government regulation that you approve and or disapprove of via the Agriculture Council of America's (ACA) toll-free

"Farm Line" (800-424-3510) on July 21 and 22 between noon and 4 p.m. E.D.T. ACA is extending this special Farm Line to two days and doubling the telephone hook-up to ten WATS lines in anticipation of an extremely large volume of calls.

A unique panel of experts

on the subject headed by Senator Carl Curtis (R-Neb.) and other members of Congress, administration officials representing regulatory agencies, and spokesmen for leading industry and consumer groups will man the phones. All calls will be tallied by panelists

and later compiled into a documented report.

Farm Line programs in the past two months featuring "Estate Taxes" and "Problems of Young Farmers" received a capacity number of 20 call an hour per WATS line. During each session, the telephones rang continuously from beginning to end as callers spoke directly with those affecting their future in the decision-making process.

"Agriculture is very concerned about the growing role of government regulatory agencies. This Farm Line will allow people at the local level to express their opinions and share their insight with key decision-makers on this important issue," Slug Hatcher, Chairman of ACA, said.

"We expect our report on this program will shed light on the impact government regulation is having on agriculture as viewed by those directly affected. It will be made available to everyone - Federal agencies, Congress, the media, industry as well as the general public."

As a non-profit, non-political, non-legislative organization, ACA does not advocate any positions of its own and operates the Farm Line strictly to provide a

forum to discuss issues of major interest in agriculture.

Calls placed at any other time beside the specified hours of operation between noon and 4 p.m. E.D.T. on July '21 and 22 will not be answered.

The Agriculture Council of America, formed in 1973, is made up of about 1000 individual farmers and 750 companies and organizations nationwide. Its purpose is to improve communication between farmers and consumers.

## Hog statistics released

HARRISBURG - There were 675,000 hogs and pigs on Pennsylvania farms on June 1, 1976, according to the Crop Reporting Service. This was an increase of 75,000 or 13 per cent from a year earlier. Breeding stock, at 94,000, was up 12 per cent and market hogs, at 581,000 were up 13 per cent.

The Spring (Dec.-May) 1976 pig crop of 525,000 pigs was eight per cent larger

than the Spring 1975 crop of 485,000. Although there were 70,000 or 11 per cent more farrowings, litters were smaller.

Fall farrowing intentions at 60,000 sows if realized, would be up 22 per cent from the 49,000 farrowings last fall.

Nationally, inventory of hogs and pigs on June 1, 1976 is estimated at 52.6 million head, up nine per cent above last year but 11 per cent less

than June 1, 1974. This is the second lowest June 1 total since 1965. The breeding herd is up 11 per cent from last year and continues its upward trend that started last December. Because of the larger pig crop produced in the past six months, the market hog inventory increased nine per cent from a year earlier.

The December 1975-May 1976 pig crop in the U.S. totaled 41.4 million, 16 per cent above last year's small pig crop but eight per cent less than two years ago. This crop is the second smallest since 1937.

Hog producers in the U.S. intend to farrow 5.8 million sows during June-November 1976. This is an increase of 17 per cent from the corresponding period in 1975 and six per cent above the same six-month period in 1974.

secure. We city dudes could never feed ourselves. You know there has been some gardening these last couple of years, folks trying to supplement the family groceries. But do you suppose we could feed ourselves that way? During this lifetime, the average American is going to eat 6.2 tons of meat. There ain't nobody got a backyard in Chicago that big!"

## Farmers appreciated

Speaking before the annual meeting of Iowa Beef Processors, Inc., commentator Paul Harvey pointed out, "We're so outproduced in most all other things that we would be begging for handouts in the world marketplace, except that our nation's most underappreciated minority, our farmers, is keeping us both fed and financially

## The \$6 million man

Harold Morowitz has struck a blow for all us normal mortals who only thought our bodies were worth 98 cents. Well, folks, we've been shortchanged all these years. Morowitz is a biochemist at Yale, and for many years has been laboring under the delusion that the popularly-used 98 cent example (value of our simple raw materials — water, air, lime, iron, etc.) was valid. With a keen knowledge of what chemicals make up our system, Morowitz resea-

ched a supply company catalogue to determine what these chemicals would cost on the open market. Acetate kinase — a rare substance that activates an enzyme is \$8,860 a gram, prolactin — the hormone that stimulates milk production in the breasts is \$17.5 million a gram, hemoglobin is \$285 a gram. There are others. Morowitz calculated what percentage each chemical represents in the body, figured the body's dry weight, multiplied and came up with approximately \$6 million!

## OWENS FARM TRAILERS

Owens helps carry the load with a complete line of fifth wheel and pull type trailers. Thousands of owners have discovered that Owens means durability, versatility and economy. So, whatever the need, whether hauling grain, livestock, lumber or any other load, Owens has the trailer to fit the job. Dealerships available.

## Big Dutchman.

## CONTROLLED CAGE FEEDING SYSTEMS

Big Dutchman chain and trough feeding systems give you the "best" controlled feeding for high density egg production operations. With feed costs continually rising control is essential for feed economy so don't settle for anything less than Big Dutchman.

Contact us for additional personalized information on these Big Dutchman feeder benefits.

- HIGHER PRODUCTION
- REDUCED OPERATION COST
- LESS WASTE SPILLAGE
- LOWER MORTALITY
- LIMIT FEEDING
- LESS EQUIPMENT WEAR

Lincoln 4-H elects queens

The Lincoln 4-H Super-  
Sonic Sewers Club has  
elected a junior and senior  
queen to represent the club  
in the county 4-H Queen  
contest Aug. 19 at the Farm  
and Home Center.

Connie Balmer, Lititz, will  
represent the club as the  
junior queen and Susan  
Martin, Ephrata, as the  
senior queen.

READ LANCASTER FARMING

The satisfaction that comes  
from doing a good job of farming

It's a great feeling to know that you are the master of  
your farmlands . . . that when you treat your soil right,  
it will treat you right. Liming is one of the most impor-  
tant factors in keeping your soil in the highest produc-  
tive range. By raising the pH from a level below 6.0 to  
6.5 or higher, you can expect to harvest .8 more tons  
of alfalfa per acre, with similar increases for all other  
forage and cash crops.

Martin's  
Limestone

Don Dodson, slices a corn stalk to determine  
the location and size of the tassel. A new product  
handled by the Organic Plant Food Company,  
Lancaster, is reportedly capable of increasing  
yields by five or so acres per bushel. The chemical,  
a growth stimulant, is being applied, above, on a  
field outside of Lititz by George Conover, a crop  
duster from Rio Grande, N.J. Researched at  
Purdue University for years, the new product,  
"Spark," is being used on the East Coast for the  
first time this year. Results at university trials and  
in commercial use on Midwestern fields last year  
lead the manufacturer and distributors to believe  
that it is a product here to stay. At any rate, it's up,  
up, and away! Application is recommended when  
the tassel is 1/2 to seven inches long. It's important  
to note, however, that the tassel in this stage of  
development is imbedded within the stalk and  
must be found by making incisions such as those  
being made, by Dodson.

'Omelet King' on TV

"Omelet King" Howard  
Helmer will appear on the  
Dinah Shore television  
program, Dinah! on Friday,  
July 23. But CBS Television  
adds the show may not be  
aired on that day in all areas.  
It could be as much as a  
week on either side of that  
date, but it will be carried  
nationally.

Helmer will receive ap-  
proximately 12 minutes air  
time on all U. S. CBS affiliate  
stations.

After Helmer demon-

strates omelet-making,  
Dinah and her other guests,  
Jimmy Stewart, Lucille Ball  
and husband Gary Morton,  
and Steve and Edie Gorme  
will join him in making  
omelets. Helmer will end his  
performance with a high-  
speed omelet-cooking  
demonstration, in which he  
will cook four omelets at  
once. It was his ability to  
prepare a number of omelets  
simultaneously that earned  
Helmer his world record of  
making 248 omelets in one  
hour.

York horse judges score

YORK - The 4-H Regional  
Horse Judging Contest was  
recently held at the Lebanon  
County Fairgrounds with ten  
counties represented. Terri  
Lehigh, East Berlin, was  
high individual on con-  
formation judging with a  
score of 197 out of 200. Cindy  
Lewis, Felton was third with  
191. Linda Austin, York was  
fifth with 188 and Jim  
Eveler, Felton was seventh  
with 186.

In performance judging  
Linda Austin; Cindy Lewis;  
Pete Lehr, Spring Grove;

Jim Eveler; and Paula  
Smith, York won ribbons  
with a perfect score

In the total overall judging  
Cindy Lewis was third and  
Paula Smith was eighth.

The team was composed of  
Cindy Lewis, Terri Lehigh,  
and Paula Smith. This team  
placed second with a score of  
1,040 and Cumberland  
County was first place team  
with 1,048.

Michele Lehigh, East  
Berlin was sixth in junior  
judging with a score of 248  
out of a possible 300.

## Grant praises maritime union restraint

PARK RIDGE, Ill. - A federal order restraining maritime unions from interfering with the free flow of foreign trade was praised here this week by Allan Grant, president of the American Farm Bureau Federation, as "reassuring evidence that ours is still a government of laws."

Grant cited an order from the National Labor Relations Board directing the International Longshoremen's Association (AFL-CIO) to cease and desist from impeding the loading of grain

destined for delivery to the Soviet Union. The NLRB order came some five weeks after the unions agreed to a settlement stipulation that they would discontinue the practice.

Grant said the NLRB order ending union interference in Soviet grain dealings does not repair the damage of the 1975 union boycott, but agriculture is hopeful that it will stand as a landmark precedent to head off any future violations of free trade by intervening special interests.

The NLRB order marks the completion of action started August 25, 1975, by the AFBF, Texas and Kansas Farm Bureaus when they filed a complaint in the Houston regional office of the NLRB charging the International Longshoremen's Association with engaging in unfair labor practices.

The Farm Bureaus based their complaint on the fact that the ILA in August, 1975, engaged in and encouraged a work stoppage of ships being

loaded for the Soviet Union at the Houston and Beaumont, Texas ports.

On September 19, 1975, the acting general counsel of the NLR board authorized the issuance of a formal complaint, after investigating the charges filed by the Farm Bureaus that the ILA and two local ILA unions had conducted an illegal secondary boycott in refusing to load the ship Bosanka with Soviet-purchased grain. The NLRB found that the ILA violated provisions of the National Labor Relations Act prohibiting secondary boycotts.

On April 24, 1976, the NLRB submitted a cease and desist order agreement to the ILA and the Farm Bureaus which was signed by all parties. Approval of the agreement by the NLR board came June 22, 1976.

Grant said that the refusal in August, 1975, of the ILA to load Soviet-bound grain ships, "was a patent deception by the union to pressure the Administration to order a substantial portion of the grain to be shipped in American vessels." He added, "Union wage scales on the American ships raised maritime costs well above the world rates and are paid in great part by American taxpayers under the terms of a general maritime subsidy. Government estimates are that American grain going to the Soviet Union this year will cost U.S. taxpayers about \$80 million in subsidies for ship operators and workers."

Grant recalled that the

Ford Administration capitulated to the union demands by halting sales of U.S. grains to the Soviet Union from August 11, 1975, until late October, 1975, when the United States signed a five-year grain sales agreement with the Soviet Union. A companion agreement provided a \$16.00 a ton minimum rate for shipping grain to Russia,

with one-third of the shipments to be made in American vessels.

"The government action in negotiating sales and shipping agreements with the Soviet Union that set price terms and locked in a maritime subsidy on behalf of organized labor only compounded the damage done to U.S. export markets," Grant said.

### Berks and Chester Counties

## 4-H poster winners named

Berks County had two 4-H Club members named in the honorable mention group of 4-H poster art at the state level conducted by officials of the Pennsylvania Cooperative Extension Service. Chester County had two.

This top group of 18 artistic 4-H youths were named out of 109 total contestants.

Winners from Berks Co. were Denise Beamesderfer, 102 Community Dr., Shillington, and Lisa Spatz - R1, Hamburg.

Those winning from Chester Co. were Rachel Holloway, 12 of West Chester and Janet Latshaw, 16 of Spring City.

This is the fourth year of 4-H poster art competition and three top exhibits from the state will be hung in Chicago during the National 4-H Club Congress in November. Following the Chicago event, the collection from all states will be scheduled for display at events across the nation throughout the year.

Pennsylvania will be represented in Chicago by posters created by Sue Schneider, 15, of York County; Carol Carville, 13, of Allegheny County; and Ruth Guzel, 18, of Washington County.

Three selected topics for the 1976 posters were "4-H Freedom to Be," "4-H Brings Out the Best," and "4-H is Action."

Charles E. Suloff, Berks associate county agent states that each January the acceptable 4-H poster art topics will be announced for the coming year.

Judge for this year's contest were Harry A. Carey, Extension exhibits specialist at the Pennsylvania State University; Dr. David B. Van Dommelen, Penn State associate professor of art education; and Mrs. Louise Mook, art teacher in the State College Area School System.

## Rabies detected

HARRISBURG - Seventeen rabies cases were reported in Pennsylvania during the fiscal year of July 1, 1975 through June 30, 1976, according to the Pennsylvania Department of Agriculture's Bureau of Animal Industry.

This compares to 20 cases in the 1974-75 fiscal year.

Of the 17 reported cases, fifteen were bats. One rabid skunk and a rabid raccoon were also reported.

Bucks County had the

highest incidence of rabies with three cases being reported, all of which were bats.

No rabies cases were detected in the first three months of 1976. In April of this year one rabid bat was reported from York County. Three rabid bats, one from Northumberland County and two from Allegheny County were detected in May. One bat from Bucks County was diagnosed rabies positive in June.

## Only Bravo controls all eight tomato fungus diseases.

Deliciously healthy tomatoes. That's what you get for using Bravo 6F fungicide. Flowable Bravo is the one fungicide that controls early blight, late blight, gray leaf mold, gray spot, anthracnose, Rhizoctonia fruit rot, Botrytis gray mold, and black mold (California, only). You'll like its convenient flowable form. Ask us for Bravo, we're your local Diamond Shamrock dealer.

## Agway truckers in road-eo

ELIZABETHTOWN - Agway Inc. last month its annual Truck Road-eo at the Agway Distribution Center here to determine winners in various classes which entitled them to participate in the Mid-Atlantic Regional Road-eo competition this weekend at Cherry Hill, N.J.

Seventeen drivers from Agway locations throughout

the state of Pennsylvania participated in the competition as follows:

### Straight truck

Larry Bethman, Harlan Dehoff, Carl Groff, Paul Huber, Marty Loch, Kenneth Schiegel, John Warner, Howard Yoder Jr.

The winner of this class was Marty Loch who will represent Agway in the Mid-Atlantic Road-eo. This will be Marty's second time to represent Agway in state competition in the Straight Truck Class.

### Four-Axle

Marvin Beachy, Joe Crabill, Robert Dunkelberger, Mick Kulp.

The winner of this class was Mick Kulp. Mick will be competing in state competition for the fifth time as Agway driver representative in the Four-Axle class. In

1971, Mick placed third in state competition in 1972, he placed fifth. In 1973, he took first place honors in the state competition and went on to represent the state of Pennsylvania in the Nationals in which he took fifth place. In 1974, Mick again took first place honors in the state and therefore, was eligible to represent the state of Pennsylvania in the Nationals in which he placed second.

### Five-Axle

Boyd Benson, Harold Eltz, Greg Grim, Dennis Loch, Bob Zeager.

The winner of this class was Greg Grim. Greg will be participating for the third time in Pennsylvania competition classes. He has placed second and fifth in his two previous years of

Agway truckers who are competing are: left to right, Greg Grim, Mick Kulp, and Marty Loch.

## ATTENTION: DAIRYMEN To save money and improve milk production

### Feed Dairy Special 40XX

The key to efficiency in any dairy feeding program is getting maximum performance out of homegrown grains and roughages while keeping out-of-pocket feed costs down. That's why Vigortone developed Dairy Special 40XX for use in legume hay or haylage rations.

This potent pre-mix contains abundant phosphorus to balance off the high calcium content of these roughages and provides proper levels of other major minerals, trace minerals and vitamins.

Legume programs are well balanced with Dairy Special 40XX, and the need for supplemental protein is much less. Best of all, your cows soon respond to their full bred-in potential to produce milk.

### Dairy Special 50XX

for the dry cow

Proper nutrition for the dry cow is just as important as for the producing cow. It's during this period that the stage is set for the level of production she will have throughout the lactation period. Vigortone's Dairy Special 50XX is properly suited to fortify high roughage rations of dry cows and keep them in excellent condition right up to freshening.

See your Vigortone dealer soon

Your Vigortone dealer has several products and programs to promote better milk production and help you save money. See him soon, or return the coupon below.

### Berks Co. Society 3

The Berks County Society of Farm Women Group 3 held their monthly meeting at the home of Mrs. Mary Hill, 633 E. 4th St., Boyertown.

Trooper Raymond Albert of the Pennsylvania State Police showed a film, "The Bunco Artist," after which a

discussion was held on crimes of fraud.

During the business meeting, Mrs. Ernest Hartline, president, reported for the county executive committee.

The next meeting will be July 27 at Boyertown Park at 6 p.m. A family covered dish social is planned.

### Berks Co. Society 5

The Berks County Farm Women Group 5 met for a family picnic on June 27 at the home of Mrs. Albert Moyer, Lebanon R1.

A judo demonstration was presented by a local club.

The group will attend a play entitled "Plain & Fancy" on July 14 at the Lebanon Community Theater.

On July 31 the group will have a Chicken Bar-B-Q and bake sale at the corner of Routes 419 and 422 from 10 a.m. to 3 p.m. Tickets can be purchased from any group member.

Next month the group will meet at the corner of Routes 419 and 422 at 7:30 to visit a historical place of interest.

# USDA issues dairy outlook

**Editor's Note:** The following report is based on USDA's Dairy Situation Summary for March and May of this year. It was prepared by James Miller and Charles Shaw of the Commodity Economics Division.

WASHINGTON, D.C. — The American milk cow squeezed out an average of 10,354 pounds of milk last year in an utterly exhausting effort to quench America's thirst for dairy products.

Few agricultural commodities can match milk in versatility of product forms or importance to the American diet — both taste-wise and nutritionally. Last year, each American consumed an average of 546 pounds of milk in fluid or processed form.

Yet, moving that milk from the dairy farm to the consumer in the product form that he demands is no easy task. A system of production, processing, marketing, and pricing has evolved that is so complex and delicately balanced that it may leave many consumers scratching their heads in confusion.

Most of this maze lies in that part of the system between the farmer and the consumer. The producer must accept returns based on market factors beyond his control, while the consumer must pay the price marked on the container or forego the product.

To some degree, the effect of the system is seesawing. As the farmer receives a stronger financial return, the consumer pays more for the product. And, as the consumers benefit from lower prices, the farmer must accept lower returns.

**The producer must accept returns based on market factors beyond his control, while the consumer must pay the price on the container or forego the product.**

Take 1975 as a good example. During the first half of the year, retail prices held steady as the farmer's production costs rose with inflation. Thus dairy farmers fared poorly for a period. Then, in the second half of the year, prices at stores strengthened sharply to give the farmer a healthy return as the consumer paid more.

During that first half of 1975, production costs climbed 12 percent above 1974 levels during the comparable period, while prices dipped five percent in comparison. It takes little economic knowledge to imagine the farmer's discomfort.

The seesaw dipped the other way in the second half of the year, as prices jumped to 15 percent above those in the last half of 1974, while production costs rose a modest five percent. All in all, it proved to be a moderately successful year for farmers after the sluggish start. Total cash receipts for farmers rose 4.6 percent above 1974 levels.

## Support prices explained

The ups and downs of the year also balanced out for the consumer, who paid an average of about three percent more for dairy products in 1975 — well below the record 19-percent price jump in 1974.

While the overall price increases for the year were modest, much of the increase came in the last three months, when retail prices rose six percent. The increases varied considerably between product forms. Milk prices edged up four cents per half gallon in the last four months, but the increase came after declines earlier in the year. As a result, the price was up only a tenth of a cent for all of 1975.

**Since 1967 all food prices advanced 75 percent, whereas dairy prices went up 57 percent.**

Among processed products, American cheese prices boomed by 26 cents a pound last year, compared with an 8-cent increase in 1974. Butter prices soared 38 cents a pound in 1975, while its competitor, margarine, declined by 15 cents a pound. In 1974, butter prices rose eight cents a pound, while margarine increased six cents a pound over 1973 levels.

Consumers who cast a jaundiced eye at the dairy industry should, however, consider the relative performance of dairy items with other commodities:

- Average prices for all foods jumped 8½ percent last year, versus the three percent for dairy products.

- The Consumer Price Index shows that since 1967, all food prices advanced 75 percent, whereas dairy products went up 57 percent.

As in the case with most agricultural industries, much of the dairy industry occupies that middle area between production and consumption, providing a pivot for the price situation.

The crux of the system is to move a highly perishable product in the proper mix of variable forms from the farm to the consumer.

Because of the seasonal supply fluctuations, the industry learned long ago that some system was needed to stabilize prices, if a steady supply was to be attained. Wildly unstable prices would drive out many producers, and discourage production to the degree that, in the long run, the consumer would suffer.

So, with authority from congressional legislation, USDA has become involved in dairy price stabilization for several decades.

The USDA's prime tool in stabilizing prices is the price

The new SOLO JET-PAK 425 Hand Sprayer is light weight, remarkably low priced and maintenance free. The light 8 pound sprayer is made of high impact plastic with a frame of steel that is molded into the unit for stability and balance. Padded carrying straps assure comfortable operation, even by a lady.

The JET-PAK is perfect for private gardens, patios, nurseries, forestry work, lawn grooming and mosquito control. On the farm the 425 sprayer disinfects and whitewashes stables.

## National Chicken Cooking Contest

# Top prize chicken recipe to win \$10,000

LANCASTER — Mr. Robert Graybill, president of Pennfield Corporation, Lancaster, has had a big job for the past year and a half. Along with a staff which included a full-time professional coordinator, he has been organizing the National Chicken Cooking Contest which will take place in Philadelphia at the Civic

Center this week, July 13 and 14.

This is an annual contest which is sponsored by the National Broiler Council of which Graybill is director, Ac'cent flavor enhancer, and Mazola corn oil.

Basically a recipe contest, there are 51 contestants from every state in the United States and Washington D.C.

who have gone through regional and state cookoff eliminations to be selected as the national finalists.

These men and women will now be judged by food editors from across the nation to see who has the winning recipe. In total there will be 75 food editors attending the contest.

The criteria for each

recipe is that the predominant ingredient be a broiler-fryer chicken (whole or any parts), along with at least one teaspoon Ac'cent flavor enhancer and ¼ cup Mazola corn oil. All other products used in the recipe must be familiar to most people and nationally available.

Once these criteria are

met, the judging will be based on five equal points. They are, that the recipe should (1) be simple enough to appeal to most people, (2) be different enough to be interesting, (3) have ingredients that are familiar and nationally available, (4) have a good appearance, and (5) have excellent flavor.

The top recipe wins \$10,000; the second, \$4000; the third \$3000; the fourth, \$2000; and the fifth place winner receives \$1000.

There will be eight home economists on the floor helping to supervise the actual cook off. Several area women will participate in this part of the contest including Agnes Arnold-Norman, Fay Strickler, Mary Alice Gregory, and Lettie Schlader.

Pennsylvania's entrant in the contest is Ann Beuter from Mansfield R1.

## Solanco 4-H

The Solanco Community 4-H Club met June 18 at the fairgrounds, when Debbie Krantz gave a sewing demonstration. Strawberries and homemade ice cream were served following the program. A baseball game was also held.

The next meeting will be a picnic and swimming party on July 16 at 6:30 p.m. at Wenger's pool. Those attending should bring their own hotdogs and rolls.

## TRY A CLASSIFIED AD!

## NATIONAL PORK

### Producers Council®

Over the last few years, the image of pork and the producer has changed. Today, producers are proud of their product. And, through the NPPC, producers have proven to consumers that pork not only tastes good, but it's good for them, too.

The NPPC was formed and is funded and directed by producers. NPPC promotes pork to consumers in a vigorous year-round advertising campaign. The NPPC also funds research on key production problems identified by producer-members.

Our work promoting your product has just begun. We want to do more. We need your help if you would like to join your fellow pork producers in supporting these worthwhile programs, contact National Pork Producers

4715 Grand Avenue  
Des Moines, Iowa 50312

We will direct you to the proper state leaders. Remember, our job has just begun.

# Dairy

(Continued from Page 72)

support. Since 1949, Congress has stipulated that price supports must be designed to return a price to the farmer to achieve between 75-90 percent parity (ratio between milk prices to farmers and their costs, based on a historical period).

The support price works this way: USDA calculates the price level needed so that farmers would receive returns at the desired parity level as determined by the Secretary of Agriculture.

The USDA's Commodity Credit Corporation then provides this price floor for manufacturing grade milk by offering to buy butter, nonfat dry milk, and American cheese at prices which will allow the farmer to receive the announced support price for milk on a yearly basis, with some fluctuation during the year.

Federal marketing orders also play a major role by determining the minimum price for fluid-grade milk. This price is determined by using the Minnesota - Wisconsin (M-W) area manufacturing - grade milk prices as a base, then adding a set differential for specific market areas and transportation costs to different regions of the Nation.

The M-W price is used because it reflects prices in the area that produces the largest bulk of milk above local needs, and because it establishes a value for milk under open market conditions.

Competition for milk supplies among processors and bottling plants often keeps the actual prices paid to the farmer for manufacturing-grade milk above the "floor" set by the Federal price support program. States do not regulate manufacturing prices. This actual price for manufacturing use is then blended with the price for fluid use on a proportional basis to determine the price the Grade A farmer actually receives.

After the milk is bottled or processed, prices are determined by private enterprise in most states, as the Federal Government bows out of the pricing picture. In a few States, however, State authorities regulate retail and wholesale prices.

When the consumer enters the picture at the retail level, he may find considerable price variations for the same product

on a given day. Geographic location, the nature of the retail outlet, and pricing by individual stores, all affect prices on the shelves. Many stores use dairy products frequently as "specials" to draw in customers.

Despite these retail price variables, most consumers may be well aware of the general price increase in recent months. Yet, in one respect the increases may be a blessing: They filter back to the farmer to encourage a production increase.

Looking ahead to late 1976 prospects, the dairy farmer can afford to be a bit optimistic, while consumers may expect retail prices to advance moderately through the end of the year.

From a producer's standpoint, here's the outlook for the last half of 1976:

- Farm milk prices should remain well above 1975 levels during comparable last-half periods. Prices will be rising seasonally in the next few months.

- Overall, milk production should remain fairly strong during the year, with total production for 1976 expected to be two billion pounds over 1975 levels.

From the consumer's viewpoint, retail prices for all dairy products likely will rise six to eight per cent this year over the 1975 average. This compares with an average increase of three per cent in 1975. However, the gain may be somewhat misleading because the 1975 price average was depressed by relatively low prices during the first half of that year. The consumer may have already shouldered the bulk of the increase.

## AGRI-KING

### KEY TO PROFIT

# SAVE WHAT YOU GROW

Use . . .

## "Silo-King"

### WHY DOES SILO-KING WORK?

Silo-King contains a POTENT COMBINATION of the SAME ANTI-OXIDANTS used to PRESERVE HUNDREDS OF FOOD ITEMS in our super markets. Silo-King also contains a POTENT COMBINATION of FOOD GRADE ENZYMES and FLAVORS.

This COMBINATION OF ANTI-OXIDANTS AND ENZYMES results in a much GREATER PRESERVATIVE EFFECT. They ABSORB THE ATMOSPHERIC and HYDROLYTIC OXYGEN ENERGY in the silage to PREVENT THE INITIAL OXIDATION which causes the HEATING AND THE LOSSES.

They also UTILIZE MOISTURE available in the silage to help SYNTHESIZE MORE SOLUBLE

SUGARS which help produce a HIGH QUALITY, SWEET SMELLING silage with EXCEPTIONAL PALATABILITY.

By REDUCING THE LEVEL OF OXIDATION, temperature of the silage is maintained in a RANGE OF 100 TO 110 DEGREES.

This is the IDEAL TEMPERATURE FOR FERMENTATION. This results in a HIGHER PH (LOWER ACIDITY) and a SILAGE OF VERY HIGH QUALITY.

## DON'T LET THIS YEAR GO BY

## WITHOUT GIVING SILO-KING A TRY

Apply Silo-King Simply and Accurately by using a Gandy Applicator.

# Hippie finds happiness on farm

By DIETER KRIEG

STRAUSSTOWN—A former Navy man and follower of the hippie lifestyle has found satisfaction and happiness on a Berks County farm. John Hoffman, 27, says of his present

experiences that he likes "the basic lifestyle, the work — and that farmers contribute in a very direct way" to the economy of this country. He feels satisfied in doing and providing, he acknowledged, and maintains an enthusiastic attitude about his career which is about ten months old.

Employed at the Anthony Poultry Farm, near here, and carrying major responsibilities in the production of field crops, Hoffman was a total stranger to farm work when he joined Anthony's less than a year ago. He was as green as grass.

Now he jokes about it with just a bit of pride, realizing that his determination and interest in a certain type of work have enabled him to become familiar and experienced in farm work.

According to Donald Anthony, who interviewed Hoffman last summer, Hoffman displayed enough potential for the type of work he was to do, and he therefore took a chance on him. He knew he was inexperienced, but adds philosophically that this could be an advantage in a way. As a novice, Hoffman had a lot to learn, including the pursuing of instruction books for tractors and combines. Some farm boys have never looked at those manuals, and nevertheless take the attitude that "they know it all."

Anthony admits he was a bit concerned about his new employee at first, since he had neither the experience nor background to operate equipment and raise crops. But to date things have worked out to be mutually satisfactory. Nevertheless, there have been some breakdowns, and Hoffman likes to tell of one in particular:

"I was out plowing," he began, "and I didn't know anything, but you know how the bottoms are supposed to trip when you hit a rock? Well, I hit a rock and it didn't trip . . . it just tore off." Shocked by the sight of it, and nervous about the boss finding out, Hoffman returned to the farm and timidly stated that he wished he would have been warned about those sort of things happening.

He received a cold answer "they don't." The incident serves as an amusing anecdote today, but he assures people it was anything but funny at the time.

Hoffman's background is varied. Prior to coming to Anthony's, a 650-acre farming operation known internationally for its White Leghorns, he was a control clerk for Continental Can Company. Aside from his experiences there and in the Navy, he has also worked as a director for a church, and computer programmer.

John Hoffman has found the lifestyle and type of work which is meaningful to him by going into farming. A former Navy man and follower of the hippie way of life, Hoffman is married and employed at Anthony's Hatchery, where he is directly involved in crop production.

Hoffman claims he liked the work, basically, and the pay was good, but something was missing. He wanted a greater sense of accomplishment and thought he might find it on a farm. "I like to work, and produce," he stated repeatedly.

The young man's interest in farming was sparked while living on a farm commune near Virginia Beach, Va. with about 25 other people. After that he came to Reading to rent a farm with his brother. "But we didn't farm it," he explained, "we just wanted to be in that environment."

But now there's more to it, and he happily proclaims he likes the challenges of farming.

## FFA 'Work Experience Abroad' program

## FFA youth will summer in Norway

Jay Ault, a Cedar Crest FFA member who will be spending the summer in Norway on the FFA "Work Experience Abroad" program, shakes

hands with H. N. Hunsicker, National Advisor of the Future Farmers of America.

LEBANON, Pa. - Jay Ault of Lebanon R1 met recently with Mr. H.N. Hunsicker, National Advisor of the Future Farmers of America, after a luncheon sponsored by the National FFA Organization in Alexandria, Va.

Ault was one of 50 FFA members who met with attaches from the countries in which they will spend the summer as exchange trainees in the FFA's "Work Experience Abroad" Program.

Ault, who is the son of Mr. and Mrs. Jerome Ault and a member of the Cedar Crest FFA Chapter, will spend three months in Norway.

The FFA "Work Experience Abroad" Program is sponsored by the National FFA Organization to give FFA members an opportunity to become acquainted with students and adults in other nations. Participants live and work with host families observing using the agricultural methods of their host country as they learn the history, culture, traditions, and life styles.

## Conrad Weiser 4-H Club

The Conrad Weiser Clovers 4-H Club of Robesonia recently elected officers for their 1976-'77 year. The meeting was held at the home of Rober's, 24 E. Lincoln Ave. in Robesonia. The officers are: president-Susan Reber, vice-president-Sheila Beidler, secretary-

Dina Witwer, song leader-Greta Breininger, game leader-Julia Mills, and newsreporter-Eileen Fisher.

This year the club will be in three sections. The boys will be led by Mr. W.J. Mills and Mr. J.L. Fisher and will study electricity and conservation. The young

girls will be with Mrs. Mountz and Mrs. Kline learning "A Pattern For Your Skirt". The teenage girls will be with Mrs. Ruth on "Making A School Skirt".

The club hopes to have a fruitful year.

We wish to thank all the people who helped to make the cookie sale a success.

# Lancaster 4-H'ers learn elocution skills

LANCASTER - Fifteen young adults took part in Lancaster County's 4-H Demonstration Day and Public Speaking Contest held at the Farm and Home Center recently.

Of the 15, there were two public speakers - Phil Risser and Judi Anderson. Phil belongs to the Manheim Township Community Club and spoke on the dairy situation. Judi, who is a member of the Easy Rider's Horse Club centered her speech around personal

development through 4-H. Both youths will go on to represent Lancaster County in State Competition in August.

The demonstrations were divided into junior and senior categories. To give a demonstration, the 4-H'er had to be enrolled in or previously completed the project that related to his or her demonstration. Illustrated talks with pantomime, pasters, slides, puppets, role playing, etc.,

were also permitted in the same contest.

All demonstrators were able to go to regional competition. However, only seniors who win blue ribbons at this level will go on to compete at the state level.

The youths who participated in the senior division of demonstrating were Susan Martin, Wanda Yoder, Martha Gregory, Carole Ebersol, Jane Gregory, Genevieve Gibson, Karen Mullen, and Judi Anderson.

The six 4-H'ers to participate in junior demonstrations were Edith Yoder, Mary Ann Bassalin, Virginia Smith, Glenn Seidman, Rosemarie Nissley, and Cindy Risser.

The topics of the demonstrations were varied. In the junior division Edith Yoder and Mary Ann Bassalin from Pequea Valley Cooking Club gave a demonstration on milk. Whereas, Virginia Smith from the Penn Manor 4-H Club used turtles as her topic.

One blue ribbon demonstration was by Glenn Seidman on "Choosing your Camera." Another, on "Find Your Sewing Tools," by Rosemarie Nissley. One other blue ribbon junior demonstrator was Cindy Risser. She used the topic, "Muffins and Milk."

Senior topics ranged from macrame, to horsemanship, culinary skills and garden demonstrations.

Senior demonstration blue ribbon winners were Susan Martin, for "Let's Knot and Say We Did"; Martha Gregory, Brickerville Community Club, "Hat's Off to Tom Turkey"; and Carol Ebersole, Penryn - Elm Community Club.

Wanda Yoder, of the Pequea Valley Cooking and Sewing Club, totaled the highest score on her senior demonstration, "Nut Brown Buttermilk Bread."

Judges for the event were Joe LeFever, Judy Mentzer, Robert Woods and Sharon Shaeffer.

Phil Risser from Manheim Township Community Club gave a public speech on the dairy situation. He, along with Judi Anderson, will represent Lancaster County at State Days in August.

Rosemarie Nissley from the Mt. Joy Sewing Club gave a junior demonstration on "Find Your Sewing Tools." She received a Blue Ribbon for her effort.

## Lancaster Co. youth named to select group

LANCASTER - Kim Martin, 17, 34 Diller Avenue, New Holland, has been selected as one of several Pennsylvania young adults to serve on a 4-H Report to the State Group, it was announced by Leland G. Jinks, chairman of Extension Youth Programs at The Pennsylvania State University.

Members of the group have recently received special communications training on the Penn State campus and will serve as 4-H

Ambassadors to promote the educational youth program.

Their activities will help the public more fully understand the 4-H program, an integral part of the Penn State College of Agriculture.

They will be available to talk to organizations at local, regional, and state levels, including 4-H Clubs, College of Agriculture Alumni groups, legislators and church and school functions. They may also make personal appearances at conventions and other large meetings.

Kim, the daughter of Mr. and Mrs. Roy Martin, will be a senior in Garden Spot High School this fall. She has been a 4-H member for eight years.

A member of the Garden Spot 4-H Home Economics Club, Kim has completed projects in clothing, cooking, teen leadership and crafts. She has served as president, vice president and news reporter of her club.

In county events, Kim was

winner in the 1974 County Dress Revue and participated in the talent show.

In other activities, she was a semi-finalist in the 1974 Regional Dress Revue and was on the consumerama team in the 1975 State Contest.

Kim was an exchange 4-H member with Laplata County, Colorado, and also was honored as Lancaster County's Outstanding Teen Leader in 1974.

## Fallston farmers meet

FALLSTON, Md. - The monthly meeting of the Fallston Farmers Club was recently entertained by Burton Twining with the majority of members present.

Joining the group for the occasion was Max Buckle, Baltimore County Extension agent, who gave a survey of the interests affecting farmers in Baltimore County. These included water supply, water quality, and the elimination of the multiflora rose which is causing an ever increasing problem in pastures.

The group also toured the Twining farm, and made the following observations:

Sugar corn, raised for local and roadside markets,

is doing well and has been sprayed three times. The alfalfa field, covering 60 acres, though off to a poor start due to the weevil, had produced an average of 143 bales per acre on the first cutting. The production of the dairy herd over the years has shown a marked increase due much to the use of superior bulls in artificial insemination. The poultry flock was producing their usual plentiful supply of eggs which are retailed on the Baltimore market.

### One or the Other

"Let me have a turkey sandwich," was the lunchtime request down at the corner delicatessen. "Sorry, no turkey today," was the reply. "Then give me a chicken sandwich," was the alternate request. "Don't be ridiculous if we had chicken, I would have given you a turkey sandwich!"

Know Where the Activities Will Be?

## Strong grain market foreseen

LANCASTER — "Export controls have not been effective. We must keep track of foreign sales, certainly, but we should not be using food in any attempts to bring foreign governments around to our way of thinking," Raymond Ioanes told the annual PennAg grain meeting, held here at the Sheraton - Conestoga last week. Ioanes is a foreign trade consultant.

Speaking particularly of grain sales to Russia, Ioanes

said, "We are in a period of competition with Russia, but today it's a peaceful competition. They have adopted a policy of feeding their people better, and I think we ought to support that kind of policy in Russia and other countries."

Ioanes said the size of the U.S. foreign grain trade tripled in the early 70's with the dropping of barriers between the U.S. and Russia, China, and Eastern European countries. He said

he didn't think we should go back to the days when we weren't trading.

He said he was also glad to see the government out of the grain business. In years past, government programs had idled some 40 million acres of productive farmland. With the end of government storage and subsidy programs, farmers have put most of those acres back into use, Ioanes said. They have helped fuel the export boom in American agricultural products.

When the current feed grain year ends on October 1, Ioanes noted, the U.S. will probably have a 316 million bushel carryover, which is very low. Exports, he said, are expected to hit 1.7 billion bushels, which includes a 450 million bushel sale to the USSR. "The plain fact is that grain exports have been exploding, not just for Russia, but for the whole world."

Livestock operations throughout the world are growing rapidly, he said, increasing the demand for

American feed grains. Europe is becoming a bigger customer every year.

Bolstered by this growing demand, Ioanes said corn prices on Chicago markets would likely remain on a plateau of \$3.25 to \$3.50 per bushel for most of 1976. For the same reason, soybean

prices would also remain strong.

Some weakness in wheat prices could occur, though, Ioanes noted. Wheat farmers are ending the 1975 harvest year with a huge 700 million bushel carryover, making wheat a very abundant commodity.

The above pictured members of Inter-State Milk Producers Cooperative were selected as the five finalist couples at the Young Cooperator Program held recently at Hunt Valley, Md. Pictured in the front row are (left) Mr. and Mrs. Herbert Jones, Burlington, N.J., and (right) Mr. and Mrs. Paul Yingling, Martinsburg, Pa. the second and first place couples, respectively, who will both be attending the National Milk Producers Federation annual meeting in San Francisco. Second row: from left Mr. and Mrs. Harry C. Barrick, Newville, Pa.; Mr. and Mrs. Howard L. Burrows, Earleville, Md.;

and Mr. and Mrs. Richard H. Steel, Pocopson, Pa. third, fourth, and fifth place couples who will be representing Inter-State at the American Institute of Cooperation later this month at Blacksburg, Va.

## MONTHLY HOLSTEIN AUCTION

At my Maryland Farm Sale Barn, located one-half mile Northwest of Woodsboro on Route 550, Frederick County.

### 150 CHOICE HOLSTEINS 150 Registered Grades

This Sale will consist of 150 head of the finest cows and first calf heifers we could select.

SPECIAL MENTION of 30 top Purebred cows. We picked the best out of one big herd of 400 in Eastern Ontario, Canada. They are thirty of the very best quality.

We also picked 20 big fancy first calf heifers out of a big herd of 300. They are all close or fresh, milking up to 70 lbs.

Of the 150 head, 75 will be Purebred and 75 grades. Most of the Purebreds are out of several of the most popular sires. Some with records and pedigrees. All the cows and first calf heifers will be fresh or close to freshening.

Farmers if you need some good cows or heifers to make base, please come to this Sale.

Terms: Cash on day of Sale. Not responsible for accidents.

## ABSOLUTE AUCTION

LARGE REAL ESTATE SALE 421 ACRES

Consisting of 3 farms with excellent high producing cropland.

SATURDAY, AUGUST 14, 1976

At 2:00 P.M.

Located in southern York Co., in Fawn & Hopewell Twp. near New Park, Pa. along Rt. 851 approx. 10 miles east of Exit No. 1 Interstate Rt. 83.

Tract No. 1

Formerly known as the Emory Lanus farm, approx. ¼ mile north of New Park along Rt. 851, containing 176 acres, more or less, of which approx. 110 acres are cropland, 46 acres pasture & 20 acres timber. Improvements are a nice 2 story frame house, lg. bank barn remodeled for hog finishing.

Tract No. 2

Formerly known as the Clarence Bisker farm, located off Rt. 851 near New Park, along Davis Road & containing 133 acres. This fine farm consists of approx. 90 acres of cropland, 23 acres pasture, & about 20 acres timber. Improvements are a 2 story 8 room frame house, lg. bank barn & wagon shed w-2 corn cribs.

Tract No. 3

Formerly known as the Dunnick farm, containing 112 acres, more or less, of which approx. 50 acres are cropland, 30 acres pasture & about 27 acres timber. There are good streams & plenty of water on all three properties.

Inspection by appointment: Please call 301-296-0263 or 717-382-4379.

All three farms will be offered separately & then as a unit.

Terms: If sold separately 10 percent down day of sale. If sold as a unit \$35,000.00 down in cashiers or good approved check day of sale with balance in both cases to be paid in full on or before Oct. 1, 1976.

Auct. note: Please notice the sale will take place on the location of Tract No. 1 at 2:00 P.M. This is an excellent opportunity for farmers or land investors, as these farms are up for absolute sale. Please look at these properties & be prepared to buy.

# COMPARE PRICE AND VALUE OF YOUR PRESENT MILK REPLACER WITH **NEW FORMULA PURINA NURSE-GRO®**

## ADVANTAGES

- INSTANT FLASH MIXING
- HIGHEST QUALITY DIGESTIBLE PROTEIN
- HIGH ANTIBIOTIC LEVEL TO FIGHT BACTERIAL SCOURS
- HIGH DIGESTIBLE FAT LEVEL TO IMPROVE WEIGHT GAIN
- **LOW COST** — ONLY \$14.95 FOR 50 LB. BAG.  
EACH 50 LB. BAG FEEDS 2 CALVES.

PROTEIN.....NOT LESS THAN 22.0%

FAT.....NOT LESS THAN 10.0%

FIBER.....NOT MORE THAN 0.5%

THE PURINA DIFFERENCE: CHECK YOUR INGREDIENT TAG!!

PURINA DOES NOT USE SOY FLOUR TO MAKE ITS MILK REPLACERS.

SOY FLOUR IS AN INEXPENSIVE PROTEIN SOURCE USED IN MANY MILK REPLACERS, HOWEVER IT IS NOT READILY DIGESTIBLE BY THE YOUNG CALF. USING INGREDIENTS NOT EASILY DIGESTIBLE OR THAT CONTAIN TOO MUCH FIBER CAN CAUSE DIGESTIVE UPSETS IN YOUNG CALVES WHICH CAN LEAD TO CALF SCOURS.
